Vergne, 2006-11-14 The Scope and History of Commutative and Noncommutative Harmonic Analysis George W. Mackey, 2005-04-08 When I was invited to speak at the conference on the history of analysis given at Rice University in 1977 I decided that it might be interesting to review the history of mathematics and physics in the last three hundred years or so with heavy emphasis on those parts in which harmonic analysis had played a decisive or at least a major role I was pleased and somewhat astonished to find how much of both subjects could be included under this rubric The picture that gradually emerged as the various details fell into place was one that I found very beautiful and the process of seeing it do so left me in an almost constant state of euphoria I would like to believe that others can be led to see this picture by reading my paper and to facilitate this I have included a large number of short expositions of topics which are not widely understood by non specialists from the Preface This volume containing the paper mentioned above as well as five other reprinted papers by Mackey presents a sweeping view of the importance utility and beauty of harmonic analysis and its connections to other areas of mathematics and science A seventh paper written exclusively for this volume attempts to unify certain themes that emerged after major discoveries in 1967 and 1968 in the areas of Lie algebras strong interaction physics

statistical mechanics and nonlinear partial differential equations discoveries that may at first glance appear to be independent but which are in fact deeply interrelated Information for our distributors Copublished with the London Mathematical Society beginning with volume 4 Members of the LMS may order directly from the AMS at the AMS member price The LMS is registered with the Charity Commissioners

Harmonic Analysis and Representations of Semisimple Lie Groups J.A. Wolf, M. Cahen, M. de Wilde, 2012-12-06 This book presents the text of the lectures which were given at the NATO Advanced Study Institute on Representations of Lie groups and Harmonic Analysis which was held in Liege from September 5 to September 17 1977 The general aim of this Summer School was to give a coordinated introduction to the theory of representations of semisimple Lie groups and to non commutative harmonic analysis on these groups together with some glance at physical applications and at the related subject of random walks As will appear to the reader the order of the papers which follows relatively closely the order of the lectures which were actually give follows a logical pattern The two first papers are introductory the one by R Blattner describes in a very progressive way a path going from standard Fourier analysis on $\mathbb{R}$ to non commutative harmonic analysis on a locally compact group the paper by J Wolf describes the structure of semisimple Lie groups the finite dimensional representations of these groups and introduces basic facts about infinite dimensional unitary representations Two of the editors want to thank particularly these two lecturers who were very careful to pave the way for the later lectures Both these chapters give also very useful guidelines to the relevant literature

Representation Theory and Noncommutative Harmonic Analysis I A.A. Kirillov, 2013-03-09 Part I of this book is a short review of the classical part of representation theory The main chapters of representation theory are discussed representations of finite and compact groups finite and infinite dimensional representations of Lie groups It is a typical feature of this survey that the structure of the theory is carefully exposed the reader can easily see the essence of the theory without being overwhelmed by details The final chapter is devoted to the method of orbits for different types of groups Part II deals with representation of Virasoro and Kac Moody algebra The second part of the book deals with representations of Virasoro and Kac Moody algebra The wealth of recent results on representations of infinite dimensional groups is presented
