Naval Architecture for Marine Engineers Richard Pemberton, E A Stokoe, 2018-10-18 This textbook covers the theoretical fundamental aspects of naval architecture for students preparing for the Class 2 and Class 1 Marine Engineer Officer exams. It introduces the basic foundation themes within naval architecture: hydrostatics, stability, resistance, and powering, using worked examples to show how solutions should be presented for an exam. The topics are ordered in a manner of a typical taught module to aid the use of the book by lecturers as a compliment to a course. Importantly, this updated edition contains updated text and figures in line with modern practice, including an update of many of the figures to three dimensional diagrams and a new section on computer software for naval architecture. The book also includes sample examination questions with worked examples and answers to aid students in their learning.
