Nevin,Stephen B. Johnson,2002-11-22 Zellig Harris had a profound influence in formal systems and applied mathematics in demonstrations of the computability of language and in informatics Volume 2 begins with a commentary by Andr Lentin on Harris s grounding in constructivist intuitionist mathematics drawing a parallel between Harris s central insights and those of G del and others which were of like import in the foundations of mathematics An international array of scholars describe further developments and relate this work to that of others Fernando Pereira argues that Harrisian linguistic information can effect a reunion of linguistics with information theory that has not been considered possible since Chomsky s declaration of irrelevance in 1957 Chapters by Richard Oehrle and by Terence Langendoen develop two novel formal systems with intriguing properties Chapters by Naomi Sager and Ngo Thanh Nhan by Aravind Joshi and by Stephen Johnson describe the history of work on the computability of language and project exciting prospects ahead Karel van den Eynde and colleagues describe use of distributional methods refined beyond those of Harris to develop comprehensive computer dictionaries for several languages The chapter by Beno t Habert and Pierre Zweigenbaum surveys the field of automatic acquisition of information categories and that by Richard Kittredge surveys work on text generation Richard Smaby shows how distributional analysis can even inform design of computer user interfaces **Coordination Theory and Collaboration Technology** Gary M. Olson,Thomas W. Malone,John B. Smith,2013-05-13 The National Science Foundation funded the first Coordination Theory and Collaboration Technology initiative to look at systems that support collaborations in business and elsewhere This book explores the global revolution in human interconnectedness It will discuss the various collaborative workgroups and their use in technology The initiative focuses on processes of coordination and cooperation among autonomous units in human systems in computer and

communication systems and in hybrid organizations of both systems This initiative is motivated by three scientific issues which have been the focus of separate research efforts but which may benefit from collaborative research The first is the effort to discover the principles underlying how people collaborate and coordinate work efficiently and productively in environments characterized by a high degree of decentralized computation and decision making The second is to gain a better fundamental understanding of the structure and outputs of organizations industries and markets which incorporate sophisticated decentralized information and communications technology as an important component of their operations The third is to understand problems of coordination in decentralized or open computer systems **New Directions in Machine Translation** Dan Maxwell, Klaus Schubert, Toon Witkam, 2019-10-08 No detailed description available for New Directions in Machine Translation **Surface Syntax of English** Igor? Aleksandrovi? Mel??uk, Nikola? Viktorovich Pert?s?ov, 1987 This book is the first attempt to describe the syntax of Contemporary English exclusively in terms of dependencies most American works on the subject being in terms of phrase structure or constituency The three main features of it are 1 a fully formal presentation 2 a reasonably complete coverage of English surface syntax and 3 an exposition oriented towards human readers rather than computers The book can be recommended for several categories of readers specialists in English syntax linguists interested in general and theoretical syntax computational linguists researchers in related fields including psychology and artificial intelligence concerned with automatic processing both synthesis and analysis of English texts
