Outsourcing and Service Work in the New Economy José-Luis Álvarez-Galván,2012-03-15 This book examines the impact of outsourcing on workers and their employment conditions in the new economy To do so the call centre industry in Mexico City is analysed through a large number of in depth interviews with workers and managers available statistics and visits to leading firms in the sector The case of call centres is paradigmatic as it is often seen as a flag ship industry of the new economy rapidly growing and subject to high pressures for costs reduction The Mexican experience is crucially relevant to understand employment conditions in a weak institutional setting where labour protection is low and business competition intense Overall outsourcing has gained popularity as a mechanism to deal with the uncertainty of increasingly challenging business environments Nonetheless the practice of outsourcing also raises important concerns This book identifies those managerial practices which have a substantial impact on workers and their employment conditions such as job designs

customer segmentation non standard contracts intensified supervision union avoidance limited career opportunities and strict social divisions in the workplace These findings also suggest that a number of practices that were common in the old economy are still dominant in the organisation of work in the twenty first century The book is a useful reference for scholars and students concerned with employment and labour studies economic development and globalisation **New Economic Realities** United States.
