Life and Death in Latin American Cities Christien Klaufus, 2025-10-21 The infrastructure of death is an undeniable part of urban life yet it is often overlooked in the study of cities This book explores the intricate dynamics between the living and the dead in six Latin American cities Bogotá Medellín Lima Buenos Aires Quetzaltenango and Cuenca Drawing on more than a decade of ethnographic research the author investigates how urban death infrastructures such as cemeteries and spaces for the deceased are shaped by rapid urbanization legacies of violence neoliberal policies and alternative spiritual practices With a fresh Global South perspective this unique contribution will challenge the boundaries of death studies placing the infrastructure of death at the heart of urban life *The Colonial Spanish-American City* Jay

Kinsbruner, 2005-05-01 The colonial Spanish American city like its counterpart across the Atlantic was an outgrowth of commercial enterprise A center of entrepreneurial activity and wealth it drew people seeking a better life with more educational occupational commercial bureaucratic and marital possibilities than were available in the rural regions of the Spanish colonies Indeed the Spanish American city represented hope and opportunity although not for everyone In this authoritative work Jay Kinsbruner draws on many sources to offer the first history and interpretation in English of the colonial Spanish American city After an overview of pre Columbian cities he devotes chapters to many important aspects of the colonial city including its governance and administrative structure physical form economy and social and family life Kinsbruner's overarching thesis is that the Spanish American city evolved as a circumstance of trans Atlantic capitalism Underpinning this thesis is his view that there were no plebeians in the colonial city He calls for a class interpretation with an emphasis on the lower middle class His study also explores the active roles of women many of them heads of households in the colonial Spanish American city *Wallless Cities* Shen Hou, 2024-10-21 This book aims to outline the detailed process of integrating nature and cities in a historical context through the lens of urban environmental history capturing how the most ordinary yet enduring natural forces have shaped the form of cities and the thoughts of individuals It provides a detailed examination of the development trends achievements and existing issues in this field and a profound understanding of the urgency and necessity of nurturing new ideas to guide cities out of their ecological paradox It also summarizes the formation and development challenges and missions of American cities centered around the core image of the City Without Walls **American Cities & Technology** Gerrylynn K. Roberts, Philip Steadman, 1999 Looks at the social history of

technology Among the issues discussed are the rise of the skyscraper the coming of the automobile age relations between

private and public transport the development of infrastructural technologies **The American City** Arthur Hastings Grant, Harold S. Bottenheim, 1912 *World City Network* Peter Taylor, Ben Derudder, 2015-08-17 With the advent of multinational corporations the traditional urban service function has gone global In order to provide services to globalizing corporate clients the offices of major financial and business service firms across the world have generated networks of work It is the myriad of flows between office towers in different metropolitan centres that has produced a world city network Taylor and Derudder's unique and illuminating book provides both an update and a substantial revision of the first edition that was published in 2004 It provides a comprehensive and systematic description and analysis of the world city network as the skeleton upon which contemporary globalization has been built Through an analysis of the intra company flows of 175 leading global service firms across 526 cities in 2012 this book assesses cities in terms of their overall network connectivity the regional configurations they form and their changing position in the period 2000-12 Results are used to reflect on cities and city state relations in the context of the global ecological and economic crisis Written by two of the foremost authorities on the subject this book provides a much needed mapping of the connecting relationships between world cities and will be a valuable resource for students of urban studies geography sociology and planning **Muslim American City** Alisa Perkins, 2020-07-07 Explores how Muslim Americans test the boundaries of American pluralism In 2004 the al Islah Islamic Center in Hamtramck Michigan set off a contentious controversy when it requested permission to use loudspeakers to broadcast the adh n or Islamic call to prayer The issue gained international notoriety when media outlets from around the world flocked to the city to report on what had become a civil battle between religious tolerance and Islamophobic sentiment The Hamtramck council voted unanimously to allow mosques to broadcast the adh n making it one of the few US cities to officially permit it through specific legislation Muslim American City explores how debates over Muslim Americans use of both public and political space have challenged and ultimately reshaped the boundaries of urban belonging Drawing on more than ten years of ethnographic research in Hamtramck which boasts one of the largest concentrations of Muslim residents of any American city Alisa Perkins shows how the Muslim American population has grown and asserted itself in public life She explores for example the efforts of Muslim American women to maintain gender norms in neighborhoods mosques and schools as well as Muslim Americans efforts to organize public responses to municipal initiatives Her in depth fieldwork incorporates the perspectives of both Muslims and non Muslims including Polish Catholics African American Protestants and other city residents Drawing particular attention to Muslim American expressions of religious and cultural identity in civil life particularly in response to discrimination and stereotyping Perkins questions the popular assumption that the religiosity of Muslim minorities hinders their capacity for full citizenship in secular societies She shows how Muslims and non Muslims have through their negotiations over the issues over the use of space together invested Muslim practice with new forms of social capital and challenged nationalist and secularist notions of belonging **The Global Urban Competitiveness**

Report - 2010 Pengfei Ni, Peter Karl Kresl, 2010-01-01 The Global Urban Competitiveness Report 2010 is an empirical study of the competitiveness of 500 cities around the world. This one of a kind annual resource draws on a wealth of data sources all of which are described and assessed. Using a sophisticated methodology and a team of 100 researchers from the Chinese Academy of Social Science, the book not only ranks these cities but also presents a wealth of information with regard to the strengths and weaknesses of each city in relation to each other. The book includes a full discussion of the factors that create urban competitiveness, what sorts or categories of cities are most competitive, and comments on the policies and initiatives that are adopted by the most competitive cities. Scholars and researchers in the areas of urban economics, planning, geography, and regional economics will find the information invaluable, as will local authorities, decision makers, and economic planners in cities throughout the world.

Planning for a City of Culture Shoshanah Goldberg-Miller, 2017-02-17 Planning for a City of Culture gives us a new way to understand how cities use arts and culture in planning, fostering livable communities, and creating economic development strategies to build their brand, attract residents and tourists, and distinguish themselves from other urban centers worldwide. Goldberg-Miller brings a new, fresh perspective to the study of creative cities by using policy theory as an underlying construct to understand what happened in Toronto and New York in the 2000s.

The American City David Riesman, 2017-07-05 This set of readings presents useful insights into urbanization and provides a fresh perspective on American cities and their inhabitants. Advancing the premise that it is not possible to understand how people live in cities without understanding how they think of them, the editor presents historical and contemporary materials that illustrate vividly the variety of ways in which Americans have viewed their cities and urbanization in general. This book sheds light on what the city is and does by analyzing what its citizens think it should be and do. Its lively, readable selections include contributions from businessmen, ministers, journalists, reporters, city planners, and reformers, as well as sociologists. Strauss shows that Americans' views of cities have been profoundly influenced by their history of continental expansion, successive waves of immigration, massive industrialization, and similar objective developments. He points out that certain perspectives or themes, relations of social classes within the city, of country to city, of small city to big city, of city to region, etc., persist regardless of the social or historical perspective of the writer. The author's comprehensive introduction and his introductions to each section of the book delineate the thematic structure of the readings and guide the reader toward the insights and principles illuminated in the different sections. A fruitful contribution to courses in urban sociology, the book is a useful addition to the libraries of sociologists, political scientists, planners, and city officials who wish to understand more fully the contemporary urban milieu.
