Meta-Ethics and Normative Ethics H. J. McCloskey, 2013-11-21 The purpose of this work is to develop a general theory of ethics which explains the logical status of moral judgments and the nature of the general principles which we should adopt and on the basis of which we should act The enquiry into the logical function of moral judgments is entered into as important in its own right and as a preliminary to the normative enquiry for it is on the basis of our conclusions in the area of meta ethics that we determine the appropriate method of reaching our normative ethic The approach followed in the meta ethical enquiry is that of examining theories of the past and present with a view to seeing why and in what respects they fall in particular what features of moral discourse are not adequately explained or accommodated by them A positive theory which seeks to take full account of these and another logical features of moral discourse is then developed in terms of a modified intuitionism of the kind outlined by W D Ross good being explained as the name of a consequential property right in terms of moral suitability and moral obligations as consisting in our being constrained to act in certain ways by facts we apprehend to constitute moral reasons which constrain us so to act
