A Cultural History of Climate Change Tom Bristow, Thomas Ford, 2016-04-20 Charting innovative directions in the environmental humanities this book examines the cultural history of climate change under three broad headings history writing and politics Climate change compels us to rethink many of our traditional means of historical understanding and demands new ways of relating human knowledge action and representations to the dimensions of geological and evolutionary time To address these challenges this book positions our present moment of climatic knowledge within much longer histories of climatic experience Only in light of these histories it argues can we properly understand what climate means today across an array of discursive domains from politics literature and law to neighbourly conversation Its chapters identify turning points and experiments in the construction of climates and of atmospheres of sensation They examine how contemporary ecological thought has repoliticised the representation of nature and detail vital aspects of the history and prehistory of our climatic modernity This ground breaking text will be of great interest to researchers and postgraduate students in environmental history environmental governance history of ideas and science literature and eco criticism political theory cultural theory as well as all general readers interested in climate change

Physical Geography John Macturk, 1873 **Climate Change And Energy Options For A Sustainable Future** Dinesh Kumar Srivastava, V S Ramamurthy, 2021-02-02 This book could not be more timely published after a year that saw

the costliest slew of weather disasters in history along with one of the deadliest pandemic the emergence and spread of which is linked to climate change This book will be a valuable resource for scientists policy makers but also educators and especially a young generation of readers who want to be informed citizens shaping the right choices for their local communities but also as cosmopolitan citizens of the world Journal of Indian Physics Association The signs of global warming can be seen everywhere hotter summers frequent heavy rains prolonged droughts more severe forest fires fiercer storms including snow storms and cyclones as well as melting polar ice caps Our indiscriminate actions are raising the spectre of millions of climate refugees who are victims of battles for water crops fish and so on It is poignant that the poorer countries that are the least equipped to face these calamities have contributed the least to global warming but are the worst hit Only a concerted effort from the entire world by a rapid transition to renewable clean and green energy sources while checking wastage deforestation and pollution and a genuine adjustment in lifestyles towards moderation can avert the Earth the only habitable planet we know from turning into a hothouse

Australian Forestry ,2006 **Climate Change Adaptation Plan for Australian Birds** Stephen Garnett,Donald Franklin,2014-05-30 This is the first climate change adaptation plan produced for a national faunal group anywhere in the world It outlines the nature of threats related to climate change for the Australian bird taxa most likely to be affected by climate change and provides recommendations on what might be done to assist them and approximate costs of doing so It also features an analysis of how climate change will affect all Australian birds explains why some species are likely to be more exposed or sensitive to it than others and explores the theory and practice of conservation management under the realities of a changing climate Species profiles include maps showing current core habitat and modelled climatic suitability based on historical records as well as maps showing projected climatic suitability in 2085 in relation to current core habitat Climate Change Adaptation Plan for Australian Birds is an important reference for policy makers conservation scientists land managers climate change adaptation biologists as well as bird watchers and advocacy groups
