The Secret of Life Howard Markel, 2021-09-21. An NPR Best Book of the Year. An authoritative history of the race to unravel DNA's structure by one of our most prominent medical historians, James Watson and Francis Crick's 1953 discovery of the double helix structure of DNA is the foundation of virtually every advance in our modern understanding of genetics and molecular biology. But how did Watson and Crick do it, and why were they the ones who succeeded? In truth, the discovery of DNA's structure is the story of five towering minds in pursuit of the advancement of science, and for almost all of them, the prospect of fame and immortality. Watson, Crick, Rosalind Franklin, Maurice Wilkins, and Linus Pauling. Each was fascinating and brilliant, with strong personalities that often clashed. Howard Markel skillfully re-creates the intense intellectual journey and fraught personal relationships that ultimately led to a spectacular breakthrough. But it is Rosalind Franklin, fiercely determined, relentless, and an outsider at Cambridge and the University of London in the 1950s as the lone Jewish woman among young male scientists, who becomes a focal point for Markel. *The Secret of Life* is a story of genius and perseverance, but also a saga of cronyism, misogyny, anti-Semitism, and misconduct. Drawing on voluminous archival research, including interviews with James Watson and with Franklin's sister Jennifer Glynn, Markel provides a fascinating look at how science is done, how reputations are undone, and how history is written and revised. A vibrant evocation of Cambridge in the 1950s, Markel also provides colorful depictions of Watson and Crick, their competitiveness, idiosyncrasies, and youthful immaturity, and compelling portraits of Wilkins, Pauling, and most cogently, Rosalind Franklin. *The Secret of Life* is a lively and sweeping narrative of this landmark discovery, one that finally gives the woman at the center of this drama her due.

Nobel's Women of Peace Michelle Benjamin, Maggie Mooney, 2008-01-01. Each year since 1901, the Nobel Peace Prize has been awarded to a person who has made a difference in the world. Twelve women have been given this award, and each has her own fascinating story. Each had to struggle to be heard because she was a woman, and each one shares an incredible determination, commitment, and hope for the future. The most recent winner, Wangari Maathai of Kenya, has helped African women plant more than 30 million trees. How does planting trees promote peace? By improving the lives of communities. Aung San Suu Kyi of Burma has also fought to improve lives by trying to bring democracy to her country. Mairead Corrigan Maguire and Betty Williams worked to end violence in Northern Ireland. Jody Williams' campaigns to ban landmines, and Mother Teresa, was an example of compassion to millions. The courage of the women here will inspire.
