Peter C. Smith

Naval Wings Royal Naval Carrier Borne Aircraft Since 1916:

Naval Wings Adrian Vicary, 1984-01-01 Beretter om den historiske udvikling af den britiske flådes flystyrker og beskriver kort de anvendte fly og helikoptertyper fra perioden 1916-1984 Torpedo Bombers Peter C. Smith, 2008-03-27 This is a highly illustrated history of one of the most deadly types of attack aircraft. The torpedo bomber first appeared during the later years of World War One but served their most useful role in the Second World War. The most famous attacks include Taranto where Fairey Swordfish destroyed the Italian Battle fleet and the infamous surprise attack on Pearl Harbor by the Japanese. In both these cases the attacks were against ships lying in harbor and therefore stationary. Heavy defensive anti-aircraft fire was the greatest danger to the torpedo bombers in those circumstances but ships under way in the open sea had far more room to take evasive action. The lengthy time it took a torpedo to reach its target allowed many ships to escape destruction. However, notable exceptions were the sinking of HMS Prince of Wales and HMS Repulse by the Japanese during the early stages of the war in the Far East. During the hunt for the Bismarck it was an air-launched torpedo from a Swordfish that severely damaged the ship's steering gear and enabled the Royal Navy to close in for the final kill. Some of the types included are the Fairey Swordfish, Bristol Beaufort, Fairey Albacore, Bristol Beaufighter, Heinkel He 115, Marchetti SM 79, Fokker T VIII, Grumman Avenger and the Nakajima B5N Aircraft of the Royal Navy David Hobbs, 2024-11-30 This is a comprehensive study of every aircraft type ordered for the Royal Navy since 1908. It includes fixed and rotary wing aircraft, rigid and non-rigid airships, unmanned aircraft and pilotless target aircraft together with many designs that were ordered but not built so that the importance placed on them by the Naval Staff or their potential technological impact on carrier design and operations can be explained. Every type, even unsuccessful single prototypes, is described; the majority are illustrated by photographs, many of which come from the author's own collection, and the fifty most significant aircraft have detailed drawings. The Australian and Canadian Fleet Air Arms operated RN aircraft types for many years after their formation and these are included together with other types they have operated subsequently to give a more complete overview. The book describes over 400 different types of aircraft built by over 100 different manufacturers to offer the most detailed coverage of RN aircraft ever produced. Research for the book took over forty years and reference material included Admiralty Archives and an array of material in the public domain including manufacturers' data, individual aircraft pilot's notes and a wealth of published sources. David Hobbs is uniquely well placed to write this book, having served in the RN for thirty-three years and retired with the rank of Commander. He flew both fixed and rotary wing aircraft and his log book contains 2300 flying hours with 807 day and night deck landings. He served in seven British aircraft carriers and spent four years within RN Director General Aircraft Department where he was closely involved with Sea Harrier carrier trials and introduced new visual landing aids for night recoveries and liaised with the USN on carrier operating techniques. This is his eleventh book for Seaforth Publishing *The Royal Navy in World War Two* Derek G. Law, 1988 *The Royal Navy Since 1815* Eric Grove, 2017-03-11

This book fills an important gap in the literature on the history of the modern Royal Navy Eric Grove provides the only up to date single authored short history of the service over the last two hundred years synthesizing the new work and latest research on the subject which has radically transformed our understanding of the story of British naval development Grove offers a concise and authoritative account of Royal Navy policy structure technical development and operations from the end of the Napoleonic Wars to the close of the eventful twentieth century Ideal for both specialist and general readers this essential introduction explains how the Royal Navy maintained its pre eminent position in the nineteenth century and how it coped with the more difficult problems of the twentieth in times of peace and war **Historia Scientiarum** ,2003 *The Royal Navy in World War II* Derek G. Law,2003 The Royal Navy in World War II is a comprehensive annotated bibliography of all monographs describing the role of British Dominion and minor allied forces in the naval war against the Axis This second edition contains 1 400 more entries than its predecessor and although mainly concerned with the Royal Navy it does offer extensive coverage on the Dominion Navies of Australia Canada India and South Africa as well as the minor allied navies of the occupied European countries Coverage of the US Navy s involvement in the Atlantic and Caribbean Theaters is also included A wonderful reference for historians librarians and navy buffs **The Royal Navy's Air Service in the Great War** David Hobbs,2017-09-30 In a few short years after 1914 the Royal Navy practically invented naval air warfare not only producing the first effective aircraft carriers but also pioneering most of the techniques and tactics that made naval air power a reality By 1918 the RN was so far ahead of other navies that a US Navy observer sent to study the British use of aircraft at sea concluded that any discussion of the subject must first consider their methods Indeed by the time the war ended the RN was training for a carrier borne attack by torpedo bombers on the German fleet in its bases over two decades before the first successful employment of this tactic against the Italians at Taranto Following two previously well received histories of British naval aviation David Hobbs here turns his attention to the operational and technical achievements of the Royal Naval Air Service both at sea and ashore from 1914 to 1918 Detailed explanations of operations the technology that underpinned them and the people who carried them out bring into sharp focus a revolutionary period of development that changed naval warfare forever Controversially the RNAS was subsumed into the newly created Royal Air Force in 1918 so as the centenary of its extinction approaches this book is a timely reminder of its true significance **World War II at Sea** Myron J. Smith,1990-02 **RAOP** ,1985
