Man and the Natural World Keith Thomas, 1991-09-26 Man and the Natural World an encyclopaedic study of man's relationship to animals and plants is completely engrossing It explains everything why we eat what we do why we plant this and not that why we keep pets why we like some animals and not others why we kill the things we kill and love the things we love It is often a funny book and one to read again and again Paul Theroux Sunday Times The English historian Keith Thomas has revealed modes of thought and ways of life deeply strange to us Hilary Mantel New York Review of Books A treasury of unusual historical anecdote a delight to read and a pleasure to own Auberon Waugh Sunday Telegraph A dense and rich work the return to the grass roots of our own environmental convictions is made by the most enchantingly minor paths Ronald Blythe Guardian

Why Knowledge Matters in Curriculum Leesa Wheelahan, 2012 What should we teach in our schools and vocational education and higher education institutions Is theoretical knowledge still important This book argues that providing students with access to knowledge should be the raison d'être of education Its premise is that access to knowledge is an issue of social justice because society uses it to conduct its debates and controversies Theoretical knowledge is increasingly marginalised in curriculum in all sectors of education particularly in competency based training which is the dominant curriculum model in vocational education in many countries This book uses competency based training to explore the negative consequences that arise when knowledge is displaced in curriculum in favour of a focus on workplace relevance The book takes a unique approach by using the sociology of Basil Bernstein and the philosophy of critical realism as complementary modes of theorising to extend and develop social realist arguments about the role of knowledge in curriculum Both approaches are increasingly influential in education and the social sciences and the book will be helpful for those seeking an accessible introduction to these complex subjects Why Knowledge Matters in Curriculum is a key reading for those interested in the sociology of education curriculum studies work based learning vocational education higher education adult and community education tertiary education policy and lifelong learning more broadly

The Play World Patricia Anne Simpson, 2020-09-21 The Play World chronicles the history and evolution of the concept of play as a universal part of childhood Examining texts and toys coming out of Europe between 1631 and 1914 Patricia Anne Simpson argues that German material literary and pedagogical cultures were central to the construction of the modern ideas and realities of play and childhood in the transatlantic world With attention to the details of toy manufacturing and marketing Simpson considers prescriptive texts about how children should play treat their possessions and experience adventure in the scientific exploration of distant geographies She illuminates the role of toys among them a mechanical guillotine yo yos hybridized dolls and circus figures as agents of history Using an interdisciplinary approach that draws from postcolonial childhood and migration studies she makes the case that these texts and toys transfer the world of play into a space in which model childhoods are imagined and enacted as German With chapters on the Protestant play ethic enlightened parenting Goethe as an advocate of play colonial fantasies children's almanacs ethnographic play and an empire of toys Simpson's argument follows a compelling path toward understanding the reproduction of religious gendered ethnic racial national and imperial identities emanating from German speaking Europe that collectively construct a global imaginary This foundational and deeply original study connects German speaking communities across the Atlantic as they collectively engender the

epistemology of the play world It will be of particular interest to German studies scholars whose research crosses the Atlantic
