Reform Capacity and Macroeconomic Performance in the Nordic Countries Torben M. Andersen, Michael Bergman, Svend E. Hougaard Jensen, 2015-02-05 The outbreak of the financial crisis in 2008 has had significant effects on economic activity unemployment and public finances for all European countries However European economies do not form a homogenous region and any serious analysis of macroeconomic imbalances in Europe must account for the fact that different economic and political models and circumstances operate across the continent This book focuses on the Nordic countries Denmark Finland Iceland Norway and Sweden which have a relatively good record of undertaking fiscal and structural reforms after their own financial and debt crises in the 1980s and 1990s The Nordic countries are small and open economies well known for their high income levels high employment rates organized labour markets a relatively equal distribution of incomes and large public sectors From this perspective the book asks whether there are lessons that might be learned from the Nordic economies Is there a distinctive Nordic model that could be usefully followed by other small open economies in terms of fiscal and monetary policy design labour market policies and reforms and financial and housing market regulation It is inappropriate to define the Nordic model in terms of a common set of policies Since the key characteristics including the overarching objectives and supporting institutions have strong historical foundations copying and pasting them to other countries is not easily done Even though the Nordic experiences are not directly transferable they may add new knowledge about the importance of institutional design fiscal consolidation and structural reforms not only for macroeconomic performance but also for how to preserve key objectives such as social balance and equity

Understanding PISA's Attractiveness Florian Waldow, Gita Steiner-Khamsi, 2019-05-02 Understanding PISA's Attractiveness examines how policy makers and the media interpret the results of PISA league leaders losers and slippers in ways that suit their own reform agendas As a result a myriad of explanations exist as to why an educational system is high or low performing The chapters written by leading scholars from Australia Austria Denmark Finland Germany Norway Singapore South Korea Spain Sweden Taiwan the UK and the USA provide a fascinating account of why results from PISA and other international large scale assessments are interpreted and translated differently in the various countries The analyses in this book bring to light the wide array of idiosyncratic projections into these international tests In some countries these tests are also used to scandalise one's own educational system and to generate quasi external reform pressure Compiled by two leading scholars in comparative education Florian Waldow and Gita Steiner Khamsi this book offers a truly global perspective on the uses and abuses of PISA and will be of great interest to students and academics working in educational policy comparative education and political science and those working on large scale data sets

The Evolution of Nordic Finance Steffen Elkiær Andersen, 2016-01-11 The book describes the birth and growth of financial institutions and stock exchanges in Scandinavia and Finland from 1656 to 2010 including their banking crises and the history of banking regulation It argues that

quantitative regulations cannot in the long run produce the desired results and bear the seeds of future financial crises

Urban Lives Martin Dribe, Therese Nilsson, Anna Tegunimataka, 2024 Through the lens of a Swedish industrial city Landskrona *Urban Lives* looks at economic and demographic change at the micro level to understand the societal transformations that profoundly changed people's lives during the twentieth century Based on original data infrastructure the book follows individuals across generations and situates them in their social institutional and environmental contexts Chapter authors provide novel insights into the micro level foundations of long term economic demographic processes and cover important research questions related to health family migration and residential segregation

The Workers of Nations Sanford M. Jacoby, 1995 The new international economy is today the single most important factor shaping relations between employers unions and governments in the world's advanced industrial societies While companies compete in global markets with firms around the world workers remain fixed in each country and are influenced by local customs and institutions mores This book explores how globalization affects the contemporary workplace and how workplace policies can make nations more internationally competitive Unlike other country by country treatments of the subject this analysis compares and contrasts the experiences of different nations around important developments such as the labor market consequences of regional trading pacts the international diffusion of new forms of work organization and the strategies that nations are pursuing to

keep their work systems competitive The contributors come from a variety of disciplines but all bear expertise in international industrial relations

The Scandinavian Prison Study Stanton Wheeler, Hugh F. Cline, 2019-12-28 This book presents the formerly unpublished manuscript by Wheeler and Cline detailing the landmark comparative prisons study they conducted in the 1960s which examined fifteen Scandinavian prisons and nearly 2000 inmates across four Nordic countries At the time it was the largest comparative study of prisons and inmate behavior ever undertaken and despite 15 years of analysis and write up it was never published but it influenced many other important prison studies that followed This book engages with the functionalist perspectives that were widespread in the 1960s and tries to answer some of the classical questions of prison sociology such as how prisoners adapt to imprisonment and the degree to which prisoner adaptations can be attributed to characteristics of prisoners and prisons It examines the nature and structure of prisons the effect of that structure on individual prisoners and the other factors that may influence the way that they respond to confinement It also includes discussion about the prisoners considerations of justice and fairness and a explanation of the study design and data which was highly unique at the time The Scandinavian Prison Study brings Wheeler and Cline s pioneering work into the present context with a preface and an introduction which discuss the questions and claims raised in the book still relevant to this day

The Marital Economy in Scandinavia and Britain 1400-1900 Maria Ågren, 2017-03-02 Marriage today is our prime social and legal institution Historically it was also the principal economic institution This collection of essays offers a wealth of original research into the economic social and legal history of the marital partnership in northern Europe over a 500 year period Erickson s introduction explores the concept of the marital economy and sketches the legal and economic background across the region Chapters by gren Gudrun Andersson Agnes Arn rsd ttir Inger D beck Elizabeth Ewan Rosemarie Fiebranz Catherine Frances Hanne Johansen Ann Catrin stman Anu Pylkk nen Hilde Sandvik and Jane Whittle are organized according to the three economic stages of the marital life cycle forming the partnership managing the partnership and dissolving the partnership In conclusion Michael Roberts explores how the historical development of modern economic theory has removed marriage from its central position at the heart of the economy

Restructuring Representation Jeremy Waddington, 2005 Throughout the industrialised world trade unionists are reforming their organisations as part of a strategy to adjust to new labour market economic and political circumstances This volume examines the role of merger activity in this process of reform The book identifies the pattern of merger activity the factors that promote its development and its impact on union structure and governance Most merger activity is shown to originate in some adverse environmental change such as membership decline Furthermore there is little evidence to suggest that mergers have improved union performance in the recruitment retention and organisation of members although in some cases the reform of systems of membership participation has been facilitated The shift away from industrial unions has been accelerated by merger involvement which has also brought into question the role of confederations where the number of affiliated unions has declined markedly The

book comprises two sections The first section examines the merger process in ten countries Australia Austria Denmark Germany Greece Norway Portugal Sweden UK and US The second section comprises three horizontal chapters in which authors of the national chapters develop themes that emerge from the national chapters in comparative perspective

Work Orientations Bengt Furåker, Kristina Håkansson, 2019-07-15 Work orientations and work attitudes have to do with the productive capacities in society Insofar as individuals are positively oriented towards contributing their labour we can expect a great amount of work to be done and to be carried out efficiently carefully and responsibly These subjective factors are thus very vital in modern working life Work Orientations Theoretical Perspectives and Empirical Findings offers up to date research on people's commitment to work and employment and job satisfaction in economically advanced countries It will also analyse changes that have taken place in these respects over the last decades Among the key issues in Work Orientations are questions about whether patterns of work centrality and employment commitment tend to remain stable or have changed across time in various countries Moreover we assume that the circumstances under which people participate in the social division of labour colour their subjective relationships to their jobs and to employment in general A major aim of the book is to explore the impact of factors such as occupation education age and gender on work orientations and work attitudes Work Orientations will be invaluable for researchers and scholars in the fields of organizational studies the sociology of work employee engagement and related disciplines

Governing the Contemporary Administrative State Jarle Trondal, 2023-05-17 This book examines the transformation of the administrative state since it was first coined by Dwight Waldo seventy years ago Empirically the book assesses how the administrative state is facing endogenous reforms through administrative devolution as well as exogenous shifts by the rise of multilevel administrative systems and international bureaucracy Facing dual shifts the book offers a comprehensive analysis of how the administrative state handles three interconnected challenges first a need for innovation and reform as well as stability and robustness second administrative autonomy among regulatory bodies

as well as political leadership and democratic accountability and third nation state sovereignty and international collaboration It also highlights the robust character of the administrative state by demonstrating profound stability in public governance even during times of profound turbulence It will appeal to scholars and students of public policy public administration and global governance as well as practitioners interested in new developments in public governance

Nordic Party Members Marie Demker, Knut Heidar, Karina Kosiara-Pedersen, 2019-12-12 Political parties provide continuity at the elite level and among the mass electorate in times when populist forces threaten the stability of many western democracies The parties however have experienced turbulent times with declining memberships among the established parties volatile electorates and the emergence of new parties This edited collection aims to make an analytical contribution to what party democracy means how to study it and add to our knowledge of who the party members are what they do and how influential they are in policy making processes Clearly elections provide linkage at regular intervals Does party membership even after membership decline provide a supplementary representative linkage that supports democracy and stability in post cleavage societies Nordic party systems have kept central elements of their old five party systems with mostly large social democratic parties and a variable geometry of the conservative liberal agrarian and left socialist forces They have experienced the electoral rise of new parties and in particular the increasing strength of vote catching anti establishment parties in most countries nurtured by anti immigration sentiments In contrast to much recent scholarship this book investigates the stable element in Nordic mass politics namely the parties as membership organisations How many members Why do they join parties How much do they participate Do they experience political influence The overall question is to what extent the party organizations which have been heavily statified by public subsidies keep up linkage to civil society through their membership

The Oxford Handbook of Employment Relations Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that

link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management **Advances in Social**

Simulation Bogumił Kamiński, Grzegorz Koloch, 2013-07-30 This book is the conference proceedings of ESSA 2013 the 9th Conference of the European Social Simulation Association ESSA conferences constitute annual events which serve as an international platform for the exchange of ideas and discussion of cutting edge research in the field of social simulations both from the theoretical as well as applied perspective This book consists of 33 articles which are divided into four themes Methods for the development of simulation models Applications of agent based modeling Adaptive behavior social interactions and global environmental change and using qualitative data to inform behavioral rules We are convinced that this book will serve interested readers as a useful compendium which presents in a nutshell the most recent advances at the frontiers of social simulation research Extreme Right Parties in Scandinavia Anders Widfeldt, 2014-08-27 This book fills a gap in the extreme right literature currently available as there is no book length study of Scandinavia With the election of many right wing parties across Europe this book is very timely The emergence of a new nordic food culture Nordic Council of Ministers, 2015-09-17 New Nordic Food NNF based on the New Nordic Kitchen Manifest has strived in the last eight years to raise the profile of the Nordic cuisine and the meal experience both in the Nordic Region and internationally Since the signing of the kitchen manifest New Nordic Food has evolved into a Nordic social movement Today the challenge lies in taking that movement to a new level so that the Nordic Region can become one of the most outstanding and innovative food regions in the world **Nordic integration and settlement policies for refugees** Hernes, Vilde, Arendt, Jacob Nielsen, Joona, Pernilla Andersson, Tronstad, Kristian Rose, 2019-04-26 This report has been commissioned by the Labour Market Committee of the Nordic Council of Ministers The chief aim is to provide policy relevant knowledge by conducting a comparative analysis of refugee labour market integration in Scandinavia Instead of focusing on the well known employment gap or the fiscal impact of refugee unemployment this study investigates the divergent impacts of integration programmes and settlement policies for refugees from different backgrounds Through longitudinal comparative analysis this study examines the labour market integration of refugees in Denmark Norway and Sweden searching for explanations of cross national differences by combining statistical analyses with in depth analyses of national policies and governance structures
