The greatest interest in the study of birds centers in their home life Soon after their arrival from their winter quarters all birds take upon themselves the duties of reproduction the first step of which is the securing of a satisfactory location some species such as Auklets Petrels Burrowing Owls Kingfishers Bank Swallows etc nest at the end of burrows or holes in the ground a great many nest upon the ground some laying their eggs upon the bare sand leaves or rock while others build nests either bulky or slight as suits their respective tastes hundreds construct their homes among the branches of trees or bushes some close to the ground others among the highest branches and still others swaying from the ends of the outermost limbs other species lay their eggs at the bottom of holes in trees either in natural cavities or in holes dug by their own efforts the most noticeable in the latter class being the Woodpeckers which often chisel their way into limbs of living trees The study of nests alone is most interesting the rude and slight platforms of the Herons Cuckoos Grosbeaks etc the rough but substantial structures of the Robin and the exquisite architectural creations of the Hummingbirds Flycatchers Orioles Bush tits etc Surely the work of some of these little feathered creatures these homes without hands show as great a degree of skill and artistic temperament as is seen in the human race The eggs of the different species vary through all the tints from white to blue green and brown some unmarked others handsomely specked spotted blotched or wreathed with different shades of brown lilac and lavender and their sizes vary from that of the diminutive Hummingbird to the Albatross Swan and California Vulture as the largest North American eggs and the Ostrich of Africa whose egg will contain several quarts The nesting season ranges from January with some of the Owls to August in the case of the American Goldfinch but by far the majority of species lay their eggs during May or June It is at this period during their lives that birds are at their best their plumage is the brightest their voices are the sweetest and their actions the most brilliant The purpose of this volume is to furnish a reference and guide to all bird students who may desire to study the home life of our feathered creatures by a description of how when and where they build their nests and the appearance of their eggs About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works North American Birds Eggs Chester A. A revised and unabridged republication of the work first published in 1904. **North American Birds Eggs, by Chester A. Reed ... Illustrating the Eggs of Nearly Every Species of North American Birds** Chester Albert Reed, 1904 **An Egg Check List of North American Birds** Oliver Davie, 2015-08-05. Excerpt from *An Egg Check List of North American Birds* Giving Accurate Descriptions of the Color and Size of the Eggs and Locations of the Nests of the Land and Water Birds of North America. The unprecedented interest manifest in the delightful study of Birds, their nests and eggs, has within the past few years called forth numerous works on the subject and the literature of the study has vastly increased, especially in this country where the field is comparatively new. The present publication is an entirely new departure from the beaten paths of voluminous works. It treats especially the subject indicated in its title. Probably no one has felt the need of a work of this character more than the writer. In making a life business of Natural History, I receive numerous inquiries of the following nature, often written on postal cards: Please describe the eggs of the following birds for me, also state the location where I am likely to find their nests: i. e. Carolina Wren, Red-tailed Hawk, Kingfisher, Blue-yellow-backed Warbler, and be particular in describing the nidification of the Blue Grosbeak and Canada Grouse. I quote the above from a postal card recently received and which is undoubtedly from a young student of Oology. It would be almost impossible for me to reply fully to all communications of this kind which I receive in the course of a year. These interrogatives led me to put in a condensed form the descriptions which are now before the reader, and as the author of the first *Egg Check List of North American Birds*, I venture its publication and await the results. The species of eggs described belong strictly to the North American fauna. These descriptions are taken chiefly from my private collection, consisting upwards of four hundred species of North American Birds Eggs, mostly in original sets, together with the skins of the birds. It is intended that through the aid of this Check List, the collector may be enabled to identify his specimens while in the field. He will learn from this List what a great similarity there is in the eggs of the different

species and in fact whole families and how careful he must be to determine correctly In the latter part of the present work there will be found concise directions for collecting Birds Eggs and Nests to which I specially call the attention of all young collectors Under the head of Notes I give additional information regarding the nesting habits of many of the species I am fully aware that the present List is not entirely complete and therefore earnestly solicit additions corrections and notes of every character relating to the subject from Ornithologists and Oologists About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Eggs of North American Birds (Classic Reprint)
Chas; J. Maynard, 2015-07-19 Excerpt from Eggs of North American Birds The present work on the Eggs of North American Birds embodies the results of my studies on this subject during the past thirty years During this time many thousand specimens have been examined and notes made on them Besides this I have when necessary supplemented my own observations with those of others and have consulted all available works upon the subject for this purpose But unless so stated I am responsible for the descriptions I have deemed it quite unnecessary to repeat descriptions of the eggs of allied species where the differences in the average specimens are indistinguishable but have simply stated this fact All of the names of the species and sub species of birds which occur within the prescribed limits are included in the work and CA en if their eggs are unknown the breeding ran re when known is given No eggs are described unless the identification of the specimen is absolutely correct In the matter of nomenclature I have followed that of the American Ornithologists Union hoping thereby to secure unchanging uniformity of names while the boundary lines established by that body are also used as defining the limits of the North American avifauna I have however made a few minor changes where I have personally differed in opinion as to the specific or sub specific rank of certain birds About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a
