Downsizing in America William J. Baumol, Alan S. Blinder, Edward N. Wolff, 2003-06-26 In the 1980s and early 1990s a substantial number of U S companies announced major restructuring and downsizing But we don t know exactly what changes in the U S and global economy triggered this phenomenon Little research has been done on the underlying causes of downsizing Did companies actually reduce the size of their workforces or did they simply change the composition of their workforces by firing some kinds of workers and hiring others Downsizing in America one of the most comprehensive analyses of the subject to date confronts all these questions exploring three main issues the extent to which firms actually downsized the factors that triggered changes in firm size and the consequences of downsizing The authors show that much of the conventional wisdom regarding the spate of downsizing in the 1980s and 1990s is inaccurate Nearly half of the large firms that announced major layoffs subsequently increased their workforce by more than 10 percent within two or three years The only arena in which downsizing predominated appears to be the manufacturing sector less than 20 percent of the U S workforce Downsizing in America offers a range of compelling hypotheses to account for adoption of downsizing as an accepted business practice In the short run many companies experiencing difficulties due to decreased sales cash flow problems or declining securities prices reduced their workforces temporarily expanding them again when business conditions improved The most significant trigger leading to long term downsizing was the rapid change in technology Companies rid themselves of their least skilled workers and subsequently hired employees who were better prepared to work with new technology which in some sectors reduced the size of firm at which production is most efficient Baumol Blinder and Wolff also reveal what they call the dirty little secret of downsizing it is profitable in part because it holds down wages Downsizing in America shows that reducing employee rolls increased profits since downsizing firms spent less money on wages relative to output but it did not increase productivity Nor did unions impede downsizing The authors show that unionized industries were actually more likely to downsize in order to eliminate expensive union labor In sum downsizing transferred income from labor to capital from workers to owners

The

Future of Fisheries Science in North America Richard J. Beamish, Brian J. Rothschild, 2009-02-07 Fisheries science in North America is changing in response to a changing climate new technologies an ecosystem approach to management and new thinking about the processes affecting stock and recruitment Authors of the 34 chapters review the science in their particular fields and use their experience to develop informed opinions about the future Everyone associated with fish fisheries and fisheries management will find material that will stimulate their thinking about the future Readers will be impressed with the potential for new discoveries but disturbed by how much needs to be done in fisheries science if we are to sustain North American fisheries in our changing climate Officials that manage or fund fisheries science will appreciate the urgency for the new information needed for the stewardship of fish populations and their ecosystems Research organizations may want to keep some extra copies for a future look back into the thoughts of a wide range of fisheries professionals Fisheries science has been full of surprises with some of the surprises having major economic impacts It is important to minimize these impacts as the demand for seafood increases and the complexities of fisheries management increase

Deconstructing Job Creation Mr. Pietro Garibaldi, Mr. Paolo Mauro, 1999-08-01 This paper studies net employment growth across 21 OECD economies in 1980-97 focusing on experiences within the European Union It finds that sectoral effects can only partially account for differences in job creation By contrast it shows that a policy package including low taxation and flexible employment protection legislation is associated with high job creation and can account for most of the observed differences The Netherlands success is largely accounted for by the creation of part time jobs for women aged 25-49 in the services sector but in most EU countries the substitution of part time jobs for full time jobs is considerable

Explaining Inequality Maurizio Franzini, Mario Pianta, 2015-12-14 Inequalities in incomes and wealth have increased in advanced countries making our economies less dynamic our societies more unjust and our political processes less democratic As a result reducing inequalities is now a major economic social and political challenge This book provides a concise yet comprehensive overview of the economics of inequality Until recently economic inequality has been the object of limited research efforts attracting only modest attention in the political arena despite important advances in the knowledge of its dimensions a convincing understanding of the mechanisms at its roots is still lacking This book summarizes the topic and

provides an interpretation of the mechanisms responsible for increased disparities Building on this analysis the book argues for an integrated set of policies addressing the roots of inequalities in incomes and wealth Explaining Inequality will be of interest to students researchers and practitioners concerned with inequality economic and public policy and political economy
