Nature Course Notes From The Coll Ge De France:

Nature Maurice Merleau-Ponty, 2003 Collected in this text are the written notes of courses on the concept of nature given by Merleau Ponty at the College de France in the 1950s The ideas that animated the philosopher s lectures emerge in an early fluid form in the process of being elaborated negotiated critiqued and reconsidered

Nature Maurice Merleau-Ponty, 2003 Collected here are the written traces of courses on the concept of nature given by Maurice Merleau Ponty at the Coll ge de France in the 1950s notes that provide a window on the thinking of one of the most influential philosophers of the twentieth century In two courses distilled by a student and in a third composed of Merleau Ponty s own notes the ideas that animated the philosopher s lectures and that informed his later publications emerge in an early fluid form in the process of being elaborated negotiated critiqued and reconsidered Merleau Ponty s project in these courses is an interrogation of nature a task at the center of his investigation of perception truth and subjectivity The first course a survey of the historical elements in our concept of nature examines first the Cartesian concept of nature and then historical and contemporary responses to Descartes all with an eye toward developing a vision of nature more consistent with the findings of contemporary science In the second course Merleau Ponty takes up the problem of the relation of nature to ontology in general Here the key question is how the animal finds itself in its world Because the human body is ultimately an animal of movements and perceptions humanity is intertwined with animality In the third course *Nature and Logos The Human Body* Merleau Ponty assesses his previous findings and examines the emergence of the human body at the intersection of nature and Logos This course contemporaneous with the working notes for *The Visible and the Invisible* allows us to observe the evolution of that work as well as to revisit the research he had begun in *Primacy of Perception* In these traces a new reading of Descartes a measured appreciation of Schelling an assessment of recent developments in the sciences both physical and biological that leads to the notion of the body as a system of equivalencies and an examination of the phenomenon of life We have a wealth of material that allows us to reconsider Merleau Ponty s thinking and to engage his philosophical project anew Before his death in 1961 Maurice Merleau Ponty was chair in philosophy at the Coll ge de France Robert Vallier is completing his doctoral work on Merleau Ponty and Schelling at DePaul University He has also taught at the Universite de Paris X Nanterre and at the College Internationale de Philosophie

Merleau-Ponty and Theology Christopher Ben Simpson, 2013-12-19 The philosophical contributions of French phenomenologist Maurice Merleau Ponty carry great untapped potential for theologians thinking through some of the central affirmations of the Christian faith This exploration is structured against the background of the fundamental interrelation between three bodies in Merleau Ponty s thought and in Christian theology the material as such or nature the corporeal the human body as a living body the corporal and the social body the corporate including language and tradition Merleau Ponty s philosophy offers a finessed and non reductionistic understanding of the relations between these orders of bodies Appropriating Merleau Ponty s thought helps one think

through Christian doctrines of creation theological anthropology Christology ecclesiology and eschatology

Merleau-Ponty's Poetic of the World Galen A. Johnson, Mauro Carbone, Emmanuel de Saint Aubert, 2020-08-04

Merleau Ponty has long been known as one of the most important philosophers of aesthetics yet most discussions of his aesthetics focus on visual art This book corrects that balance by turning to Merleau Ponty s extensive engagement with literature From Proust Merleau Ponty developed his conception of sensible ideas from Claudel his conjoining of birth and knowledge as co naissance from Val ry came implex or the animal of words and the chiasma of two destinies Literature also provokes the questions of expression metaphor and truth and the meaning of a Merleau Pontian poetics The poetic of Merleau Ponty is the book argues a poetic of the flesh a poetic of mystery and a poetic of the visible in its relation to the invisible Ultimately theoretical figures or figuratives that appear at the threshold between philosophy and literature enable the possibility of a new ontology What is at stake is the very meaning of philosophy itself and its mode of expression

Creative Evolution Henri Bergson, 2022-12-01 First published in French in 1907 Henri Bergson s *Lvolution cr atrice* is a scintillating and radical work by one of the great French philosophers of the nineteenth and twentieth centuries This outstanding new translation the first for over a hundred years brings one of Bergson s most important and ambitious works to a new generation of readers A sympathetic though critical reader of Darwin Bergson argues in *Creative Evolution* against a mechanistic reductionist view of evolution For Bergson all life emerges from a creative shared impulse which he famously terms *lan vital* and which passes like a current through different organisms and generations over time Whilst this impulse remains as forms of life diverge and multiply human life is characterized by a distinctive form of consciousness or intellect Yet as Bergson brilliantly shows the intellect s fragmentary and action oriented nature which he likens to the cinematograph means it alone cannot grasp nature s creativity and invention over time A major task of *Creative Evolution* is to reconcile these two elements For Bergson the answer famously lies in intuition which brings instinct and intellect together and takes us into the very interior of life A work of great rigour and imaginative richness that contributed to Bergson winning the Nobel Prize for Literature in 1927 *Creative Evolution* played an important and controversial role in the trajectory of twentieth century philosophy and continues to create significant discussion and debate The philosopher and psychologist William James who admired Bergson s work was writing an introduction to the first English translation of the book before his death in 1910 This new translation includes a foreword by Elizabeth Grosz and a helpful translator s introduction by Donald Landes Also translated for the first time are additional notes articles reviews and letters on the reception of *Creative Evolution* in biology mathematics and theology This edition includes fascinating commentaries by philosophers Maurice Merleau Ponty Georges Canguilhem and Gilles Deleuze

Christopher Lapierre Leonard Lawlor Isabelle Letellier Catherine Malabou Rita Messori Ron Morstyn Eugène Nicole Jean Philippe Pierron Gleisson Roberto Schmidt Critique of Pure Nature Simona Stano, 2023-11-27 This book challenges the Western contemporary praise for Nature From food to body practices from ecological discourses to the Covid 19 pandemic contemporary imaginaries abound with representations of an ideal pure Nature essentially defined according to a logic of denial of any artificial modified manipulated in short cultural aspect How should we contextualise and understand such an opposition especially in light of the rich semantic scope of the term nature and its variability over time And how can we if we actually can envisage alternative models and approaches capable of better accounting for such richness and variability The author addresses these fundamental issues combining an initial theoretical problematisation of the concept of nature and its evolution from classical philosophy to the crucial changes occurred through the Middle Ages the Renaissance Romanticism and the modern era finally considering recent insights in philosophy sociology cultural anthropology and semiotics with the analysis of its discursivisation from the iconography of Mother Nature between the past and the present to the representation of catastrophic events in fictional and non fictional texts from clean eating and other popular food trends to the ambivalence of the naked body between its supposed natural ascription and its multiple cultural characterisations Thus she introduces a critique of pure Nature providing a systematic study of the way nature is attributed meaning and value in some of today's most relevant discourses and practices and finally tracing a possible path towards an internatural turn

Proust, the One, and the Many Erika Fulop, 2017-12-02 One of the many aspects that make Marcel Proust's *A la recherche du temps perdu* such a complex and subtle work is its engagement with metaphysical questions The disparate nature of the narrators' experiences hypotheses and statements has generated a number of conflicting interpretations based on parallels with the thought of one or another philosopher from Plato to Leibniz Spinoza Schopenhauer Nietzsche Bergson or Deleuze Through the analysis of the narrators' two seemingly incompatible perceptions of the world which reveal reality to be either one or infinitely multiple Erika Fulop proposes a reading of the novel that reconciles the opposites Rather than being undecided or self contradictory the narrative thematizes the insufficiency of the dualist perspective and invites the reader to take a step beyond it Erika Fulop is an independent researcher whose doctoral thesis completed at the University of Aberdeen is at the basis of this monograph **The Political Logic of Experience** Neal DeRoo, 2022-06-07 The Political Logic of Experience argues that experience and phenomenology are essentially political with profound implications for our understanding of subjectivity epistemology experience the phenomenological method and politics Drawing on work from across the phenomenological tradition it develops an account of expression as the internal relationship uniting knowing being and doing with both transcendental conditions and empirical phenomena This expressive unification generates subjectivity as an expression of particular communities and subjects as an expression of subjectivity Subjectivity and experience are therefore both revealed to be inherently political prior to their expression in particular subjects In clarifying the political

nature of experience and the constitution of subjectivity the book puts the work of critical phenomenology in dialogue with transcendental phenomenology to reveal the need for a phenomenological politics a field tasked with explaining the expressive co constitutive and necessarily political relationships between subjects and their communities It is only through such a phenomenological politics that we can properly make sense of the epistemological ontological and practical significance of issues like racism and sexism problems that concern our very experience of the world The book reveals phenomenology to be both essentially political and politically essential as it emerges within particular communities and shapes and transforms how individuals within those communities experience the world Touching on issues of transcendental phenomenology political strategy historical interpretation and inter disciplinary phenomenological method the book argues for foundational claims pertaining to phenomenology politics and social criticism that will be of interest to those working in philosophy gender studies race queer theory transcendental and applied phenomenology and beyond *Canguilhem* Stuart Elden, 2019-07-12 Georges Canguilhem 1904 95 was an influential historian and philosopher of science as renowned for his teaching as for his writings He is best known for his book *The Normal and the Pathological* originally his doctoral thesis in medicine but he also wrote a thesis in philosophy on the concept of the reflex supervised by Gaston Bachelard He was the sponsor of Michel Foucault's doctoral thesis on madness However his work extends far beyond what is suggested by his association with these thinkers Canguilhem also produced a series of important works on the natural sciences including studies of evolution psychology vitalism and mechanism experimentation monstrosity and disease Stuart Elden discusses the whole of this important thinker's complex work including recently rediscovered texts and archival materials Canguilhem always approached questions historically examining how it was that we came to a significant moment in time outlining tensions detours and paths not taken The first comprehensive study in English this book is a crucial guide for those coming to terms with Canguilhem's important contributions and will appeal to researchers and students from a range of fields
