Navigating Through Adolescence European Perspectives:

Navigating Through Adolescence Jari-Erik Nurmi, 2001 This anthology examines Love's Labours Lost from a variety of perspectives and through a wide range of materials. Selections discuss the play in terms of historical context, dating and sources, character analysis, comic elements and verbal conceits, evidence of authorship, performance analysis and feminist interpretations. Alongside theater reviews, production photographs and critical commentary, the volume also includes essays written by practicing theater artists who have worked on the play. An index by name, literary work and concept rounds out this valuable resource.

Navigating Through Adolescence Jari-Erik Nurmi, 2001 First published in 2001, Routledge is an imprint of Taylor & Francis, an informa company.

The Oxford Handbook of Emerging Adulthood Jeffrey Jensen Arnett, 2016 The Oxford Handbook of Emerging Adulthood is the first and only comprehensive compilation spanning the field of emerging adulthood.

The Transition to Adulthood and Family Relations Eugenia Scabini, Elena Marta, Margherita Lanz, 2007-03-12 This book explores the development of a new path of transition between adolescence and adulthood in recent generations. Whereas traditionally the transition into adulthood was marked by a clear and irreversible change in condition, we are now seeing a continuance in the role and influence of the family on the young adult. What consequences does this have for our society? Is the persistence of emotional bonds, which previously loosened during adolescence, inhibiting young people from developing into full adulthood? The authors present a clear and in-depth analysis of the theoretical framework surrounding the transition into adulthood, both from a generational point of view and a relationship-centred perspective. The findings of international research are presented and compared across generations, gender and geographical location within Europe. The different research methods of family-related research and family research are also distinguished and analysed. This volume offers an original and multi-faceted review of this topic. The family is considered as an organization and the interdependencies and interconnections between its members, the generations and genders investigated. It offers a unique contribution to the current literature and will appeal to an international audience of researchers, policy makers and educators, both in academic and professional spheres.

The Networked Young Citizen Brian D. Loader, Ariadne Vromen, Michael Xenos, 2014-06-05

The future engagement of young citizens from a wide range of socio-economic, ethnic and cultural backgrounds in democratic politics remains a crucial concern for academics, policy makers, civics teachers and youth workers around the world. At a time when the negative relationship between socio-economic inequality and levels of political participation is compounded by high youth unemployment or precarious employment in many countries, it is not surprising that new social media communications may be seen as a means to re-engage young citizens. This edited collection explores the influence of social media such as YouTube, Facebook and Twitter upon the participatory culture of young citizens. This collection, comprising contributions from a number of leading international scholars in this field, examines such themes as the possible effects of social media use upon patterns of political socialization, the potential of social media to ameliorate young

people's political inequality the role of social media communications for enhancing the civic education curriculum and evidence for social media manifesting new forms of political engagement and participation by young citizens These issues are considered from a number of theoretical and methodological approaches but all attempt to move beyond simplistic notions of young people as an undifferentiated category of the internet generation Motivating Every Learner Alan
