## **Novel Configurations A Study Of French Fiction:**

*Novel Configurations* Allan H. Pasco, 1994 During a period when the field of literary studies turned away from texts to theory *Novel Configurations A Study of French Fiction* has become an underground classic Although it proposes a theory that theory is inductive and solidly based in real works of fiction While looking again at significant masterpieces that range from the early nineteenth to the late twentieth centuries from the creations of traditional french writers to that of an Argentine who spent most of his productive life in France Allan H Pasco has perceptively indicted new but valid close readings that have revolutionized our view of these works He suggests that *La Chartreuse de Parme* is rigorously organized that Balzac was a narrational minimalist that Huysmans developed novelistic strategies that would be played out in the *Nouvea Roman* that Proust intended good readers to come away from *A la recherche du temps perdu* with very different but complementary interpretations that Robbe Grillet's *La Jalousie* turns on a plot that seems strange only because it takes place in the mind of the narrator From these philologically sophisticated interpretations Pasco lucidly elegantly and wittily points to categories that include all fiction Concentrating on patterns and description on the one hand and external and internal organization on the other *Novel configurations* proposes a new classification that can be easily taught to novices though it will help even professional readers understand the most complex fictional innovations
