Natural History And The American Mind:

Natural History and the American Mind William Martin Smallwood, Mabel Sarah Coon Smallwood, 1941 *Natural history and the American mind* William M. Smallwood, Mabel S. Smallwood, 1967 **Wilderness and the American Mind** Roderick Frazier Nash, 2014-01-28 DIV Roderick Nash's classic study of changing attitudes toward wilderness during American history as well as the origins of the environmental and conservation movements has received wide acclaim since its initial publication in 1967. The Los Angeles Times listed it among the one hundred most influential books published in the last quarter century. Outside Magazine included it in a survey of books that changed our world and it has been called the Book of Genesis for environmentalists. For the fifth edition Nash has written a new preface and epilogue that brings *Wilderness and the American Mind* into dialogue with contemporary debates about wilderness. Char Miller's foreword provides a twenty-first century perspective on how the environmental movement has changed, including the ways in which contemporary scholars are reimagining the dynamic relationship between the natural world and the built environment. div **The Battle for the American Mind** Carl J. Richard, 2006-08. The Battle for the American Mind brings together religion, politics, economics, science, and literature to present a compelling history of the American people. In this brief and entertaining book, noted historian Carl J. Richard argues that there have been three worldviews that have dominated American thought: theism, humanism, and skepticism. Theists put their faith in God, humanists in man, and skeptics have faith in neither God nor man. Each worldview has had an epoch of domination, leading to the present Age of Confusion where theists, humanists, and skeptics battle one another for control of American hearts and minds. By clearly explaining what Americans believed, exploring why they did so, and showing how that impacted the nation's development, Carl J. Richard presents a unique portrait of the United States past and present. **Natural History Essays (hb)** Henry David Thoreau, 2011-04. Celebrate the tradition of literary naturalists and writers who embrace the natural world as the setting for some of our most euphoric and serious experiences. These books map the intimate connections between the human and the natural world. Literary naturalists transcend political boundaries, social concerns, and historical milieus; they speak for what Henry Beston called the other nations of the planet. Their message acquires more weight and urgency as wild places become increasingly scarce.

American Mythologies William Blazek, Michael K. Glenday, 2005-01-01. This challenging new book looks at the current reinvention of American Studies, a reinvention that among other things has put the whole issue of just what is American and what is American Studies into contention. The collection focuses in particular on American mythology. The editors themselves have written essays that examine the connections between mythologies of the United States and those of either classical European or Native American traditions. William Blazek considers Louise Erdrich's *Love Medicine* novels as chronicles combining Ojibwa mythology and contemporary U.S. culture in ways that reinvest a sense of mythic identity within a multicultural postmodern America. Michael K. Glenday's analysis of Jayne Anne Phillips' work and explores in it the contexts

where myth and dream interact with each other Betty Louise Bell is one of four essayists in this collection who focus their criticism on authors of Native American heritage In the first part of *Indians with Voices* Bell carefully argues that Roy Harvey Pearce's seminal Native American studies text *Savagism and Civilization* fails to acknowledge its white elitist assumptions about what constitutes The American Mind and views Native Americans along a primitive savage binary that helped to create a twentieth century national mythos of innocence and destiny Other essays include Christopher Brookeman's study of the impact of Muhammad Ali on Norman Mailer's non fiction writing about heavyweight boxing

The Mormon Image in the American Mind J.B. Haws, 2013-12 What do Americans think about Mormons and why do they think what they do This is a story where the Olympics the Tabernacle Choir Evangelical Christians the Equal Rights Amendment Sports Illustrated and even Miss America all figure into the equation The book is punctuated by the presidential campaigns of George and Mitt Romney four decades apart A survey of the past half century reveals a growing tension inherent in the public's views of Mormons and the public's views of the religion that inspires that body

Closing of the American Mind Allan Bloom, 2008-06-30 The brilliant controversial bestselling critique of American culture that hits with the approximate force and effect of electroshock therapy The New York Times now featuring a new afterword by Andrew Ferguson in a twenty fifth anniversary edition In 1987 eminent political philosopher Allan Bloom published *The Closing of the American Mind* an appraisal of contemporary America that hits with the approximate force and effect of electroshock therapy The New York Times and has not only been vindicated but has also become more urgent today In clear spirited prose Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis the result of a dangerous narrowing of curiosity and exploration by the university elites Now in this twenty fifth anniversary edition acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom's argument caused such a furor at publication and why our culture so deeply resists its truths today

Media and the American Mind Daniel J. Czitrom, 2010-02-03 In a fascinating and comprehensive intellectual history of modern communication in America Daniel Czitrom examines the continuing contradictions between the progressive possibilities that new communications technologies offer and their use as instruments of domination and exploitation
