Education and Social Change in Latin America Carlos Alberto Torres, 1995 Education and Social Change in Latin America is a valuable addition to the area studies literature in Comparative Education Torres knits contributions from recognized North and South American experts to produce a comprehensive tapestry of analyses of both formal and non formal education in Latin America The book constitutes an excellent example of the application of a broad social science perspective to the study of education viewed as a constituent sub system The foci of non formal education Part I political socialisation Part II and the impact of social change upon education in Brazil Part III facilitates a broad range of comparisons A balance between the often contradictory perspectives economic anthropological sociological and political provides the reader with a comprehensive snapshot of trends and developments in Latin American education during the crucial 1980s This inter disciplinary examination of aspects of Latin American education has a broad range of applications ranging from introductory courses to senior seminars to a valuable research tool What would otherwise be an exceptional book is rendered even more valuable by Torres conversation with Paulo Freire While Torres is recognized as one of the foremost authorities on Freire this chapter explores Freire as a human being an educator and introduces some of the contradictions faced by a world renowned adult educator who assumed the mantle of an administrator in the formal education system in his native Brazil between 1989 and 1991

Nonformal Education in Latin America and the Caribbean Thomas J. La Belle, 1986-03-18 In the past two decades there has been a number of nonformal education programs in Latin America and the Caribbean among them literacy programs community development technical vocational training cooperatives agricultural assistance and popular education Nonformal Education and the Poor in Latin America and the Caribbean is a comprehensive overview of these programs their goals methods and actual accomplishments The book also assesses the impact these programs have had on community and individual development and behavior especially in light of political events in these regions

Non-Formal Education Alan Rogers, 2007-03-06 The Comparative Education Research Centre CERC at the University of Hong Kong is proud and privileged to present this book in its series CERC Studies in Comparative Education Alan Rogers is a distinguished figure in the field of non formal education and brings to this volume more than three decades of experience The book is a masterly account which will be seen as a milestone in the literature It is based on the one hand on an exhaustive

review of the literature and on the other hand on extensive practical experience in all parts of the world It is a truly comparative work which fits admirably into the series Much of the thrust of Rogers work is an analysis not only of the significance of non formal education but also of the reasons for changing fashions in the development community Confronting a major question at the outset Rogers ask why the terminology of non formal education which was so much in vogue in the 1970s and 1980s practically disappeared from the mainstream discourse in the 1990s and initial years of the present century Much of the book is therefore about paradigms in the domain of development studies and about the ways that fashions may gloss over substance
