Consists of book reviews and essays written for The magazine of fantasy and science fiction **Tale of the Future, from the Beginning to the Present Day** ,1978 *Irony in The Twilight Zone* David Melbye,2015-12-14 Rod Serling's pioneering series The Twilight Zone 1959 to 1964 is remembered for its surprise twist endings and pervading sense of irony While other

American television series of the time also experimented with ironic surprises none depended on these as much as Serling's. However irony was not used merely as a structural device Serling and his writers used it as a provocative means by which to comment on the cultural landscape of the time. Irony in *The Twilight Zone*: How the Series Critiqued Postwar American Culture explores the multiple types of irony such as technological, invasive, martial, sociopolitical, and domestic that Serling, Richard Matheson, Charles Beaumont, and other contributors employed in the show. David Melbye explains how each kind of irony critiqued a specific aspect of American culture and how all of them informed one another, creating a larger social commentary. This book also places the show's use of irony in historical and philosophical contexts, connecting it to a rich cultural tradition reaching back to ancient Greece. *The Twilight Zone* endures because it uses irony to negotiate its definitively modernist moment of high social consciousness and low cultural escapism. With its richly detailed, frequently unexpected readings of episodes, *Irony in The Twilight Zone* offers scholars and fans a fresh and unique lens through which to view the classic series.

[The Science Fiction of Poetics and the Avant-Garde Imagination](#) Michael Golston, 2023-11-19. How the tropes of science fiction infuse and inform avant garde poetics and many other kindred arts. This insightful, playful monograph from Golston does exactly what it advertises: modeling poetics based on how poetry and some parallel artistic endeavors have filtered through a century plus of science fiction. This is not a book about science fiction in and of itself, but it is a book about the resonances of science fiction tropes and ideas in poetic language. The germ of Golston's project is a throwaway line in Robert Smithson's *Entropy* and the New Monuments about how cinema supplanted nature as inspiration for many of his fellow artists. The movies give a ritual pattern to the lives of many artists, and this induces a kind of low budget mysticism which keeps them in a perpetual trance. Golston charts how the demotic appeal of sci-fi, much like that of the B movie, cross-pollinated into poetry and other branches of the avant garde. Golston creates what he calls a regular Rube Goldberg machine of a critical apparatus drawing on Walter Benjamin, Roman Jakobson, and Gilles Deleuze. He starts by acknowledging that, per the important work of Darko Suvin, to situate science fiction critically, the genre is premised on cognitive estrangement. But he is not interested in the specific nuts and bolts of science fiction as it exists, but rather how science fiction has created a model not only for other poets but also for musicians and landscape artists. Golston's critical lens moves around quite a bit, but he begins with familiar enough subjects: Edgar Rice Burroughs, Mina Loy, William S. Burroughs. From there he moves into more alien terrain: Ed Dorn's long poem *Gunslinger*, the discombobulated work of Clark Coolidge, Sun Ra, Ornette Coleman, and Jimi Hendrix all come under consideration. The result of Golston's restless, rich scholarship is the first substantial monograph on science fiction and avant garde poetics using Russian Formalism, Frankfurt School dialectics, and Deleuzian theory to show how the avant garde inherently follows the parameters of sci-fi in both theme and form.
