## Nature Of Argument:

**The Nature of Argument** Karel Lambert, William Ulrich, 1980      **A dissertation on the Book of Job, its nature, argument, age and author . ... To which are added, four sermons preached at St. Mary's Church in Cambridge and at White-Hall** John GARNETT (successively Bishop of Leighlin and Ferns and of Clogher.), 1751      Dialectics and the Macrostructure of Arguments James B. Freeman, 1991 No detailed description available for Dialectics and the Macrostructure of Arguments      Consciousness and Its Place in Nature Galen Strawson, Anthony Freeman, 2024-05-07

Panpsychism is the philosophical view that consciousness mentality or mindedness in some form is fundamental in the universe The idea has existed for centuries but only recently has it had a serious resurgence Galen Strawson has been on the front line of the battlefield on the topic of panpsychism since the 1990s His paper on realistic monism contained in this volume and originally published in 2006 is now considered something of a classic and a catalyst for panpsychism s recent revival This long overdue new edition of the book gives the original commentators where they feel they have something more to add an opportunity to update their thinking on the topic of panpsychism in general and Strawson s realistic monism in particular Seven new postscripts are included which aim to enhance the original collection and push the discussion onwards Eighteen years have passed since the first edition of this groundbreaking volume and Strawson remains a distinctive and important voice in the field the new edition is a must read for all who are interested in consciousness studies      **The Anthropocene** Peter D. Burdon, 2023-05-24 This book introduces the concept of the Anthropocene and examines its importance for environmental legal thinking research and practice Two main arguments are explored The first is that much of the scholarship in environmental law that addresses the Anthropocene does not respond to Earth systems science or the difference in scale as we move from local to global systems Key examples include a focus on anthropocentrism attempts to constitutionalise environmental protections the prevalence of legal rights and the idea of ecological integrity The second argument is that these points of focus derive from the prevalence of idealism in environmental legal scholarship Idealism in this context does not refer to naivety or the presentation of unrealistic goals Rather this book is concerned with idealism as a philosophical commitment to the power of ideas to determine reality and drive future change As expressed in legal scholarship this book also argues that idealism involves an abstraction from material reality and a refusal to directly engage those forces that have given rise to the Anthropocene In response this book uses a method of critique to uncover the presumptions and presuppositions that underlie environmental scholarship As a counter to idealism it also sketches out a framework for materialism in the Anthropocene This book s engagement with these questions will appeal to undergraduate and postgraduate students in law politics philosophy or the ecological humanities It will also be of interest to academics in these disciplines and libraries around the world      Wilderness Science in a Time of Change Conference ,2000 Vol 2 Thirty eight papers related to the theme of wilderness in the context of larger systems are included Three overview papers

synthesize existing knowledge and research about wilderness economics relationships between wilderness and surrounding social communities and relationships between wilderness and surrounding ecological communities and processes Other papers deal with wilderness meanings and debates wilderness within larger ecosystems and social economic and policy issues vol 3 Thirty six papers related to the theme of wilderness as a place to conduct science are included Five overview papers synthesize knowledge and research about basic work in the biophysical and social sciences that has been conducted in wilderness Other papers present the results of focused basic research in wilderness with one set of papers devoted to the conduct and management of science in wilderness
