Property Tax in Anglophone Africa Simon H. Keith, 1993-01-01

International Handbook of Land and Property

Taxation Richard Miller Bird, Naomi Enid Slack, 2004-01-01 fine compilation of essays dealing with international land and property taxation issues the book is well researched and readable in presenting the tax systems The book would be more than appropriate as additional reading for a master s level class in taxation It could supplement an international tax class or be used in a state and local tax class to present contrasts and complexities of the issue in other countries Malichi van Tassell Tor The Journal of the American Taxation Association this is quite an achievement Thanks to the nature of the case studies and the contributing authors the volume is inherently international in its scope and should appeal to practitioners teachers and students interested in land and property taxation international economic development and land and real estate studies Scott Orford Environment and Planning B Planning and Design I have found the book International Handbook of Land and Property Taxation a very meaningful and enlightening book to read The editors Bird and Slack have developed a theoretically sound framework backed by economic conceptions in order to attempt a comprehensive treatment on tax administration on land and property Speci cally and yet more broadly they have to their credit managed to throw light of sufficient depth on key issues that include the tax base and rate the tax burden and the tax policy decision makers The international dimension is just as imperative to consider and the editors have effectively succeeded to render an in depth treatment in this regard This imperative is also a unique and important contribution to empirical real estate studies within the tax discipline and the editors should be highly commended in this effort I am very encouraged with the academic rigor of this book publication David Ho Journal of Property Investment and Finance Taxes on land and property exist all over the world in many forms and are an important source of finance for local governments The extent to which local governments have control over property taxes is often an important determinant of their ability to make autonomous expenditure decisions This comprehensive Handbook explores case studies of land and property taxation in 25 countries five in each of five regions OECD central and eastern Europe Asia Africa and Latin America and focuses on the potential contributions of the property tax to the revenues of urban and rural governments and to more efficient land use Introductory chapters highlight the diversity in the application of land and property taxes among the countries Major policy alternatives with respect to taxing land and property are discussed including the choice of tax base exemptions methods of determining the tax base tax rates differential treatment of different classes of property such as farms residences commercial properties and the process of tax administration Other taxes levied on land such as land transfer taxes development charges and unearned increment taxes are also reviewed as is recent experience with property tax reform in a number of countries This major reference work will provide a valuable resource and necessary addition to the libraries of government officials municipal associations property assessors international agencies teachers and students of public finance

How to Design and Implement Property Tax Reforms

Martin Grote, Jean-François Wen, 2024-09-19 Property taxes are often under exploited sources of local public revenues A broad based tax raised at modest rates can potentially generate significantly higher revenues in many countries and meet most of the costs of improved local public services This note provides a practical guide to designing and implementing reforms to recurrent taxes on immovable property and real estate transfer taxes It addresses the fundamental policy choices regarding the property tax base and tax rate and the key functions of the tax administration for managing collections valuation billing and enforcement The advice in the note stems from a review of the literature and insights gained from the experiences of the Fiscal Affairs Department in delivering capacity development on property taxes It covers and updates some of the analytical work by Norregaard 2013 while providing granular advice on practical aspects of reforming property taxes The note is motivated by the resource mobilization needs of developing countries but the design considerations are also pertinent for advanced and emerging market economies seeking to increase the revenue productivity of property taxes

Practical Lessons for Africa from East Asia in Industrial and Trade Policies Peter Harrold, Malathi Jayawickrama, Deepak Bhattasali, 1996 Living Standards Measurement Survey Working Paper No 121 Explores the link between poverty and lack of infrastructure using the 1992-93 Viet Nam Living Standards Survey The household data indicate that in general access to infrastructure is almost equally bad for the poor and the non poor although there are some regional and urban rural differences The paper gives particular attention to the potential benefits from an expansion of irrigation infrastructure

Schools Count Ward Heneveld, Helen Craig, 1996 World Bank Technical Paper No 303 Reviews the design of 26 projects in Sub Saharan Africa that were prepared by African governments and the World Bank for Bank funding The report concludes that school level factors need more attention in program design

Procurement and Disbursement Manual for Projects with Community Participation Gita Gopal, 1995 Draws on the experience of Bulgaria to study the problems encountered in financing government operations in the transition economies This report describes Bulgaria's experience in addressing external shocks to its economy and large declines in the ratio of tax revenues to GDP The book provides broad coverage of the problems many other governments face in transforming their systems of taxation in the transition to a market economy Chapters discuss taxation and incentives government and households indirect taxation and financing of social expenditures Attention is also drawn to the implementation of a value added tax and to policies on fuel taxes The report facilitates an understanding of the differences between actual and optimal policies as governments seek to establish a framework for resolving their budgetary problems in the transition
