Bulletin of the Atomic Scientists ,1985-09 **Bulletin of the Atomic Scientists** ,1985-09 Nuclear Proliferation and International Security Sverre Lodgaard,Bremer Maerli,2007-06-11 The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty

Nuclear Logics Etel Solingen, 2009-02-09 Nuclear Logics examines why some states seek nuclear weapons while others renounce them Looking closely at nine cases in East Asia and the Middle East Etel Solingen finds two distinct regional patterns In East Asia the norm since the late 1960s has been to forswear nuclear weapons and North Korea which makes no secret of its nuclear ambitions is the anomaly In the Middle East the opposite is the case with Iran Iraq Israel and Libya suspected of pursuing nuclear weapons capabilities with Egypt as the anomaly in recent decades Identifying the domestic conditions underlying these divergent paths Solingen argues that there are clear differences between states whose leaders advocate integration in the global economy and those that reject it Among the former are countries like South Korea Taiwan and Japan whose leaders have had stronger incentives to avoid the political economic and other costs of acquiring nuclear weapons The latter as in most cases in the Middle East have had stronger incentives to exploit nuclear weapons as tools in nationalist platforms geared to helping their leaders survive in power Solingen complements her bold argument with other logics explaining nuclear behavior including security dilemmas international norms and institutions and the role of democracy and authoritarianism Her account charts the most important frontier in understanding nuclear proliferation grasping the relationship between internal and external political survival Nuclear Logics is a pioneering book that is certain to provide an invaluable resource for researchers teachers and practitioners while reframing the policy debate surrounding nonproliferation
