Science in Reflection Edna Ullmann-Margalit, 2012-12-06 The Israel Colloquium for the History Philosophy and Sociology of Science presents before you its third volume of proceedings The philosophy section of the volume has three main foci the scientific explanation Hempel and Ben Menachem Elster and Dascal realism in science Cohen and Zemach and its implications for the problem of universals Armstrong and Bar Elli and the question of demarcation the dividing line between science and philosophy KrUger as well as the cognitive limits of science Stent There is no neat separation in this volume between essays on the history of science and those on the sociology of science and perhaps properly so Thus Lenoir s contribution is a clear example of the way the two disciplines combine and interrelate Joseph Ben David s comment on this lecture was among the last things he wrote knowing full well that his days were numbered Reading his contribution imparts a strong sense of loss the loss of a great sociologist and a wise man Not only history however but also historiography is a subject for reflection in this volume Freudenthal and Kerszberg And finally a couple of articles convey the sense of fascination with science as a story Heilbron Hughes We have by now come to expect from the investigations reported in the Israel Colloquium series not surface unity of theme and method but rather an underlying common commitment and zest for the scientific enterprise at its best The third volume hopes to join the first two in footing this bill

Reflection, Science and the Virtues Tony Gibbons, 2009-01-01 The word reflect appears in curriculum documents in texts in proposals and in plans No proposal appears complete without the word To reflect is evidently a good thing but what does it mean It is not just being reasonable Without a grasp of what it means to reflect how is it possible to implement the proposals and plans This book tackles the problem of what it is to reflect In doing so it examines the importance of reflection for a flourishing human being and its place in two major areas of human thought and education science and ethics Science is essentially a reflective activity and the teaching and development of science must acknowledge this The acquisition and practice of the virtues is also essentially a reflective activity as is evident

in both the Aristotelian and the Confucian traditions To be prudent for instance is to be reflective The teaching of science and the learning of the virtues depend upon the development of the capacity to reflect Reflection appears to be an activity that is distinctive of human beings This book will be of interest to teachers and those responsible for the administration and development of education whether it be primary secondary or tertiary It also has something to say to anyone who is responsible for planning for the future And as we all do that it has something to say to all of us Tony Gibbons is an adjunct Senior Lecturer at the University of South Australia After teaching science and mathematics in UK secondary schools he trained teachers at Colleges in the UK before moving to South Australia where he taught Philosophy Having qualified in law he appeared as a barrister in refugee cases both in Australia and overseas during the 1990s before returning to Philosophy in particular virtue ethics

Force and Understanding Howard Caygill, 2020-09-17 For the past thirty years Howard Caygill has been a distinctive and radical voice in continental philosophy For the first time this volume gathers together Caygill's most significant philosophical essays the majority of which are not freely available and many of which are previously unpublished Here a major philosopher is at work offering rich rigorous and politically engaged readings of canonical and lesser known figures and texts From Kant and Frantz Fanon to Herman Kahn founder of the Hudson Institute Caygill uncovers the untapped resources that the history of philosophy provides for contemporary thought whilst critically pushing beyond the limits of the tradition Divided into two parts the first part of the collection reveals the philosophical backdrop to Caygill's acclaimed study of political resistance *On Resistance A Philosophy of Defiance* 2015 whilst the second part sees Caygill further develop his account of resistance through wide ranging analyses of contemporary culture Exploring numerous subjects including Nietzsche metaphysics radical politics and digital resistance to name but a few *Force and Understanding* introduces readers to the orienting themes of Caygill's thought and provides the opportunity to engage with one of the most astute learned and critical philosophical minds around

Kant on Proper Science Hein van den Berg, 2013-10-08 This book provides a novel treatment of Immanuel Kant's views on proper natural science and biology The status of biology in Kant's system of science is often taken to be problematic By analyzing Kant's philosophy of biology in relation to his conception of proper science the present book determines Kant's views on the scientific status of biology Combining a broad *ideengeschichtlich* approach with a detailed historical reconstruction of philosophical and scientific texts the book establishes important interconnections between Kant's philosophy of science his views on biology and his reception of late 18th century biological theories It discusses Kant's views on science and biology as articulated in his published writings and in the *Opus postumum* The book shows that although biology is a non mathematical science and the relation between biology and other natural sciences is not specified Kant did allow for the possibility of providing scientific explanations in biology and assigned biology a specific domain of investigation

Reflection Without Rules D. Wade Hands, 2001-04-09 This book is a comprehensive and often

controversial survey of economic methodology *Cognition Through Understanding* Tyler Burge,2013-03-28 Cognition Through Understanding presents a selection of Tyler Burge s essays that use epistemology to illumine powers of mind The essays focus on epistemic warrants that differ from those warrants commonly discussed in epistemology those for ordinary empirical beliefs and for logical and mathematical beliefs The essays center on four types of cognition warranted through understanding self knowledge interlocution reasoning and reflection Burge argues that by reflecting on warrants for these types of cognition one better understands cognitive powers that are distinctive of persons and on earth of human beings The collection presents three previously unpublished independent essays in addition to substantial retrospective commentary The retrospective commentary invites the reader to make connections that were not fully in mind when the essays were written

Reconsideration of Science and Technology I Liu Dachun,Wang Bolu,Ding Junqiang,Liu Yongmou,2022-09-30 This volume analyzes Karl Marx s understanding of science and technology and how it is associated with his focus on the perspective of history and human practice seeking to illuminate a renewed understanding of science and technology from a Marxist angle As the first volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world the book delves into Marx s analysis of scientific and technological problems and phenomena across five chapters The authors explain the positioning of science and technology and the Marxist theoretical perspective of history and practice from which Marx s views on science and technology derive before an examination of three focal dimensions pertaining to science and technology productivity technological alienation and liberty Not always viewed as central to Marx s works discussions on science and technology are often underdeveloped but a reinterpretation of Marx s thoughts on the issues corroborates the efficacy of Marxism in terms of understanding today s world and especially the development of science and technology The volume will appeal to scholars and students interested in Marxist philosophy the philosophy of science and technology and topics related to scientific culture **Information and Reflection** P.K. Kirschenmann,2012-12-06 The occasion for this work was

provided by the recent Marxist Leninist philosophic publications on problems involving the term information and by the extensive discussions of ideas originating in cybernetics Thus the issues are quite recent which explains some peculiarities of our approach Our main effort has been toward the clarification and systematization of questions on information which arise in the context of cybernetics Where basic questions are involved one is brought back to traditional issues as is often the case when dealing with a novel subject Stress on questions drawn from physics is due to the author's professional involvement in this field This work was written under the direction of Professor J M Bochenski principally in the context of a special program at the Institute of East European Studies of the University of Fribourg Switzerland a program carried out by Professor Bochenski with the collaboration of Dr S Muller Markus Participation in the special program was made possible by a grant from the West German Innenministerium Completion of the work was subsidized by the Bundesinstitut für ostwissenschaftliche und internationale Studien in Cologne Our thanks go to these persons and organisations who are in no way responsible for the content of the work Givisiez May 1967 TRANSLATOR'S NOTE Although we have made use of the works of Cherry and MacKay cited in the bibliography our translation of many terms may still seem somewhat arbitrary to some readers The explanation for this is threefold

Intuition and Reflection in Self-Consciousness Kitaro Nishida, 1987-01-01 Nishida Kitaro's reformulation of the major issues of Western philosophy from a Zen standpoint of absolute nothingness and absolutely contradictory self identity represents the boldest speculative enterprise of modern Japan continued today by his successors in the Kyoto School of philosophy This English translation of Intuition and Reflection in Self Consciousness evokes the movement and flavor of the original clarifies its obscurities and eliminates the repetitions It sheds new light on the philosopher's career revealing a long struggle with such thinkers as Cohen Natorp Husserl Fichte and Bergson that ended with Nishida's break from the basic ontological assumptions of the West Throughout labyrinthine arguments Nishida never loses sight of his theme the irreducibility and unobjectifiability of the act of self consciousness which constitutes the self Extensive annotation is provided for the first time in any edition of Nishida's work Historians of Japanese philosophy and culture and all those interested in the interaction of Eastern and Western thought forms now have a document which highlights many of the cultural psychological and intellectual dynamics that have shaped Japanese intellectual life in one of its most fascinating and ambitious manifestations

Leo Strauss on Science Svetozar Y. Minkov, 2016-11-23 Drawing upon a wealth of previously unpublished archival material Leo Strauss on Science brings to light the thoughts of Leo Strauss on the problem of science Introducing us to Strauss's reflections on the meaning and perplexities of the scientific adventure Svetozar Y Minkov explores questions such as Is there a human wisdom independent of science What is the relation between poetry and mathematics or between self knowledge and theoretical physics And how necessary is it for the human species to exist immutably in order for the classical analysis of human life to be correct In pursuing these questions Minkov aims to change

the conversation about Strauss one of the great thinkers of the past century

Ideas for a Hermeneutic Phenomenology of the Natural Sciences J.J. Kockelmans, 2012-12-06 This book is a methodical and systematic presentation of basic ontological issues that must be raised with respect to the meaning and function of natural science The ontological issues are discussed from a hermeneutic phenomenological point of view In addition the book contains critical discussions of basic themes raised by Carnap Hempel Stegmüller Kuhn Lakatos Hahn Popper van Fraassen Heelan and Kisiel One of the basic theses developed in the book is that logical epistemological and methodological issues pertinent to the natural sciences should be complemented by ontological issues that focus mainly on meaning and truth The book also contains one chapter on the implications of the ontological ideas presented for the history of the natural sciences

Crisis and Reflection J. Dodd, 2006-01-12 In his last work *Crisis of the European Sciences and Transcendental Phenomenology* Edmund Husserl formulated a radical new approach to phenomenological philosophy Unlike his previous works in the *Crisis* Husserl embedded this formulation in an ambitious reflection on the essence and value of the idea of rational thought and culture a reflection that he considered to be an urgent necessity in light of the political social and intellectual crisis of the interwar period In this book James Dodd pursues an interpretation of Husserl's text that emphasizes the importance of the problem of the origin of philosophy as well as advances the thesis that for Husserl the crisis of reason is not a contingent historical event but a permanent feature of a life in reason generally

Hypothesis and the Spiral of Reflection David Weissman, 1989-01-01 This book describes a realist fallibilist alternative when intuitionism and its psychocentric ontology are rejected Weissman proposes an agenda for metaphysical inquiry and also a method for testing metaphysical claims Arguing that science and metaphysics are successive refinements

of the maps and plans used in practical life he affirms that metaphysics is to complete our self understanding by locating us within a world we have not made This book is a sequel to *Intuition and Ideality* which surveys the many versions of intuitionism intuitionism as it prescribes that reality be identified with mind itself or with the things set before our inspecting mind
