1. Teilband Sylvain Auroux, E.F.K. Koerner, Hans-Josef Niederehe, Kees Versteegh, 2008-07-14 No detailed description available for HIST LANGUAGE SCIENCES KOERNER 1 TLBD HSK 18 1 E BOOK **The History of Linguistics in the Low Countries** Jan Noordegraaf, Kees Versteegh, E.F.K. Koerner, 1992-11-05 The importance of the Low Countries as a centre for the study of foreign languages is well known The mutual relationship between the Dutch grammatical tradition and the Western European context has however been largely neglected In this collection of papers on the history of linguistics in the Low Countries the editors have made an effort to present the Dutch tradition in connection with that of the neighbouring countries Three articles by Claes Dibbets and Klifman deal with the earliest stages of the development of a grammar for the Dutch vernacular Several important European figures worked in the Low Countries their contribution to linguistics is discussed in articles on Vossius Rademaker Spinoza Klijnsmit and one of the most original phoneticians of European linguistics Montanus Hulsker Vivian Salmon s article is a survey on the relations between English and Dutch linguistics in the field of foreign language teaching In the 19th century Dutch linguistics had a special relationship with German general and historical linguistics four articles deal with this period Jongeneelen van Driel le Loux Schuringa Noordegraaf Finally there are three articles by Kaldewij Hagen and van Els Knops on the development of three branches of linguistics in the 20th century structuralism dialectology and applied linguistics This volume should be of interest for all specialists in the history of linguistics in Europe who are interested in the interdependence of the various traditions **Norms and Usage in Language History, 1600-1900** Gijsbert Rutten, Rik Vosters, Wim Vandenbussche, 2014-11-18 Historical sociolinguistics has successfully challenged the traditional focus on standardization in linguistic historiography Extensive research on newly uncovered textual resources has shown the widespread variation in the written language of the past that was previously hidden or neglected The time has come to integrate both perspectives and to reassess the importance of language norms standardization and prescription on the basis of sound empirical studies of large corpora of texts The chapters in this volume discuss the interplay of language norms and language use in the history of Dutch English French and German between 1600 and 1900 Written by leading experts in the field each chapter focuses on one language and one century A substantial introductory chapter puts the twelve research chapters into a comparative perspective The book is of interest to a wide readership ranging from scholars of historical linguistics sociolinguistics sociology and social history to advanced graduate and postgraduate students in courses on language variation and change History and Historiography of Linguistics Hans-Josef Niederehe, E. F. K. Koerner, 1990 These two volume present papers from the Fourth International Conference on the History of the Language Sciences ICHoLS IV held at the University of Trier Germany in August 1987 Volume 1 contains the following sections I Generalia II Antiquity III Arabic Linguistics IV Middle Ages V Renaissance VI 17th Century Volume 2

continues with VII 18th Century VIII 19th Century IX 20th Century and provides Author and Subject Indexes **The Practice of Philology in the Nineteenth-Century Netherlands** Ton Kalmthout, Huib Zuidervaat, 2025-10-01 The Netherlands have a long and important tradition in scholarly philology For instance in the early days of Leiden University philology or the critical examination of classical texts was regarded as a cutting edge science This field of scholarship had far reaching implications on disciplines such as theology chronology astronomy history law and other demarcated bodies of knowledge identified as a separate science Regardless of the exact field of inquiry philologists as protectors and teachers of the written heritage always played a pivotal role in the formation of the cultural repertoire of the educated public As men of learning and high esteem philologists also exerted influence outside the cultural sphere especially in politics and religion The ever changing composition of the philological frame of reference made no difference in this respect But in the nineteenth century the practice of philology was passing a crucial phase of change In both its object of study and in its methods several fundamental modifications occurred Texts in the vernacular and national philologies attracted more and more attention of the public and neo philology succeeded in taking over the central position traditionally occupied by classical philology Subfields such as linguistics edition technique and history grew into new more or less independent sub disciplines whereas scientific methods such as stemmatology and comparative approaches were introduced in the humanities This redesigned the landscape of philology radically New boundaries became apparent and existing ones were questioned or drawn sharper At the time philology underwent an accelerated process of differentiation and professionalization Philology demarcated its own more or less independent sphere with a specific authority The establishment of a branch of national philology can be regarded as an example of discipline formation in the humanities This fascinating process of change and the search for new boundaries in Dutch philology is highlighted in this book **The Practice of Philology in the Netherlands in the Nineteenth Century** the first book on this topic in the English language **The auxiliary do in eighteenth-century English** Ingrid Tieken-Boon van Ostade, 2016-11-21 No detailed description available for The auxiliary do in eighteenth century English

The Emergence of the Modern Language Sciences Sheila Embleton, John E. Joseph, Hans-Josef Niederehe, 1999-10-15 Although it is widely thought that structural linguistics began abruptly with the publication of Saussure's revolutionary Course in General Linguistics the work of E F K Koerner has demonstrated that Saussure for all his originality remained true to the basic tenets of his 19th century predecessors In this volume the development of modern linguistics before during and after Saussure is traced in 20 studies honouring the scholar who has done more than anyone else to professionalize linguistic historiography during the last quarter century Among the wide range of topics covered are grammar and philosophy in the age of comparativism the relation of Saussure's anagram studies to his theory of the linguistic sign nationalist overtones in German linguistics from 1914 to 1945 and the true story with newly discovered documentation of why Chomsky's Logical Structure of Linguistic Theory didn't get published during the 1950s or 60s In addition to an introductory overview of

Koerner's career and a complete listing of his publications the volume includes previously unpublished materials from Saussure's notebooks **Geschichte Der Sprachwissenschaften** Sylvain Auroux, 2000 **Geschiedenis van de Nederlandse syntaxis** Joop van der Horst, Jan van der Horst, 2008 *Language, Literature and the Construction of a Dutch National Identity (1780-1830)* Rick Honings, Ton Kalmthout, Gijsbert Rutten, 2025-10-01 In exploring the birth of a Dutch identity between 1780 and 1830 this book integrates nationalism studies with literary and linguistic history by highlighting scholarly study of the Dutch language as a factor in the creation of the national identity These early scholars promoted the Dutch language during a time of political upheaval when citizens needed something to feel proud of This book examines the impact individual agents had on a crucial stage in the Dutch nation building process
