R. Sorley, 2015-06-15 Excerpt from *The Ethics of Naturalism A Criticism* The chief purpose of this work is to arrive at an exact estimate of the ethical significance of the theory of evolution The form in which this theory has impressed itself upon contemporary thought is mainly due to certain researches in biology but its influence has not been restricted to the biological sciences It has shed new light on psychology and on the sciences of society In this way it has much to say concerning the development of morality This also is within the scope of evolution But at this point it is necessary to consider whether our interpretation of evolution may not have been too exclusively determined by observation of a limited group of facts We must ask whether the factors of biological evolution are adequate to the explanation of moral development A still more important question than this is raised in the application of evolution to ethics About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Christianity and Naturalism* Robert Shafer, 1926
