comprehensive view Capitalism and the Senses Regina Lee Blaszczyk, David Suisman, 2023-06-13 Capitalism and the Senses is the first edited volume to explore how the forces of capitalism are entangled with everyday sensory experience. If the senses have a history as Karl Marx wrote, then that history is inseparable from the development of capitalism, which has both taken advantage of the senses and influenced how sensory experience has changed over time. This pioneering collection shows how seeing, hearing, tasting, smelling, and touching have both shaped and been shaped by commercial interests from the turn of the twentieth century to our own time. From the manipulation of taste and texture in the food industry to the careful engineering of the feel of artificial fabrics, capitalist enterprises have worked to commodify the senses in a wide variety of ways. Drawing on history, anthropology, geography, and other fields, the volume's essays analyze not only where this effort has succeeded but also where the senses have resisted control and the logic of markets. The result is an innovative ensemble that demonstrates how the drive to exploit sensorial experience for profit became a defining feature of capitalist modernity and establishes the senses as an important dimension of the history of capitalism. The Tao of Abundance Laurence G. Boldt, 1999-11-01 Through his intelligent, appealing integration of Eastern philosophy and practical advice, Laurence G. Boldt has helped thousands of readers find personal satisfaction in their work and personal lives. Now he applies these principles to the subject of abundance. How do we achieve material wealth without sacrificing our souls? In *The Tao of Abundance*, Boldt applies ancient wisdom to modern times, presenting eight guiding principles from Taoist philosophy geared to help readers make practical life changes that will bring them a truer and deeper sense of abundance.
