Nonprofit Sector In France

Laura Nirello, Lionel Prouteau

Nonprofit Sector In France:

The Nonprofit Sector in France E. Archambault, 1997 This is the first book to reveal the extent to which nonprofit organisations despite their invisibility in official statistics have become one of the clearest expression of social and cultural change in France Edith Archambault argues that the nonprofit organisations have a unique ability to marry private initiative with public concerns and therefore become the most flexible partners of modern social policies

The French Nonprofit Sector Laura Nirello, Lionel Prouteau, 2018-08-20 This article deals with the literature on the French nonprofit sector NPS A preliminary part is devoted to presenting and discussing the characteristics that shape the approaches to this sector in France We stress the strong influence of legal categories on the sector's definition and in this context the importance of the status inherited from the 1901 Act on contracts of association This raises a problem for a more analytical approach to the sector because the diversity of the nonprofit organizations NPOs regulated under this Act risks being overshadowed In this first part we also underline the primacy accorded in France to the concept of the social economy which has today become the social and solidarity economy SSE over that of the nonprofit sector In the second part the article outlines some landmarks in the history of the French NPS French NPOs were for many years objects of suspicion arbitrariness and repression on the part of the public authorities and this persisted until the 1901 legislation on contracts of association was enacted However this hostile context did not prevent the sector from having a richer existence than is sometimes admitted This literature review also focuses on empirical studies of the sector placing a particular emphasis on the more recent ones These French studies basically adopt two types of approach The first is concerned essentially with the NPOs and focuses its attention on their economic importance whether measured in terms of financial resources employment or less frequently added value The second approach investigates the kinds of individual participation the sector engenders by examining the various forms it takes such as membership of NPOs or voluntary work This review ends with the analysis of the challenges that NPS faces in a context characterized by the increasing constraints on public funding changes in the nature of such funding with a substitution of contracts for subsidies an increased competition among NPOs as well as between NPOs and for profit enterprises The article concludes that despite the advances in research on the French NPS some aspects like formal volunteering and the role of voluntary associations are still understudied while others like informal groups and informal volunteering are almost totally ignored
