The Northern Earldoms Barbara E. Crawford, 2013-08-08 The medieval earldoms of Orkney and Caithness were positioned between two worlds the Norwegian and the Scottish They were a maritime lordship divided or united by the turbulent waters of the Pentland Firth This unlikely combination of island and mainland territory survived as a single lordship for 600 years against the odds Growing out of the Viking maelstrom of the early Middle Ages it became an established and wealthy principality which dominated northern waters with a renowned dynasty of earls Despite their peripheral location these earls were fully in touch with the kingdoms of Norway and Scotland and increasingly subject to the rulers of these kingdoms How they maintained their independence and how they survived the clash of loyalties are themes explored in this book from the early Viking age to the late medieval era when the powerful feudal Sinclair earls ruled the islands and regained possession of Caithness This is a story of the time when the Northern Isles of Scotland were part of a different national entity which explains the background to the non Gaelic culture of this locality when links across the North Sea were as important as links with the kingdom of Scotland to the south

DEcolonial Heritage Aníbal Arregui, Gesa Mackenthun, Stephanie Wodianka, 2018 The volume attempts to triangulate three vibrant discourses of our times It combines postcolonial and decolonial readings of cultural conflicts with assessments of ecological dimensions of those conflicts as well as their significance within discourses on natural and cultural world heritage The examples from four continents range from the medieval Middle East already shaken by a convergence of ecological and social disaster to modern imaginary constructions of medieval Vikings the persistence of Indigenous knowledge in the Arctic literary poetics of patrimony and the heritage politics of Mediterranean urban architecture Authors ask which strategies societies in developing countries use to defend their cultural and ecological uniqueness and integrity while being penetrated by environmental hazards and hegemonizing Western forms of heritage culture or how western societies construct their own past in ways that are sometimes reminiscent of traditional imaginations of a pre modern past petrified eternally in an ideal moment of time

Colonial and historical forms of heritagization of human and non human environments the essays show answer to pressing emotional needs for a sense of stability But the desire for nostalgia frequently commodified tends to collide with the similarly pressing need for political and economic survival in a rapidly changing world and in the face of accelerating extraction practices Without being able to solve this dilemma the volume makes an interdisciplinary contribution to taking intellectual stake of the asymmetrical politics and poetics of heritage and collective cultural memory *Migration* ,1993 **The Vikings in Poland** Leszek Gardela,2024-09-26 This pioneering work offers a meticulous exploration of Scandinavian presence in Viking Age Poland Unveiling the complexities and controversies of past research and delving into the nuances of reciprocal interactions between Western Slavic and Scandinavian populations as revealed through archaeology and medieval texts the book casts genuinely new light on a previously overlooked part of the Viking world In setting the stage for these investigations the monograph traces the evolution of Viking and Old Norse studies in Poland It covers the romanticisation of Norse culture and literature the dark days of the Second World War when archaeology was strongly driven by violent ideologies and the profound changes that occurred in academia after the fall of communism and Poland's accession to the European Union At the core of this book are thorough investigations into cross cultural interactions along the shores of the southern Baltic as well as in the interior of Poland Using first hand analyses of archaeological evidence from bustling ports of trade settlement sites silver hoards and burial grounds it is argued that the relationship between the local Western Slavic population and the Scandinavian migrants was highly complex but overall very symmetrical Crucial notions such as the construction of identity in diasporic communities ritual behaviour and the symbolic content of Viking Age material culture are also discussed at length offering new insights into Scandinavian and Slavic minds Enriched with high quality illustrations photographs as well as artistic reconstructions this book fills many blank spaces in the field of Viking studies and is intended both for professional audiences and general readers interested in the intricacies of our shared past **Vikings Across Boundaries** Hanne Lovise Aannestad,Unn Pedersen,Marianne Moen,Elise Naumann,Heidi Lund Berg,2020-10-26 This volume explores the changes that occurred during the Viking Age as Scandinavian societies fell in line with the larger forces that dominated the Insular world and Continental Europe absorbing the powerful symbiosis of Christianity and monarchy adapting to the idea of royal lineage and supremacy and developing a buzzing urbanism coupled with large scale trade networks Presenting research on the grand context of the Viking Age alongside localised studies it contributes to the furthering of collaborations between local and outsider research on the Viking Age Through a diversity of approaches on the Viking homelands and the wider world of the Vikings it offers studies of a range of phenomena including urban and rural settlements continuity in the use of places as well as new types of places specific to the Viking Age the social significance of change the construction and maintenance of social identity both within the homelands and across large territories ethnicity and ideas of identity and the creation and recreation of identity both at home and abroad As such it will appeal to historians
