Cohabitation and the Evolving Nature of Intimate and Family Relationships Sampson Lee Blair, Yongjun Zhang, 2023-12-08 Given the tremendous diversity in cohabiting couples as well as the increasing prominence of this form of intimate relationships this volume provides a more thorough comprehension of the structures effects and intimate practice of cohabitation around the world

Ecopsychology, Phenomenology, and the Environment Douglas A. Vakoch, Fernando Castrillón, 2014-02-17 This book seeks to confront an apparent contradiction that while we are constantly attending to environmental issues we seem to be woefully out of touch with nature The goal of Ecopsychology Phenomenology and the Environment is to foster an enhanced awareness of nature that can lead us to new ways of relating to the environment ultimately yielding more sustainable patterns of living This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches building on the work of phenomenological psychologists such as Maurice Merleau Ponty This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists who have emphasized quantitative research Moreover

Ecopsychology Phenomenology and the Environment is distinctive insofar as chapters by phenomenologically sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology providing a breadth and depth of perspective not found in other works written exclusively by psychologists

Ontology and Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In *Ontology and Closeness in Human Nature Relationships* Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism s new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce s synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an engaging novel treatment of human nature relational ontology that will encourage the reader to look at the world in a whole new way

Touch and Go Judy Borich, 2002 *Embodied Nature and Health* Marcin Fabjański, 2022-06-23 This book describes how as a species our survival and capacity to flourish depends on realizing the intimate relationship of humans with nature through active embodied participation with nature Living within the physicality of the planet is not a limitation rather it is our liberation Full realization of the consequences of this relationship through embodied action can liberate us from ego dependence and transform us into a community of interdependent and flourishing beings Embodied Nature and Health How to Attune to the Open source Intelligence describes a systems analysis of presence centered cultivation of well being through particular ways of being physically and mentally active in relation to nature that aims at helping the individual attune to nature s rhythms The systems analysis proposes the hypothesis of the Open source Intelligence an intelligence which originates from the placement of individual organisms in the tissue and the

process of life This framework draws upon and integrates contemporary research into the human nature relationship and human well being and ancient philosophies that were developed prior to the Cartesian gap between the mind and the body as well as using an auto ethnographic approach dervied from the experience of the author The proposed system highlights a practical approach to well being based on research into human attention and its effective usage in daily life The book outlines a methodology that can be used in schools as a basis of training in sports as well as in the field of self development and highlights the necessity to develop a new non abusive relationship with the natural environment This novel multi discipline first of its kind research book will be of strong interest to experts and academics in the fields of physical activity education ecology and philosophy

Atmospheric Health, Nature, and Well-being Paweł Jędrzejko, Marcin Fabjański, Dariusz Kubok, 2025-04-30 Reimagining the garden as a vital metaphysical framework for understanding the intricate relationships between health well being and the environment the book proposes a holistic ecologically sensitive model that integrates mind body nature and community The text offers the reader a transformative perspective that transcending traditional dualisms embraces the atmospheric sense of deep interconnectedness between individuals communities and the natural world Through a blend of philosophical analysis autoethnographic narratives and cultural reflections the authors proposing a transgressive metaphysical model for personal and communal engagement with the processes of life revise the idea of health as lack of illness redefining it as flourishing Such garden inspired metaphysics promotes a dynamic inclusive understanding of health balancing modern medical approaches with a profound attunement to the rhythms of nature Atmospheric Health Nature and Well being is an ideal resource for scholars students and other professionals in philosophy environmental studies health sciences and cultural studies as well as policymakers urban planners and anyone interested in innovative approaches to health well being and the environment

The Integral Nature of Things Lata Mani, 2020-11-29 The world is an interdependent whole of which everything is an integral complexly related part Yet current ways of thinking and being persistently separate social phenomena and the individual self from the multiple dimensions with which they are interconnected The Integral Nature of Things examines this revealing paradox and its consequences in a variety of sites everyday language labour advertising technology post structuralist theory political rhetoric urban planning sex neoliberal globalisation Mani demonstrates how even though the interrelations between things are obscured by the ruling paradigm the facts of relationality and indivisibility continually assert themselves The book interweaves prose with poetry and sociocultural analysis with observational accounts to offer an alternative framework for addressing aspects of the cognitive cultural political and ethical crisis we face today

The Genesis of Marriage: A Drama Displaying the Nature and Character of God Richard Shenk, 2018-08-01 A theological exploration of Genesis 2 which renews our vision of the purpose of marriage as the central drama within God s salvation plan Marriage seems increasingly irrelevant to many people today But is this a true understanding of marriage Could it be that God may have expectations for marriage which are distinct from our own and

wholly unaffected by our feelings or debates If God is the author and definer of marriage then we must look to the Author to discern its meaning rather than ourselves The Genesis of Marriage sets out a biblical theology of marriage grounded in the Marriage Text of Genesis 2 18 25 and investigates how it fits in its own context of Genesis 1 3 and the whole of Scripture Examining the Marriage Text exegetically and theologically Shenk shows this as the climax and conclusion of the two creation accounts and explores what this reveals about the nature and character of God The doctrinal implications of this are then explored answering such practical questions such as What are the ethics of marriage and How do we approach the real world concerns of separation divorce and remarriage Shenk s exploration helps dispel our modern disillusionment with marriage or at least our ideas and beliefs about marriage which may be at odds with God s to reveal deep truth about the nature and character of God
