Norfolk and Norwich Clocks and Clockmakers Clifford Bird, Yvonne Bird, 1996-01-01 *The Automaton in English Renaissance Literature* Wendy Beth Hyman, 2016-03-23 *The Automaton in English Renaissance Literature* features original essays exploring the automaton from animated statue to anthropomorphized machine in the poetry prose and drama of England in the 16th and 17th centuries Addressing the history and significance of the living machine in early modern literature the collection places literary automata of the period within their larger aesthetic historical philosophical and scientific contexts While no single theory or perspective conscribes the volume taken as a whole the collection helps correct an assumption that frequently emerges from a post Enlightenment perspective that these animated beings are by definition exemplars of the new science or that they point necessarily to man's triumphant relationship to technology On the contrary automata in the sixteenth and seventeenth centuries seem only partly and sporadically to function as embodiments of an emerging mechanistic or materialist worldview Renaissance automata were just as likely not to confirm for viewers a hypothesis about the man machine Instead these essays show automata were often a source of wonder suggestive of magic proof of the uncannily animating effect of poetry indeed just as likely to unsettle the divide between man and divinity as that between man and matter

Brass Dial Clocks Brian Loomes, 1998 This important new title discusses the origins style and development of domestic brass dial clocks made between the early seventeenth and the end of the eighteenth centuries The book provides a detailed examination of eight day and thirty hour clocks with hundreds of illustrated examples of longcase bracket lantern derivatives hook and spike and hooded clocks It examines the development and distribution of each with a complete re examination of prototype thirty hour clockwork and the work of clocksmiths with a detailed discussion on the recognition of styles of the various regions countries Some of these aspects are discussed here for the first time This new title will have a wide appeal as the author assumes no prior knowledge of the subject from his reader and concerns himself exclusively with a discussion of accessible clocks not the rare museum pieces so often featured in other horological publications He concentrates mainly on regional types but also includes a very small number of London clocks in order that comparisons may be made and uses examples from all over Britain including Scotland and Ireland and many from America
