Nobel Lectures In Economic Sciences 1969-1980:

Economic Sciences, 1969-1980 Assar Lindbeck, 1992 Below is a list of the prizewinners during the period 1969-1980 with a description of the works which won them their prizes: 1969 R. FRISCH 1970 P. SAMUELSON for the scientific work through which he has developed static and dynamic economic theory and actively contributed to raising the level of analysis in economic science 1971 S. KUZNETS for his empirically founded interpretation of economic growth which has led to new and deepened insight into the economic and social structure and process of development 1972 J. R. HICKS 1973 W. LEONTIEF for the development of the input-output method and for its application to important economic problems 1974 G. MYRDAL 1975 L. KANTOROVICH 1976 M. FRIEDMAN for his achievements in the fields of consumption analysis, monetary history and theory and for his demonstration of the complexity of stabilization policy 1977 B. OHLIN 1978 H. A. SIMON for his pioneering research into the decision-making process within economic organizations 1979 T. W. SCHULTZ 1980 L. R. KLEIN for the creation of econometric models and their application to the analysis of economic fluctuations and economic policies

Nobel Lectures in Economic Sciences Assar Lindbeck, 1992 **The Palgrave Companion to Harvard Economics** Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics. With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists, these two volumes show how economics became established at the University, how it produced some of the world's best-known economists including Joseph Schumpeter, Wassily Leontief and John Kenneth Galbraith, and how it remains a global force for the very best in teaching and research in economics. With original contributions from a stellar cast, the volumes provide economists, especially those interested in macroeconomics and the history of economic thought, with an in-depth analysis of Harvard economics.

Sustainable Energy Pricing Gary M. Zatzman, 2012-02-07 This is the first book to address the issues of affordable power, sustainable energy, and reduced environmental impact through the science of energy pricing. Looking at the availability of natural resources from an engineering perspective and determining how they can be priced to achieve sustainability in the energy sector is the aim of this groundbreaking new work. Most current models used in energy pricing are based on linear analyses. While these models work well for targeted scenarios within a short time frame, they do not provide one with a scientific tool that can include many facets of the information age. The existing models do not include environmental sustainability in an integrated fashion. This is mainly because environmental costs are still considered to be intangible and intractable with conventional economic analysis tools. Though one existing model acknowledges some possible theoretical truth to concerns expressed about the onset of peak oil, the period in which new oil production must begin a decline of unknown and indefinite duration, this model has little or nothing to say about continuing practices in the extraction and production of fossil fuel that are themselves based on denying any significance or role for such thinking in the immediate future. A serious limitation of that discourse is its insistence on polarizing opinions for or against environmental

sustainability peak oil and affordable energy prices This book proceeds instead to isolate the absence of any agreed criteria for what would constitute inherently sustainable development and examines the main outlines of the history and political economy of energy resource exploration and development since the 1850s from this standpoint It proposes specific directions in which to take some of the leading alternatives and amendments to current energy pricing practices as well as some of the most promising energy development alternatives in order to fulfill the time criteria required for an inherently sustainable trend The author shows how and why identifying unsustainable practices and consequences can make a case for closing down particular oil and gas production operations while averting the time wasting approach of trying to fix what really has gone beyond fixing However it is possible necessary and actually far better to replace these methods with newer scientifically based methods for achieving overall energy sustainability

John Hicks K. Puttaswamaiah, 2018-01-16 Economist Sir John Hicks was the first British economist to win the Nobel Prize in Economic Science 1972 for his wide ranging contributions in general and his book *Value and Capital* in particular *Value and Capital* showed that the basic results of consumer theory could be obtained from statistical usage it expounded what became known as the Hicksian substitution effect K Puttaswamaiah describes Hicks as a brilliant economist without whose effort present day economies would not have grown in such dimension by now and *Value and Capital* as a work that revolutionized the science of economics John Hicks is a unique collection of essays that examine Hicks through personal recollections as well as critiques and analyses of his work For this very special volume K Puttaswamaiah has gathered 25 contributors Some were friends colleagues and students of Hicks All are eminent in their own areas of Hicks work Their articles depict various aspects of the economist's thought and personality some depicting him in a new light My John Hicks by Paul A Samuelson identifies the landmarks in Hicks life Colin Simkin's John and Ursula Hicks A Personal Recollection gives a vivid account of the economist's inner life O F Hamouda's essay Hicks A World Economist presents a scholarly and comprehensive analysis of Hicks economics In Hicks and Economic Theory Frank Kahn sets out his own views on the major works of Hicks Harald Hagerman distinguishes between the works of Hicks and Hayek in Monetary Causes of the Business Cycles and Technological Changes Hicks vs Hayek Axel Leijonhufvud presents a memorial on the life and works of Hicks The other authors have chosen different areas of Hicks works sometimes focusing on a single work and giving a vivid account of their own thoughts on the area chosen This volume will interest economists and students who are concerned with Hicks works in relation to earlier thinkers and present day economic theory K Puttaswamaiah is the senior director Planning Department Government of Karnataka State India He has written or edited fourteen books He is the founding editor of the Indian now International Journal of Applied Economics Econometrics *The Programming Approach and the Demise of Economics* Franco Archibugi, 2019-11-21 This trilogy deals with an epistemology of economics arguing for a radical overturning of conventional analysis and providing an alternative to political economy and social sciences based not on positivism but on a normative and programming paradigm Volume III furthers and concludes

work presented in Volume I and Volume II and introduces a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch's plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences. The PAF is an instrument of the programming approach that can be used to verify the compatibility of decisions and their effects. The author builds on Frisch's classical PAF to maximise the phenomenology of economic systems and assure a consistent and effective implementation of decision making.
