Natural Symbols Explorations In Cosmology:

Natural Symbols Mary Douglas,1996 This classic text represents a work of anthropology in the widest sense exploring themes such as the social meaning of natural symbols and the image of the body in society With a new and highly topical introduction *Natural Symbols* Mary Tew Douglas,1996 *Natural Symbols* Mary Douglas,1978 *Natural Symbols* Mary Douglas,2013-06-17 First printed in 1970 *Natural Symbols* is Douglas most controversial work It represents a work of anthropology in its widest sense exploring themes such as the social meaning of natural symbols and the image of the body in society This work focuses on the ways in which cultures select natural symbols from the body and how every natural symbol carries a social meaning She also introduces her grid group theory which she sees as a way of keeping together what the social sciences divide and separate Bringing anthropology in to the realm of religion Douglas enters into the ongoing debate in religious circles surrounding meaning and ritual The book not only provides a clear explanation to four distinct attitudes to religion but also defends hierarchical forms of religious organization and attempts to retain a balanced judgement between fundamentalism and established religion Douglas has since extensively refined the grid group theory and has applied it to consumer behaviour labour movements and political parties **Natural Symbols** Margaret Mary Tew Douglas,1982

The Cambridge Companion to Durkheim Jeffrey C. Alexander,Philip Smith,2005-05-26 An authoritative and comprehensive collection of essays redefining the relevance of Durkheim to the human sciences in the twenty first century

Imagining the Irish child Jarlath Killeen,2023-02-07 This book examines the ways in which ideas about children childhood and Ireland changed together in Irish Protestant writing of the seventeenth and eighteenth centuries It focuses on different varieties of the child found in the work of a range of Irish Protestant writers theologians philosophers educationalists politicians and parents from the early seventeenth century up to the outbreak of the 1798 Rebellion The book is structured around a detailed examination of six versions of the child the evil child the vulnerable innocent child the political child the believing child the enlightened child and the freakish child It traces these versions across a wide range of genres fiction sermons political pamphlets letters educational treatises histories catechisms and children s bibles showing how concepts of childhood related to debates about Irish nationality politics and history across these two centuries *At the Borders of the Human* Susan Wiseman,ERICA FUDGE,Ruth Gilbert,2016-07-27 What is what was the human This book argues that the making of the human as it is now understood implies a renegotiation of the relationship between the self and the world The development of Renaissance technologies of difference such as mapping colonialism and anatomy paradoxically also illuminated the similarities between human and non human This collection considers the borders between humans and their imagined others animals women native subjects machines It examines border creatures hermaphrodites wildmen and cyborgs and border practices science surveying and pornography *Globalism, Nationalism, Tribalism* Paul James,2006-04-20 Paul James has written a magnificent account of the world s current condition one that highlights the

complexities and contradictions with which people communities and nations must contend and that does so in a compelling and creative style Stressing the interaction between global and local forces his writing style is lively and compelling as well as peppered with a wide range of citations from Woman s Day to the Cambodian Daily on the same page James N Rosenau University Professor of International Affairs The George Washington University Globalism Nationalism Tribalism establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization from genocide and terrorism to television and finance capital Globalism is treated as an uneven and layered process of spatial expansion not simply one of disorder fragmentation or rupture Nor is it simply a force of homogenization Nationalism is taken seriously as a continuing and important formation of contemporary identity and politics James rewrites the modernism theories of the nation state without devolving into the postmodernist assertion that all is invention or surface gloss Tribalism is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life from the villages of Rwanda to the cities of the West Theoretically adept and powerfully argued this is the first comprehensive analysis that brings these crucial themes of contemporary life together

Ritual Catherine Bell, From handshakes and toasts to chant and genuflection ritual pervades our social interactions and religious practices Still few of us could identify all of our daily and festal ritual behaviors much less explain them to an outsider Similarly because of the variety of activities that qualify as ritual and their many contradictory yet in many ways equally legitimate interpretations ritual seems to elude any systematic historical and comparative scrutiny In this book Catherine Bell offers a practical introduction to ritual practice and its study she surveys the most influential theories of religion and ritual the major categories of ritual activity and the key debates that have shaped our understanding of ritualism Bell refuses to nail down ritual with any one definition or understanding Instead her purpose is to reveal how definitions emerge and evolve and to help us become more familiar with the interplay of tradition exigency and self expression that goes into constructing this complex social medium
