**Education in North America** D. E. Mulcahy, D. G. Mulcahy, Roger Saul, 2014-02-27 Education in North America is a concise and thorough reference guide to the main themes in American and Canadian education from their historical roots to the present time. The book brings a global awareness to the discussion of local issues in North American education and sheds light on the similar and different ways that Canada and the United States have moved in light of political and social changes. Scholarly contributions made by active researchers from the region provide an overview of each country's education system, the way in which it arose and its current state of affairs.

**North American Scholars of Comparative Education** Erwin H. Epstein, 2019-07-01 This book brings together fifteen comprehensive studies of significant North American scholars of comparative education from the 20th century. Providing relevant biographical detail, chapters analyse each scholar's approach to comparative education and their on-going influences on the field. Comparative studies in education have long benefited from the work of significant individuals who have collectively advanced the field, making it a vibrant and intellectually fruitful area of educational research. Offering a unique systematic exploration of the work of the founders of comparative educational research, *North American Scholars of Comparative Education* emphasizes the importance of understanding the accomplishments of key historical figures in the field and considers the legacies such individuals have created. Chapters move beyond descriptions of comparativists' work to illustrate the pivotal role played by each scholar in driving a progression through humanistic and scientific approaches to new epistemological traditions within the field of comparative education. This in turn reveals critical historical epistemological transitions which have had lasting impacts on the field. Including contributions written by leading scholars in the field, this volume will be of great interest to researchers, academics and scholars in comparative and international education.

*System vs. Culture: North American Education and Society in the Balance* Frank Pace, 2014-05 For 160 years North American children have been subject to compulsory schooling. Formal education has evolved some over that time, but the end result of said evolution is an educational system which is dysfunctional, inefficient and ultimately incapable of delivering on its professed mandates. Frank Pace is an educator with years of diverse experience. In *System vs. Culture: North American Education and Society in the Balance*, he looks at the current state of compulsory North American education and sees a system in crisis. He examines the history of modern education and dissects the root causes of its profound dysfunction. *System vs. Culture: North American Education and Society in the Balance* offers some insight into how an alternative model of education might operate and how it would better serve the needs of a changing society and better achieve its purported goals. Frank Pace has many important things to say about the state of North American education. His arguments are persuasive and lucid and backed up by solid scholarship. While the topic is complicated, he does a good job of breaking it down in a way that is readable and compelling for both education professionals and anyone interested in education and learning.
