Treating the Diseases of the 21st Century: Moving from Traditional to Scientific Research Ana Sanches Silva, Shivraj Hariram Nile, Neha Garg, 2024-03-27 Nutraceuticals are foods or food constituents that provide medical or health benefits including the prevention and/or treatment of a disease. Nutraceuticals have advantage over conventional medicines because they can avoid side effects and can take the place of a natural dietary supplement among other benefits. Nutraceuticals are typically grouped on the basis of their natural source or chemical grouping or categorized into nutrients, herbals, dietary supplements, dietary fiber and so forth. Within the nutraceutical industry, the most rapid growth has been in natural herbal products and dietary supplements, the latter of which are regulated by the Food and Drug Administration (FDA) to ensure their safety. Herbal nutraceuticals are used as powerful instruments in maintaining health and to act against nutritionally induced acute and chronic diseases, thereby promoting optimal health, longevity and quality of life. **Patrimoine culturel et tourisme alternatif (Europe - Afrique - Caraïbe - Amériques)** BRETON Jean-Marie (sous la direction de), 2009-08-01 Cet ouvrage part du double constat des impacts socio-économiques du tourisme sur les composantes patrimoniales de l'environnement et en sens inverse de l'attrait déterminant des ressources d'un patrimoine culturel valorisé sur la demande et l'offre touristiques. Cette relation dialectique a des conséquences sur les effets de l'activité touristique en termes de croissance et de développement des territoires dans les pays industrialisés comme dans ceux des pays du Sud. Un tourisme durable assis

sur une gestion appropriée des ressources du patrimoine culturel en particulier constitue cet aspect un facteur puissant de durabilité et de viabilité. L'analyse relève des sciences tant exactes et naturelles qu'humaines.
