Navajo Architecture Stephen C. Jett, Virginia E. Spencer, 1981-01-01 Navajo Architecture Stephen C. Jett, Virginia E. Spencer, 1981 Complete explication of hogan and house forms root forms summer structures and more make this possibly the most complete study ever made of the folk architecture of a tribal society to date **Diné** Peter Iverson, 2002-08-28 This comprehensive narrative traces the history of the Navajos from their origins to the beginning of the twenty first century Based on extensive archival research traditional accounts interviews historic and contemporary photographs and firsthand observation it provides a detailed up to date portrait of the Din past and present that will be essential for scholars students and interested general readers both Navajo and non Navajo As Iverson points out Navajo identity is rooted in the land bordered by the four sacred mountains At the same time the Navajos have always incorporated new elements new peoples and new ways of doing things The author explains how the Din remember past promises recall past sacrifices and continue to build upon past achievements to construct and sustain North America s largest native community Provided is a concise and provocative analysis of Navajo origins and their relations with the Spanish with other Indian communities and with the first Anglo Americans in the Southwest Following an insightful account of the traumatic Long Walk era and of key developments following the return from exile at Fort Sumner the author considers the major themes and events of the twentieth century including political leadership livestock reduction the Code Talkers schools health care government economic development the arts and athletics Monty Roessel Navajo an outstanding photographer is Executive Director of the Rough Rock Community School He has written and provided photographs for award winning books for young people The Diné Hogan Lillian Makeda, 2024-06-28 Over the course of their history the Navajo Din have constructed many types of architecture but during the 20th century one building emerged to become a powerful and inspiring symbol of tribal culture This book describes the rise of the octagonal stacked log hogan as the most important architectural form among the Din The Navajo Nation is the largest Indian reservation in the United States and encompasses territory from within Arizona New Mexico and Utah where thousands of Native American homes called hogans dot the landscape Almost all of these buildings are octagonal Whether built from plywood nailed onto a wood frame or with other kinds of timber construction octagonal hogans derive from the stacked log hogan a form which came to prominence around the middle of the last century The stacked log hogan has also influenced public architecture and virtually every Din community on the reservation has a school senior center office building or community center that intentionally evokes it Although the octagon recurs as a theme across the Navajo reservation the inventiveness of vernacular builders and professional architects alike has produced a wide range of octagonally inspired architecture Previous publications about Navajo material culture have emphasized weaving and metalwork overlooking the importance of the tribe s built environment But populated by an array of octagonal public buildings and by the hogan one of the few Indigenous dwellings still in use during the 21st century the Navajo Nation

maintains a deep connection with tradition This book describes how the hogan has remained at the center of Din society and become the basis for the most distinctive Native American landscape in the United States The Din Hogan A Modern History will appeal to scholarly and educated readers interested in Native American history and American architecture It is also well suited to a broad selection of college courses in American studies cultural geography Native American art and Native American architecture *Proceedings RMRS.* ,1998 **A New Deal for Native Art** Jennifer McLerran,2022-08-16 As the Great Depression touched every corner of America the New Deal promoted indigenous arts and crafts as a means of bootstrapping Native American peoples But New Deal administrators romanticization of indigenous artists predisposed them to favor pre industrial forms rather than art that responded to contemporary markets In A New Deal for Native Art Jennifer McLerran reveals how positioning the native artist as a pre modern Other served the goals of New Deal programs and how this sometimes worked at cross purposes with promoting native self sufficiency She describes federal policies of the 1930s and early 1940s that sought to generate an upscale market for Native American arts and crafts And by unraveling the complex ways in which commodification was negotiated and the roles that producers consumers and New Deal administrators played in that process she sheds new light on native art s commodity status and the artist s position as colonial subject In this first book to address the ways in which New Deal Indian policy specifically advanced commodification and colonization McLerran reviews its multi pronged effort to improve the market for Indian art through the Indian Arts and Crafts Board arts and crafts cooperatives murals museum exhibits and Civilian Conservation Corps projects Presenting nationwide case studies that demonstrate transcultural dynamics of production and reception she argues for viewing Indian art as a commodity as part of the national economy and as part of national political trends and reform efforts McLerran marks the contributions of key individuals from John Collier and Rene d Harmoncourt to Navajo artist Gerald Nailor whose mural in the Navajo Nation Council House conveyed distinctly different messages to outsiders and tribal members Featuring dozens of illustrations A New Deal for Native Art offers a new look at the complexities of folk art revivals as it opens a new window on the Indian New Deal Architecture of First Societies Mark M. Jarzombek,2014-05-27 ARCHITECTURE OF FIRST SOCIETIES THIS LANDMARK STUDY TRACES THE BEGINNINGS OF ARCHITECTURE BY LOOKING AT THE LATEST ARCHAEOLOGICAL AND ANTHROPOLOGICAL RESEARCH From the dawn of human society through early civilizations to pre Columbian American societies Architecture of First Societies traces the different cultural formations that developed in various places throughout the world to form the built environment It is the first book to explore the beginnings of architecture from a global perspective Viewing ancient cultures through a lens of both time and geography this history of early architecture brings its subjects to life with full color photographs maps and drawings The author cites the latest discoveries and analyses in archaeology and anthropology and discovers links to the past by examining how indigenous societies build today Encounters with Modernity sections examine some of the political issues that village life and its

architectural traditions face in the modern world This fascinating and engaging tour of our architectural past Fills a gap in architectural education concerning early mankind the emergence of First Society people and the rise of early agricultural societies Presents the story of early architecture written by the coauthor of the acclaimed A Global History of Architecture Uses the most current research to develop a global picture of human interaction and migration Features color and black and white photos and drawings that show site conditions as well as huts houses and other buildings under construction in cultures that still exist today Highlights global relationships with color maps Analyzes topics ranging in scale from landscape and culture to building techniques Helps us come to terms with our own modern approaches to historical conditions and anthropological pasts Architecture of First Societies is ideal reading for anyone who seeks a deeper understanding of the strong relationships between geography ecology culture and architecture

Handbook of Material Culture Christopher Y.
