The Language Myth Vyvyan Evans, 2014-09-22 Language is central to our lives the cultural tool that arguably sets us apart from other species Some scientists have argued that language is innate a type of unique human instinct pre programmed in us from birth In this book Vyvyan Evans argues that this received wisdom is in fact a myth Debunking the notion of a language instinct Evans demonstrates that language is related to other animal forms of communication that languages exhibit staggering diversity that we learn our mother tongue drawing on general properties and abilities of the human mind rather than an inborn universal grammar that language is not autonomous but is closely related to other aspects of our mental lives and that ultimately language and the mind reflect and draw upon the way we interact with others in the world Compellingly written and drawing on cutting edge research **The Language Myth** sets out a forceful alternative to the received wisdom showing how language and the mind really work

Dynamics of the Singing Voice Meribeth Bunch, 2013-11-11 Every discipline tends to develop its own particular language and ways of communicating This is true also about the various disciplines that talk about and

describe the human voice particularly as it relates to singing The aim of this book is to bridge any gaps in communication foster better understanding of the singing voice and encourage collaboration between those involved in performance teaching therapy and medicine Because there is increasing interest in research in all these disciplines creating a common ground for communication about the singing voice is essential for mutual understanding and for effective prevention and treatment of disorders in singers One object for the artistic and scientific professions is to understand each other better by finding a vocabulary and terminology which they can share and use effectively Difficulty in communication often arises when a singer or teacher of singing attempts to describe something sensory in nature by use of imagery and sign language to non singers including the health and medical professions and in the same way the use of obscure and sometimes frightening terminology by those in the medical sciences when offering explanations to singers Teaching and simple language was and is needed from both sides A number of advances are helping to create rapid change in bridging gaps in communication and in adding new information 1 The formation of Associations for Performing Arts Medicine on a national and international scale are bringing new awareness to those who work with singers and other artists
