Swenson, 2012-05-14 This illustrated history by a trio of experts is the definitive reference on the Apollo spacecraft and lunar modules It traces the vehicles design development and operation in space More than 100 photographs and illustrations

Apollo to the Moon Teasel E. Muir-Harmony, 2018 A celebration of the 50th anniversary of NASA's Apollo missions to the moon this narrative uses 50 key artifacts from the Smithsonian archives to tell the story of the groundbreaking space exploration program Bold photographs fascinating graphics and engaging stories commemorate the 20th century's most important space endeavor NASA's Apollo program to reach the moon From the lunar rover and an emergency oxygen mask to space food and moon rocks it's a carefully curated array of objects complete with intriguing back stories and profiles of key participants This book showcases the historic space exploration program that landed humans on the moon advanced the world's capabilities for space travel and revolutionized our sense of humanity's place in the universe Each historic accomplishment is symbolized by a different object from a Russian stamp honoring Yuri Gagarin and plastic astronaut action figures to the Apollo 11 command module piloted by Michael Collins as Armstrong and Aldrin made the first moonwalk together with the monumental art inspired by these moon missions Throughout *Apollo to the Moon* also tells the story of people who made the journey possible the heroic astronauts as well as their supporters including President John F Kennedy newsman Walter Cronkite and NASA scientists such as Margaret Hamilton Publisher's website

The Decision to Go to the Moon John M. Logsdon, 1970 The decision announced by John F Kennedy on May 25 1961 initiating the expedition to the moon is now documented in full for future students of history To John Logsdon whose approach is that of a political scientist examining the influence of men and events on the decision making process the decision to land a man on the moon before this decade is out was wholly political rather than military although overtones of implied defense were useful in

obtaining congressional support Moreover he notes it was made without the support of the scientific community although their previous research efforts were expected partially to offset this deterrent Although the success of the Russian manned orbit and the fiasco of the Bay of Pigs invasion certainly influenced the timing in the author's interpretation the Kennedy decision manages to escape the narrow definition of a public relations exhibition In Kennedy's view he emphasizes the security of the country itself was inseparably linked to a position of prestige in world opinion Nor was he a particular enthusiast of space exploration for its own rewards As he remarked to one of his advisors If you had a scientific spectacular on this earth that would be more useful say desalting the ocean or something just as dramatic and convincing as space then we would do that The thoroughness of this book as a historical record is evident throughout NASA historical records and government documents not previously released including several Presidential papers are used in the analysis and the author weaves these records together with subtleties of opinion from interviews with NASA officials and such Kennedy advisors as Theodore Sorenson McGeorge Bundy David Bell and Jerome Wiesner

One Small Step Eugene Fowler, 1999 An illustrated commemoration of Apollo 11 astronaut Neil Armstrong's first steps on the moon on July 20 1969 with historical notes anecdotes and other space lore

Project Apollo Thomas W. Alexander, 1964 A layman's look at the moon project its background policies and problems

Moon Landing Nadia Higgins, Rod Espinosa, 2007-08-01 Discusses the Project Apollo space flight to the moon

Apollo and America's Moon Landing Program - Project Apollo World Spaceflight News, Roger D. Launius, National Aeronautics and Space Administration (NASA), 2018-01-05 This official NASA history document presents a narrative account of the Apollo lunar landing program from its origin through its assessment The preface states The program to land an American on the Moon and return safely to Earth in the 1960s has been called by some observers a defining event of the twentieth century Pulitzer Prize winning historian Arthur M Schlesinger Jr even suggested that when Americans two centuries hence study the twentieth century they will view the Apollo lunar landing as the critical event of the century While that conclusion might be premature there can be little doubt but that the flight of Apollo 11 in particular and the overall Apollo program in general was a high point in humanity's quest to explore the universe beyond Earth From the introduction On 25 May 1961 President John F Kennedy announced to the nation a goal of sending an American safely to the Moon before the end of the decade This decision involved much study and review prior to making it public and tremendous expenditure and effort to make it a reality by 1969 Only the building of the Panama Canal rivaled the Apollo program's size as the largest non military technological endeavor ever undertaken by the United States only the Manhattan Project was comparable in a wartime setting The human spaceflight imperative was a direct outgrowth of it Projects Mercury at least in its latter stages Gemini and Apollo were each designed to execute it It was finally successfully accomplished on 20 July 1969 when Apollo 11's astronaut Neil Armstrong left the Lunar Module and set foot on the surface of the Moon Contents include The Kennedy Perspective on Space The Soviet Challenge Renewed Reevaluating NASA's

Priorities The NASA Position Decision An Assessment of the Decision Gearing Up for Project Apollo The Program Management Concept How Do We Go to the Moon Prelude to Apollo Mercury Bridging the Technological Gap From Gemini to Apollo Satellite Support of Apollo Building Saturn The Apollo Spacecraft The Lunar Module Trips to the Moon A Meaning for Apollo

The Rhetoric of Project Apollo Kathy K. Previs, 2024-12-15 On July 20 1969 Americans not only landed on the Moon but the televised spectacle forever changed the ways in which news and commentary about historical events would be presented to audiences In The Rhetoric of Project Apollo Kathy Previs provides a comprehensive analysis of the rhetorical strategies that CBS News employed in covering the Apollo missions from 1968 1972 and documents the role that NASA s public relations office had in televising the exciting moonshots She illustrates how CBS s and NASA s symbolic representations followed a ritual view of communication enabling viewers to make sense of complex technological feats and scientific discoveries while garnering public support for the costly missions Based on four rhetorical categories nationalism romanticism pragmatism and technology Previs also provides an in depth analysis of which narratives have withstood the test of time in how Apollo is remembered on CBS News and across a variety of televised platforms including CNN the History Channel and PBS from 1973 2022 marking the 50th anniversary of Apollo s last mission From Cold War metaphors to now recognizing the role women had in Apollo s successes its story continues to resonate with and inspire audiences around the world

Apollo and America's Moon Landing Program - Project Apollo World Spaceflight News, Robert C. Seamans Jr., John M. Logsdon, George E. Mueller, Maxime A. Faget, Robert A. Gilruth, Christopher C. Kraft, National Aeronautics and Space Administration (NASA), 2018-01-06 These official NASA history documents provide unique accounts of the Apollo lunar landing program from the NASA decision makers and leaders of the era Robert C Seamans Jr Howard Tindall George Mueller Owen Morris Maxime Faget Robert Gilruth and Christopher Kraft The first document is a history of the Apollo era by Robert Seamans entitled PROJECT APOLLO The Tough Decisions The second document Managing the Moon Program Lessons Learned From Project Apollo reproduces the proceedings of an oral history workshop conducted in 1989 by noted space historian John Logsdon Seamans book The foreword notes Robert C Seamans Jr has written a uniquely comprehensive report of the Apollo Manned Lunar Landing Program It goes well beyond the normal reporting that we have seen of the events leading to and results achieved in that major national space program Bob Seamans has relied on his very personal involvement responsibility and experience during his long tenure in the top leadership of the National Aeronautics and Space Administration NASA first as

an Associate Administrator and then as the Agency's Deputy Administrator from less than two years after NASA was formed until January 1968 to present a detailed timeline of the key elements of NASA's extensive analyses decisions activities capabilities and responsibilities that led to the creation of the program and its outstanding success In fact this manuscript presents the most detailed and specific assembly of personal and archival records to identify the comments events meetings decisions and actions taken in the initiation and conduct of the program This detailed report demonstrates NASA's broad capabilities and despite his unassuming presentation also shows Bob Seamans's strong contributions Both of those demonstrated characteristics have always been clear to all of us who worked in NASA The report reviews the major Mercury and then Gemini precursors for the Apollo mission program and its development and mission sequence But very importantly it describes the major and often complex deliberations that encouraged inputs from the broad range of informed internal Agency individuals in order to arrive at the resulting actions taken it recognizes differences among their various views including even sensitivities within the leadership of the Agency and it acknowledges NASA's relationships with the President and key executive branch personnel as well as the very important and often complex relationships with members of Congress Logsdon book While there have been many studies recounting the history of Apollo at the time of the 30th anniversary of the first lunar landing by Apollo 11 it seems appropriate to revisit the process of large scale technological management as it related to the lunar mission Consequently the NASA History Office has chosen to publish this monograph containing the recollections of key participants in the management process The collective oral history presented here was recorded in 1989 at the Johnson Space Center's Gilruth Recreation Center in Houston Texas It includes the recollections of key participants in Apollo's administration addressing issues such as communication between field centers the prioritization of technological goals and the delegation of responsibility

Operation Moonglow Teasel E. Muir-Harmony, 2020 On July 20th 1969 over half of the world's population tuned in to witness the first lunar landing waiting with bated breath as Neil Armstrong ventured outside the cabin door of Apollo 11 and declared that's one small step for a man one giant leap for mankind As the most expensive civilian scientific and technological program in American history Project Apollo symbolized the unmatched prestige of American space exploration Yet despite appearances the project was never just about winning the Space Race advancing scientific progress or even conquering the final frontier Instead the ambitions of Project Apollo would ultimately reveal that the American government was more interested in establishing its superiority much closer to home In Operation Moonglow Smithsonian curator Teasel Muir Harmony explores how and why the moon landing became one of the most decisive geopolitical events of the 20th century In the wake of the Soviet Union's pioneering launch of Sputnik in 1957 and a humiliating defeat at the Bay of Pigs four years later President John F Kennedy approached a budget wary Congress with Project Apollo an unconventional proposal that had the potential to restore America's tarnished geopolitical standing With Cold War tensions between the Soviet Union and the United States approaching an all time high Kennedy argued that

ramping up the space program would inspire global confidence in American excellence and might even persuade people in developing countries to pick American freedom over Soviet tyranny Following the successful return of Apollo 11 its illustrious crew embarked on a diplomatic tour around the world celebrating the mission as an accomplishment for all of humanity Meanwhile the accompanying American officials used the trip as an opportunity to conduct secret meetings with influential heads of state leveraging the space program's global popularity to advance American values and interests More than just a history of spaceships astronauts and moon rocks Operation Moonglow is a history of geopolitical maneuvering of propaganda and public diplomacy and above all of the intricate relationship between scientific innovation and national identity Featuring first hand accounts by Apollo astronauts original interviews with USIA and NASA staff and never before seen archival materials Operation Moonglow is the definitive account of the Apollo mission and a fascinating look at how the Space Race shaped the contours of globalization and global interdependence
