Noon, 22nd Century Arkadii Natanovich Strugatskiy, Boris Natanovich Strugatskiy, Patrick L. McGuire, 1979 *The Second Marxian Invasion* Stephen W. Potts, 1991-01-01 Stephen W Potts presents Arkady and Boris Strugatsky in terms of their dual contributions to the SF genre and to modern Russian literature placing their work in both its historical and literary context

Aliens George Edgar Slusser, 1987 How and when does there come to be an anthropology of the alien This set of essays written for the eighth J Lloyd Eaton Conference on Fantasy and Science Fiction is concerned with the significance of that question Anthropology is the science that must designate the alien if it is to redefine a place for itself in the universe according to the Introduction The idea of the alien is not new In the Renaissance Montaigne's purpose in describing an alien encounter was excoriation man kind was the savage because the artificial devices of nature controlled him Shakespeare's version of the alien encounter was in corporation his character of Caliban is brought to the artificial political world of man and incorporated into the body politic The essays in this volume show in their general orientation that the tribe of Shakespeare still in literary studies at least outnumbers that of Montaigne These essays show the interrelation of the excorporating possibilities to the internal soundings of the alien encounter within the human mind and form This book is divided into three parts Searchings The Quest for the Alien includes The Aliens in Our Mind by Larry Niven Effing the Ineffable by Gregory Benford Border Patrols by Michael Beehler Alien Aliens by Pascal Ducommun and Metamorphoses of the Dragon by George E Slusser Sightings The Aliens among Us includes Discriminating among Friends by John Huntington Sex Superman Sociobiology by Joseph D Miller Cowboys and Telepaths by Eric S Rabkin Robots by Noel Perrin Aliens in the Supermarket by George R Guffey and Aliens R U S by Zoe Sofia Soundings Man as the Alien includes H G Wells Familiar Aliens by John R Reed Inspiration and Possession by Clayton Koelb Cybernauts in Cyberspace by David Porush The Human Alien by Leighton Brett Cooke From Astarte to Barbie by Frank McConnell and An Indication of Monsters by Colin Greenland

Lingua Cosmica Dale Knickerbocker, 2018-05-04 Anthologies awards journals and works in translation have sprung up to reflect science fiction's increasingly international scope Yet scholars and students alike face a problem Where does one begin to explore global SF in the absence of an established canon Lingua Cosmica opens the door to some of the creators in the vanguard of international science fiction Eleven experts offer innovative English language scholarship on figures ranging from Cuban pioneer Da na Chaviano to Nigerian filmmaker Olatunde Osunsanmi to the Hugo Award winning Chinese writer Liu Cixin These essays invite readers to ponder the themes

formal elements and unique cultural characteristics within the works of these irreplaceable if too little known artists Dale Knickerbocker includes fantasists and genre benders pushing SF along new evolutionary paths even as they draw on the traditions of their own literary cultures Includes essays on Da na Chaviano Cuba Jacek Dukaj Poland Jean Claude Dunyac France Andreas Eschbach Germany Ang lica Gorodischer Argentina Sakyo Komatsu Japan Liu Cixin China Laurent McAllister Yves Meynard and Jean Louis Trudel Francophone Canada Olatunde Osunsanmi Nigeria Johanna Sinisalo Finland and Arkady and Boris Strugatsky Russia Contributors Alexis Brooks de Vita Pawel Frelik Yvonne Howell Yolanda Molina Gavil n Vibeke R tzou Petersen Amy J Ransom Hanna Riikka Roine Hanna Samola Mingwei Song Tatsumi Takayuki Juan Carlos Toledano Redondo and Natacha Vas Deyres Reference Guide to Russian Literature Neil Cornwell,2013-12-02 First Published in 1998 This volume will surely be regarded as the standard guide to Russian literature for some considerable time to come It is therefore confidently recommended for addition to reference libraries be they academic or public Science Fiction George Slusser,2022-01-04 In what N Katherine Hayles describes as this enormously ambitious posthumous volume renowned scholar George Slusser offers a definitive version of the argument about the history of science fiction that he developed throughout his career that several important ideas and texts routinely overlooked in other critical studies made significant contributions to the creation of modern science fiction as it developed into a truly global literature He explores how key thinkers like Ren Descartes Benjamin Constant Thomas DeQuincey Guy du Maupassant J D Bernal and Ralph Waldo Emerson influenced and are reflected in twentieth century science fiction stories from the United States Great Britain France Germany Poland and Russia The conclusion begins with Slusser s overview of global science fiction in the twenty first century and discusses recent developments in countries like China Romania and Israel Hayles s foreword provides a useful summation of the book s contents while science fiction writer Gregory Benford contributes an afterword providing a personal perspective on the life and thoughts of his longtime friend The book was edited by Slusser s former colleague Gary Westfahl a distinguished scholar in his own right *Space Forces* Fred Scharmen,2021-11-02 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have imagined going to live in space What they want to do once they get up there whether conquering the unknown establishing space colonies privatising the moon s resources reveals more than expected In this fascinating radical history of space exploration Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space but these visions have real implications for life back on earth For the Russian Cosmists of the 1890s space was a place to pursue human perfection away from the Earth For others such as Wernher Von Braun it was an engineering task that combined in the Space Race the Cold War and during World War II with destructive geopolitics Arthur C Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction Meanwhile NASA planned and managed the space station like an earthbound corporation Today the market has arrived into outer space and exploration is the plaything of superrich technology billionaires who plan to privatise

the mineral wealth for themselves Are other worlds really possible Bringing these figures and ideas together reveals a completely different story of our relationship with outer space as well as the dangers of our current direction of extractive capitalism and colonisation

Science Fiction and the Two Cultures Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by Gernsback's ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners

Technologies for Intuition Alaina Lemon, 2018 Cold War paranoia can only partly describe or explain the 20th century dreams of telepathy The nightmare shades of mind control and crowd frenzy have long alternated with the pastels of love and collective effervescence Both extremes materialized over time along tangled circuits of wars events and interactions staged across borders since at least the 19th century The Cold War and its fences fed fascination with the workings and the failures of contact and communication Opposed sides accused each other of jamming media and spinning propaganda even while they mirrored fantasies of connection This book contrasts and connects Russian and American channels and means to check channels with special attention to intersections of the telepathic with the theatrical It theorizes links between historically layered struggles over technologies for intuition and dominant models of communication commonsense or theoretical It demonstrates that theories resting on models of individual sincerity and of dyadic communication warp understandings of the USSR and Russia and thus of the USA as well It proposes that attention to the means of making and checking contact that is to the phatic functions in language offers a way out of the impasses and paradoxes of paranoia Provided by publisher
