Mission Financing To Realign National Defense:

Mission Financing to Realign National Defense L. R. Jones, Glenn C. Bixler, 1992 Volume 5 of a series presenting selected research papers that deal with important methodological and theoretical issues in the policy sciences with substantive research in policy related disciplines It emphasizes research relating to operations and design issues for government organizations Financing National Defense Lawrence R. Jones, Philip J. Candreva, Marc R. DeVore, 2011-12-01 A myth from the colonial period was that Americans could defend themselves by keeping a rifle in the closet and when needed grab it and march off to battle in times of crisis Unfortunately providing national defense is more complicated that that indeed it was more complicated even during the Revolutionary war General George Washington's struggles to form a standing army supported by workable logistics and supply processes and to get funding for both from the Revolutionary Congress are well documented Financing national defense requires planning and resourcing in advance Reacting at the instant of crisis is too late Building an educated highly trained and capable Armed Forces and the acquisition of defense weapons and weapons systems has long lead times and involves making decisions the consequences of which are likely to last for decades These decisions include how to recruit and retain military and civilian personnel as well as designing buying and fielding a vast array of ground weapons ships aircraft and other weaponry A decision to buy a major defense weapons system for example sets in motion a chain of other decisions that will affect the U S its allies and enemies around the world Implementation of such decisions is financed through the U S federal government and Department of Defense budget processes in a planned yet highly and pluralistic and disaggregated system for determining how to advocate acquire and allocate scarce resources in a manner that culminates in congressional and presidential approval In this book we examine the concepts and practices of defense financing provide a detailed description and analysis of resource policy decision making financial management and budget execution processes and analyze the most significant features of the national defense and U S federal government resource decision and management system The book assesses the numerous factors including those that characterize the complex budget review and appropriation decision making dynamics of Congress that make U S defense finance and budgeting different from any other system in the world In addition in a concluding chapter the book compares U S defense policy and budgeting to other nations in different regions of the globe drawing conclusions about the effects of U S defense policy and defense financing abroad in regions including Europe Russia the Middle East and Asia National Defense Budgeting and Financial Management Philip J. Candreva, 2017-05-01 The U S Department of Defense accounts for over half of federal government discretionary spending and over 3% of GDP Half of all federal employees work for the Department The annual budget for the military not only provides for those salaries it covers the baseline and wartime operating expenses of the force and hundreds of billions of dollars of investment in new capabilities and technologies Given the materiality of the defense function and amount of resources it consumes the processes for

budgeting for defense and managing the funds is important to understand This text provides a fully integrated view of defense budgeting It takes the position that defense budgeting is a specific instance of public budgeting and public budgeting is a specific instance of public policy In order to fully understand how the nation budgets for defense it first lays a theoretical and conceptual foundation for public policy and public budgeting That is followed by an assessment of the political and policy context for defense including the overarching federal budget process and role of Congress in setting defense policy Only then does the text explore the specifics of defense budgeting how by whom and why the budget is crafted Beyond the topic of budgeting formulating requesting and legitimating the request for funds the book tackles financial management topics Included are discussions of federal appropriations law funds management accounting requirements intragovernmental business transactions and contemporary topics of defense policy such as funding overseas contingency operations in an era of deficit control legislation This book is an appropriate reference for both students and practitioners of defense budgeting and financial management It would also be appropriate in a general public budgeting course Most public budgeting texts focus on state and municipal governments and there are few that address the federal system This book fills that gap and provides a specific example of federal budgeting From Bureaucracy to Hyperarchy in Netcentric and Quick <u>Learning Organizations</u> Lawrence R. Jones, Fred Thompson, 2007-02-01 This book focuses on the inherent contradiction between bureaucracy hierarchy and the vision inspired by the architecture of modern information technology of a more egalitarian culture in public organizations We agree with Evans and Wurster and others who have argued that in the future knowledge based productive relationships will be designed around fluid teambased collaborative communities either within organizations i e deconstructed value chains or in collaborative alliances such as those with amorphous and permeable corporate boundaries characteristic of companies in the Silicon Valley that is deconstructed supply chains In such relationships everyone can communicate richly with everyone else on the basis of shared standards and like the Internet itself these relationships will eliminate the need to channel information thereby eliminating the trade off between information bandwidth and connectivity The possibility or the threat of random access and information symmetry they conclude will destroy all hierarchies whether of logic or power **Budgeting and Financial Management in the Federal Government** Jerry L. McCaffery, Lawrence R. Jones, 2002-02-01 Mission Statement The mission of the book series is to be consistent with the mission statement of the International Public Management Network IPMN that will sponsor the series The mission of IPMN and the book series is to provide a forum for sharing ideas concepts and results of research and practice in the field of public management and to stimulate critical thinking about alternative approaches to problem solving and decision making in the public sector The book series editors will seek to facilitate exchange and cooperative work among scholars interested in transformational change in the public sector in individual nations and around the world Our intent will be to create and sustain a dialogue on emerging management concepts methods and technology so that readers can learn

about innovation and change in public sector organizations throughout the world IPMN presently includes members representing 70 different countries approximately 600 representatives from these nations As such we have a solid base of subscription support for the book series within IPMN For more information on IPMN see the website at http www willamette org ipmn about html In addition we want the series to appeal to members of the Public Sector section of the Academy of Management and to the members of the Association for Public Policy Analysis and Management Both editors belong to and **Encyclopedia of Public Administration and Public Policy: K-Z** Jack participate actively in AOM and APPAM Rabin.2003 From the Nuremberg trials to the Civil Service Reform Act of 1978 to recent budget reconciliation bills the Encyclopedia of Public Administration and Public Policy provides detailed coverage of watershed policies and decisions from such fields as privatization biomedical ethics education and diversity This second edition features a wide range of new topics including military administration government procurement social theory and justice administration in developed democracies It also addresses current issues such as the creation of the Department of Homeland Security and covers public administration in the Middle East Africa Southeast Asia the Pacific and Latin America Handbook of Public Policy Evaluation Stuart S. Nagel, 2001-12-13 Handbook of Public Policy Evaluation is the only book of its kind to present aspects of public policy evaluation that relate to economic technology social political international and legal problems Rather than looking at specific narrowly focused programs this book emphasizes broad based evaluation theory study and application providing a rich variety of exceptional insights and ideas Designed to facilitate integration and coherence key features in this volume include Systematic evaluation measuring the policy alternatives available for achieving goals Win win evaluation processing policy alternatives that can enable conservatives liberals and other major viewpoints to all come out ahead of their best initial expectations simultaneously Policy evaluation offering methods examples studies professionalism perspectives concepts trends substance theory applications dispute resolution interdisciplinary interaction and bibliographies and applications The book targets the need for improvement in the methods processes and substance of public policy and opens the gate of public policy to be more effective efficient and equitable Policymakers administrators analysts and practitioners alike will find the Handbook a necessary resource of alternative public policies that are placed in context with a direct course to positive results **Encyclopedia of Public Administration and Public Policy - 5 Volume Set Domonic** A.
