Non Distinct Arguments In Uto Aztecan University Of California Publications In Linguistics Volume 8:

The Mesoamerican Indian Languages Jorge A. Suarez, 1983-04-14 At least a hundred indigenous Indian languages are known to have been spoken in Mesoamerica but it is only in the past fifty years that many of them have been adequately described Professor Suarez draws together this considerable mass of scholarship in a general survey that will provide an invaluable source of reference

Language Typology and Syntactic Description: Volume 1, Clause Structure Timothy Shopen, 2007-10-04 This unique three volume survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world's languages Clearly organized and broad ranging it covers topics such as parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect mood and deixis The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages Each volume is accessibly written and clearly explains each new concept introduced Although the volumes can be read independently together they provide an indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations Volume I covers parts of speech systems word order the noun phrase clause types speech act distinctions the passive and information packaging in the clause

Ten Lectures on the Elaboration of Cognitive Grammar Ronald Langacker, 2017-07-31 This book reviews the basic claims and descriptive constructs of Cognitive Grammar outlines major themes in its ongoing development and applies these notions to central problems in grammatical analysis The initial review covers conceptual semantics the conceptual characterization of grammatical categories grammatical constructions and the architecture of a unified theory of language structure Main themes in the framework's development include the dynamicity of language structure grammar as the implementation of semantic functions systems of opposing elements to serve those functions and organization in strata representing successive elaborations of a baseline structure The descriptive application of these notions centers on nominal and clausal structure with special emphasis on nominal grounding

Ten Lectures on the Basics of Cognitive Grammar Ronald Langacker, 2017-07-31 These lectures provide a basic introduction to the linguistic theory known as Cognitive Grammar It is argued that a conceptualist semantics well motivated in its own terms provides the basis for a symbolic view of grammar Consisting in the structuring and symbolization of conceptual content grammar is inherently meaningful and basic grammatical notions have conceptual characterizations An account is given of grammatical categories markings and constructions A number of central topics are examined in detail including subjects possessives locatives voice and impersonals

Essays on Language Function and Language Type Joan L. Bybee, John Haiman, Sandra A. Thompson, 1997-05-23 In their subject matter and in their theoretical orientation all the papers in this volume reflect the powerful influence of T Givón Most of them deal with questions of morphosyntactic typology pragmatics and grammaticalization theory Many of them are directly based on extensive fieldwork on local languages of the Americas Africa

Asia and the Pacific Others are based on statistical analyses of extensive written and spoken corpora of texts

Morphology and its demarcations Wolfgang U. Dressler, Dieter Kastovsky, Oskar E. Pfeiffer, Franz Rainer, 2005-07-28

The papers in this volume derive from the International Morphology Meeting Vienna 2004 and were selected because they address the main topic of the conference external and internal demarcations of morphology The external demarcation between syntax and morphology is dealt with in the papers by Rood Cysouw Mili evi Blom Enrique Arias and Heine K nig Demarcations of inflection and derivation are discussed in the contributions by Ricca Lloret Manova Say au cer and Stump In contrast to theoretical discussions in previous literature which have concentrated on the internal boundary between inflection and derivation this volume attributes equal importance to the demarcations between derivation and compounding addressed in the contributions by Bauer Booij tekauer Fradin Amiot and Scalise Bisetto Guevara **Syntax** Talmy

Givón, 2001-01-01 This new edition of Syntax A functional typological introduction is at many points radically revised In the previous edition 1984 the author deliberately chose to de emphasize the more formal aspects of syntactic structure in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure With hindsight the author now finds the de emphasis of the formal properties a somewhat regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity Lastly Syntax treats synchronic typological diversity more explicitly as the dynamic by product of diachronic development or grammaticalization In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization **Voice** Barbara A. Fox, Paul J.

Hopper, 1994-01-01 The volume s central concern is grammatical voice traditionally known as diathesis and its classical manifestations as Active Middle and Passive While numerous problems in the meaning syntax and morphology of these categories in Indo European remain unsolved their counterparts in more exotic languages have raised still further questions What discourse functions and diachronic events unite voice as a recognizable phenomenon across languages How are they typically grammaticalized What stages do children go through in learning them How does voice link up with ergativity and with other categories and constructions such as the Inverse and the Antipassive The authors in this volume have different perspectives on these problems they discuss voice e g from a typological universal view in relation to language acquisition

and to ergativity and from diachronic and cross linguistic perspectives *Voice and Grammatical Relations* Masayoshi Shibatani, Tasaku Tsunoda, Tar? Kageyama, 2006-01-01 This volume presents thirteen original papers dealing with various aspects of two related areas of research of major concern to linguists of all theoretical persuasions voice and grammatical relations The papers are written from typological functional and cognitive perspectives and contain of a number of general studies as well as studies focusing on specific issues and offer a wealth of data from a broad range of languages The volume provides up to date discussions of an array of issues of theoretical concern including the nature of grammatical relations voice in agent patient systems the expression vs non expression of participant roles and personal vs impersonal passives The papers in the volume demonstrate that investigations into the nature of voice and grammatical relations can still yield fresh theoretical and typological insights *American Book Publishing Record Cumulative, 1950-1977* R.R. Bowker Company. Department of Bibliography, 1978 Arc Pair Grammar David E. Johnson, Paul M. Postal, 2014-07-14 Arc pair grammar is a new extensively formalized theory of the grammatical structure of natural languages As an outgrowth of relational grammar it constitutes a theoretical alternative to the long dominant generative transformational approach to linguistics In this work David Johnson and Paul Postal offer the first comprehensive presentation of this theoretical framework which provides entirely new notions of all the basic concepts of grammatical theory sentence language rule and grammar Originally published in 1981 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Morphologie** G. E. Booij, Christian Lehmann, Joachim Mugdan, 2000 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication

science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume
