Naber And American Foreign Policy 1952 1956:

Monthly Catalog of United States Government Publications ,1951 Monthly Catalog of United States Government Publications, Cumulative Index United States. Superintendent of Documents,1978 The Dismantling of the Good Neighbor Policy Bryce Wood,2010-07-22 The Good Neighbor Policy was unique a great power obligated itself not to use force in its dealings with twenty smaller powers and not to interfere in their domestic politics It was a policy that lasted with some perturbations for twenty years instituted by President Roosevelt in 1933 and carried out effectively from 1933 to 1943 by word and action maintained during the Second World War largely as a result of British concern for continuance of Argentine beef exports codified in the Charter of the Organization of American States in 1948 and reasserted by Truman and Acheson in 1950 51 it was covertly repudiated in Guatemala in 1954 by Eisenhower and the Dulles brothers and not so secretly by Kennedy in the disastrous Bay of Pigs invasion of 1961 Openly shattered in the Dominican Republic by Johnson in 1965 it has since been completely abandoned in favor of the usual relationships between large and small powers Working with documents from the Public Records Office in London and the National Archives with recently released materials from the U S Department of State and with secondary sources Bryce Wood describes the temptations laid before the leaders of one powerful state by its occasionally recalcitrant neighbors and the ways of reacting that were found Having told half the story in his *The Making of the Good Neighbor Policy* Wood now concludes it in the present volume One of the chief casualties is shown to be the Organization of American States which since 1954 has found itself badly crippled in its work to promote harmony and continued cooperation among the member states **A History of American Foreign Policy** Alexander DeConde,1963 Hearings, Reports and Prints of the House Committee on Foreign Affairs United States. Congress. House. Committee on Foreign Affairs (1789-1975),1963 Castro-communist Subversion in the Western Hemisphere United States. Congress. House. Committee on Foreign Affairs,1963 Classified material has been deleted *Castro-communist Subversion in the Western Hemisphere* ,1963 The United States and the Andean Republics Fredrick B. Pike,1977 Monograph on the role of USA in the present and historical political development of the Andean region treats the rise of corporativism ie The protection of traditional culture and social structure from negative outside capitalistic influences in Peru Bolivia and Ecuador and discusses the effects of race and religion Marxism elites and the CIAP on the formation of political ideology Maps and references **Science and American Foreign Relations since World War II** Greg Whitesides,2020-05-28 The sciences played a critical role in American foreign policy after World War II From atomic energy and satellites to the green revolution scientific advances were central to American diplomacy in the early Cold War as the United States leveraged its scientific and technical pre eminence to secure alliances and markets The growth of applied research in the 1970s exemplified by the biotech industry led the United States to promote global intellectual property rights Priorities shifted with the collapse of the Soviet Union as attention turned to information technology and environmental sciences Today international relations take

place within a scientific and technical framework whether in the headlines on global warming and the war on terror or in the fine print of intellectual property rights Science and American Foreign Relations since World War II provides the historical background necessary to understand the contemporary geopolitics of science **Behind the Throne** Thomas J. McCormick, Walter LaFeber, 1993 During the American rise to world power in the last hundred years a new presidency has also arisen a presidency that uses military economic political and personal power that the constitutional founders of the 1780s would have thought highly improbable and dangerous Behind the Throne argues that United States presidents have received foreign policy advice from a new breed of government servants whose first loyalties were to the chief executive not the bureaucracy or the public These servants of power defined world views for the president not only advising but often taking action to implement those world views The essays in this volume focus on nine servants of power Brooks Adams brother of Henry Adams and advisor to Presidents McKinley and Roosevelt greatly influenced early American expansionist thinking by supporting Frederick Jackson Turner s Frontier Thesis Charles Conant in the same era profoundly affected America s economic relationship with Asia and Latin America During the Wilson administration Admiral William Caperton s views influenced foreign policy in the Caribbean and Latin America Controlling J P Morgan s overseas investments Thomas Lamont had direct access to and considerable influence upon every president in the 1920s and 1930s Adolf Berle advisor to Franklin Roosevelt guided the United States economic and security policies for the post World War II era preparing the way for both the World Bank and the International Monetary Fund As members of the Senate Foreign Relations Committee Senator Arthur Vandenberg and Senator Gerald P Nye championed United States isolationist policies in the early years of the cold war Vandenberg later turned internationalist and used his position as ranking Republican on the Committee to promote President Truman s foreign policies in Congress His advice to Truman was crucial in the founding of the United Nations and the Organization of American States Thomas Mann Undersecretary of State for Latin American affairs in the Kennedy and Johnson administrations was instrumental in turning the United States away from the Alliance for Progress and back to a hard line policy A former Harvard dean McGeorge Bundy influenced the Kennedy Johnson experiments in global social engineering and the escalation of the Vietnam War The rise of the United States to the status of the world s lone and often highly perplexed and frustrated superpower cannot be understood without understanding these nine influential men and their roles in recent American history The volume also stands as a tribute to Fred Harvey Harrington professor of history and former president of the University of Wisconsin Madison All of the contributors began their distinguished careers as students of Harrington
