Immunochemistry of Solid-Phase Immunoassay John E. Butler, 2024-08-16 Immunochemistry of Solid Phase Immunoassay fills a niche in the field of immunoassay and immunology Although solid phase immunoassay constitutes a major technology in biology and medicine there is no comprehensive source devoted to the immunochemical principles involved As a result this book will benefit students technicians and researchers who use this technology as well as immunodiagnostic and biotech companies who develop the technology The book is not a methods manual instead it incorporates the concepts data and opinions of more than 25 investigators working in this field Topics discussed include the chemistry of solid phases the behavior of antibodies and antigens on solid phases membrane solid phases reaction kinetics antigen quantitation enzyme systems photophysics immunochemical considerations in data analyses multianalyte assays and occupancy concepts antibody quantitation streptavidin a review of data analysis software and solid phase peptide immunoassay

Enzyme-Mediated Immunoassay H.M. Lenhoff, That T. Ngo, 2012-12-06 T T Ngo and H M Lenhoff Department of Developmental and Cell Biology University of California Irvine CA 92717 In 1959 Yalow and Berson used insulin labeled with radioactive iodine to develop a quantitative immunological method for determining the amount of insulin in human plasma Their method depends upon competition between insulin labeled with radioactive iodine I¹²⁵ and unlabeled insulin from plasma for a fixed and limited number of specific binding sites on the antibody to insulin The amount of the labeled insulin bound to the antibody is inversely proportional to the amount of insulin in the plasma sample Their method which is so elegantly simple in concept is made possible by the ability to detect with ease extremely low levels of radioactivity and by the exquisite specificity of an antibody capable of specifically binding the analyte Such a combination of sensitivity and specificity is the basis of this versatile analytical tool called radioimmunoassay RIA Twelve years later Engvall and Perlmann 1971 and Van Weemen and Schuurs 1971 independently introduced the use of enzymes as another category of sensitive and even more versatile labels for use in

immunoassays Engvall and Perlmann 1971 coined the term ELISA which stands for Enzyme Linked Immunosorbent Assay

Reviews on Immunoassay Technology S.B. Pal,1988-06-18 The books in this series comprise review articles and descriptions of methods of immunoassay which are not reliant on radioisotopes and reflect the growing importance of immunoassay technologies **Principles and Practice of Immunoassay** Christopher P. Price,David J.

Newman,1991-06-18 Each chapter of this book aims to explore the basic physical and chemical principles involved in the immunoassay techniques discussed The book also looks at the optimization and limitations of methodology and concludes with a brief overview of the application of the performance of the technology **Topics in Fluorescence Spectroscopy**

Joseph R. Lakowicz,2006-04-18 Time resolved fluorescence spectroscopy is widely used as a research tool in biochemistry and biophysics These uses of fluorescence have resulted in extensive knowledge of the structure and dynamics of biological macromolecules This information has been gained by studies of phenomena that affect the excited state such as the local environment quenching processes and energy transfer Topics in Fluorescence Spectroscopy Volume 4 Probe Design and Chemical Sensing reflects a new trend which is the use of time resolved fluorescence in analytical and clinical chemistry These emerging applications of time resolved fluorescence are the result of continued advances in laser detector and computer technology For instance photomultiplier tubes PMT were previously bulky devices Miniature PMTs are now available and the performance of simpler detectors is continually improving There is also considerable effort to develop fluorophores that can be excited with the red near infrared NIR output of laser diodes Using such probes one can readily imagine small time resolved fluorometers even hand held devices being used for doctor's office or home health care
