

Physician-Assisted Suicide:

What is it, and is it worth fighting over?

definition

"Physician-assisted suicide (PAS) is a process whereby patients with **terminal diseases**, who are deemed to have **less than six months to live**, can make legal requests of **physicians to help them end their lives**." It's usually done with a lethal overdose of barbiturates prescribed by a doctor.

vs. euthanasia

PAS is very similar to euthanasia, with **one important distinction**. In **euthanasia**, the life-ending medication is **administered by someone other than the dying person**, such as the doctor himself. With PAS, the doctor only prescribes the medication, and the patient ingests the medication themselves.²

(You might also hear it called "physician-assisted death" or "medical aid in dying.")

Physician Assisted Suicide What Are The Issues:

Physician-Assisted Suicide: What are the Issues? L.M. Kopelman, K.A. de Ville, 2012-12-06 Physician Assisted Suicide What are the Issues offers a detailed discussion of recent supreme court rulings that have had an impact on the contemporary debate in the United States and elsewhere over physician assisted suicide Two rulings by the U S Supreme Court have altered the contemporary debate on physician assisted suicide Washington v Glucksberg 1997 and Vacco v Quill 1997 In these cases the Supreme Court ruled that state laws could prohibit assisted suicide and therefore physician assisted suicide These rulings mark the apex of over two decades of unprecedented litigation regarding end of life care and signal the beginning of a new clinical ethical and legal debate over the extent of an individual s rights to control the timing manner and means of his her death The debate over suicide and assisting suicide is ancient and contentious and intertwined with questions about the permissibility of voluntary active euthanasia or mercy killing Responses to these issues can be divided into those who defend physician assisted suicide and many of these other activities and those who object But those who object may do so on principled grounds in that they regard these activities as wrong in all cases or non principled in that they believe there are more prudent less disruptive or more efficient policies The authors in this book sort out these responses and look at the assumptions underlying them Several of these authors give startling new interpretations that a culture gap deeper and wider than that in the abortion debate exists

Physician-assisted Suicide Susan M. Behuniak, Arthur G. Svenson, 2003 Whether competent terminally ill patients have a right to die with the assistance of their physicians or whether state and national governments have legitimate interests in forbidding the exercise of this right are the central questions around which this book revolves In either case essential constitutional issues as well as ethical and medical reflections enter the debate This book blending original sources and expert commentary prepares its readers to enter the discussion by providing an accessible and concise introduction to the law and politics of physician assisted suicide Its timely appearance also sets the stage for understanding future state referenda court decisions legislation and executive orders expected in 2002 and beyond Visit our website for sample chapters
