Nonmilitary Aspects Of Security A Systems Approach:

Nonmilitary Aspects of Security Dietrich Fischer, United Nations Institute for Disarmament Research, 2011

Environmental Security Narottam Gaan, 2004 The work is an authentic and comprehensive one on environmental security Some important topics discussed are Environmental security a theoretical quest politics of environment security and problems of widening environmental scarcity of resources global climate change etc Useful for environmentalists researchers

Nonmilitary Aspects of Security Dietrich Fischer, 1993 Current agreements and negotiations on disarmament have clearly economic implications Their effect and their perception remain inadequately known and uncertain Based on the analysis of the actual disarmament process this book questions a number of sacred cows frequently encountered in international fora and thinking on economic aspects of disarmament The long debated link between disarmament and development for example is critically examined Similarly the very idea that disarmament would yield automatic returns the famous peace dividend is called into question At the same time conversion also has its cost For the purpose of the research which led to this publication United Nations Institute for Disarmament Research UNIDIR with the co operation of International Defence Economics Association IDEA assembled a group of well known economists diplomats and researchers

National Security : Emerging Dimensions and Threats Navniti Gandhi, 2010 There is a visible change in the outlook towards security all over the world probably because of the increasing complexity of global problems and their repercussions for millions of people all over the world Insecurity is not just all pervasive but is reiterating its alarming overtones more forcefully than during the cold war era There are now threats very different from a military attack on a nation's territory The concept of National Security hence needs to be redefined The gamut of its perceptions has undergone a paradigm shift The context against which the policy makers seek to establish national security is undergoing tumultuous changes While not downplaying the relevance of strategic means of maintaining national security this book explores the emerging non strategic threats to national security with the obvious grave consequences on human security This book attempts to address several questions Can the concepts of National Security and Human Security be reconciled meaningfully Can their approaches and objectives be intertwined so that we can live a fuller life Can the nations and citizenry both feel equally secure at the same time

Maritime Security of India Dr. Suresh R, 2014-02-01 This book focuses on various aspects of maritime security of India Starting with the changing dimensions of national security it addresses the issues such as non traditional threats to security the threat posed by non state actors the causes of insecurity and also the imperatives of tackling the human security challenges The need for a comprehensive change in India's security policy is well exposed and certain policy prescriptions are also given The oceans are generally meant for better inaction among nations especially in the era of accelerated pace of globalization With regard to the coastal security of India the role of coastal community is significant The needs for inculcating awareness among the coastal community on coastal security matters as well as infrastructure development along

the coastal area are also emphasized It is very important to look into the basic problems of coastal people as they face many human security challenges When we look into the coastal security a convergence of the national security concerns and human security concerns is visible The overall development of the coastal area would lead to better human security and better human security would result in enlisting the support of the coastal community to ensure national security programme especially the coastal security In short coastal security is not only about protecting the coastal terrain and territorial waters from direct attacks by the state actors or non state actors but also safeguarding the interests of all stake holders India's National Security Dilemma Rajpal Budania,2001 *Peace and Conflict Studies* Ho-Won Jeong,2017-07-05 Ho Won Jeong explains and assesses major approaches to dealing with ethnic conflict communal violence inter state war and social injustice The book analyses not only the sources of violence and conflict but also how to manage and prevent them As peace is relevant to improvement in human well being and the future survival of humanity the volume encompasses a variety of themes ranging from alternative security policies methods of peaceful settlement human rights self determination environmental politics global governance and non violence Reflecting on the current thinking and drawing lessons from the past the book can be considered as the most authoritative introduction to the field since the end of the Cold War

Relevance of Environment Narottam Gaan,2005 This book attempts at cosmic whole approach challenging the established international relation theories based upon a Newtonian and Cartesian world view from an ecological perspective The realist liberal critical and post modern theories have been critically examined in their materialist premises with much of the inputs from the ecological insight eastern philosophy and the new paradigm thinking in the field of science

Experiments with Peace: Desmond Tutu,2011-02 Impatient provocative and prolific in his pursuit of peace through research publishing and commentary the influential Johan Galtung turned 80 on October 24 2010 without the slightest sign of slowing down This collection of essays celebrates peace in honor of this milestone The wide range of essays explores issues including the eradication of violence conflict transformation resistance to taxation for the military global terrorism and global hegemony nonviolent revolutions learning from nature sport and conflict transformation diplomacy the financial crisis prejudice towards schizophrenia Obama s Nobel Peace Prize speech peace journalism and moving from violent to peace oriented masculinities Also included are commentaries on Galtung s own work and local studies on Colombia Nepal and Thailand Human Security and International Law Barbara von Tigerstrom,2007-12-12 The concept of human security has influenced discourse and practice and has been the subject of vigorous debate Despite its relevance to central questions of international law human security has until recently received little attention from international lawyers This book has two related goals to evaluate human security as a concept that could be used in the analysis of international law and to determine what insights about a human security approach might be gained by considering it from the perspective of international law The first part of the book examines the evolution and meanings of the concept and its links with existing theories and

principles of international law The second part explores the ways in which human security has been and could be used in relation to the diverse topics of humanitarian intervention internally displaced persons small arms control and global public health The analysis sheds new light on debates about the concept s potential and limitations Environmental Change and Security Project Report ,1998 **Handbook of Peace and Conflict Studies** Charles Webel,Johan Galtung,2007-03-12 This major new Handbook provides a cutting edge and transdisciplinary overview of the main issues debates state of the art methods and key concepts in peace and conflict studies today The Handbook of Peace and Conflict Studies will be essential reading for students of peace studies conflict studies and conflict resolution It will also be of interest and use to practitioners in conflict resolution and NGOs as well as policy makers and diplomats *Non Military Threats to Security in South Asia* ,1996 **The Future of the United Nations System** Chadwick F. Alger,1998 What does the future hold for the UN In this book twenty two scholars from all continents contribute twelve chapters that cover prevention of violence creating economic and social structures that sustain human fulfilment sharing and protecting the commons and peace education The search for future potential based on experience in these twelve laboratories leads to sixty six recommendations for new institutions and programs on issues that include controlling weapons humanitarian intervention collaboration between UN peacekeepers and NGOs human rights economic policies advancement of women refugees ecological security communications and peace education These recommendations are brought together in a concluding chapter and summarized in the appendix Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies Instead their implementation would require creative efforts of Member States secretariats NGOs and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life This is stimultaing reading for anyone who wants to be challenged to think creatively about the potential for coping with a growing array of global problems **India-United States Cooperation on Global Security** Committee on India-United States Cooperation on Global Security: Technical Aspects of Civilian Nuclear Materials Security,National Academy of Sciences,National Institute for Advanced Studies, Bangalore, India,2013-10-14 The U S government has made safeguarding of weapons grade plutonium and highly enriched uranium an international policy priority and convened The 2010 Nuclear Security Summit in Washington D C on April 12 and 13 2010 Forty six governments sent delegations to the summit and twenty nine of them made national commitments to support nuclear security During the Summit India announced its commitment to establish a Global Centre for Nuclear Energy Partnership The Centre is to be open to international participation through academic0 exchanges training and research and development efforts India United States Cooperation on Global Security is the summary of a workshop held by the U S National Academy of Sciences NAS together with its partner of more than 15 years the National Institute for Advanced Studies NIAS in Bangalore India The workshop identified and examined potential areas for substantive scientific and technical cooperation between the two

countries on issues related to nuclear material security Technical experts from India and the United States focused on topics of nuclear material security and promising opportunities for India and the United States to learn from each other and cooperate This report discusses nuclear materials management issues such as nuclear materials accounting cyber security physical security and nuclear forensics

More than a Curriculum Johan Galtung, S. P. Udayakumar, 2013-02-01 Exploring the field of peace education the bulk of the book analyzes and critically evaluates contemporary schools and universities Providing some successful and not so successful alternative school and university projects and experiments the book proposes peace and development education as a life process and presents a whole array of non conventional tools and approaches The unique feature of the book is that instead of putting emphasis on teaching peace and development it insists on being and becoming what we teach It makes a great textbook for education courses and programs and a good handbook for peace educators and peace researchers around the world The authors of the book are two teachers who are not attached to any regular educational institution anywhere in the world and are qualified to say what they have said in the book The two authors have played significant instrumental roles in promoting peace studies

Non-Traditional Security in Asia Ralf Emmers, 2017-03-02 The security issues confronting Asia are both complex and diverse Given the increasing trend towards an expanding security agenda beyond the military dimension of inter state relations this volume provides an extensive study of emerging non traditional challenges to this region New realities and new challenges have come to the fore including environmental degradation illegal immigration infectious diseases transnational crime poverty and underdevelopment Drawing upon the concepts of securitization and de securitization this book brings together regional perspectives from across Asia to examine how these challenges are perceived and managed It is a valuable contribution to both security and Asian studies and will be ideally suited to those interested in security studies international relations and development studies

International Security Bilal Karabulut, 2024-04-01 International Security Threats Theories and Transformation maps out security studies the subdiscipline of discipline of International Relations IR which has strong topics and dynamic structure but this and almost everything in the globalization process is changing or transforming rapidly This situation also affects the field of IR and security studies New concepts are entering literature traditional thought patterns are not enough to understand and make sense of the IR discipline In addition to traditional security issues such as terrorism and war new security areas emerging with the process of globalization are also comprehensively analyzed in this book These include energy security cyber security environmental security health security economic security food security demographic security and irregular migration

Maritime Security and the Law of the Sea Natalie Klein, 2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea The discussion sets out the rules regulating passage of

military vessels and military activities at sea law enforcement activities across the different maritime zones information sharing and intelligence gathering as well as armed conflict and naval warfare In doing so this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism weapons of mass destruction piracy drug trafficking environmental damage and illegal fishing While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed

Economics of Peace and Security James K. Galbraith, Jurgén Brauer, Lucy Law Webster, 2009-08-27 Economics of Peace and Security is a component of Encyclopedia of Development and Economic Sciences EOLSS which is an integrated compendium of twenty one Encyclopedias The theme explores the history of economic thought on war and peace the defense budget process patterns in military expenditure procurement issues the increasing globalization of the arms trade arms race issues global and regional security alliances nuclear biological and chemical weaponry the still much needed peace dividend the economics of peace agreements issues of conversion of resources from military to civilian ends peacekeeping the building of peacekeeping institutions and other topics All this is a sampler plate of what economics has to offer This volume is aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs
