States, Banks and Crisis Thomas Marois,2012-05-01 Thomas Marois book States Banks and Crisis is highly attractive to development scholars because of the combinations of topics it discusses the countries analyzed and its characterization of financial capital as dominant In the last century the states of Mexico and Turkey promoted robust economic growth guided by powerful public banking organizations The book captures how this came to a halt since the 1980s through the privatizing of economic activity especially banking activities in ways that induced steep banking crises that halted economic development Marois discusses the theory and history of Mexico and Turkey in depth offering an excellent analysis of their neoliberal experiences while proposing new alternatives to reshape the linkages between the financial sector and economic growth Noem Levy National Autonomous University of Mexico UNAM Mexico City This book attempts to provide a critique of neoclassical and liberal political economists as well as the much hyped and influential varieties of capitalism approach a variant of institutionalist political economy by claiming that they are dismissive of the structural power of financial capital In this regard it makes an important contribution to the critical political economy tradition with its detailed analysis of the relations between the state finance capital and labour in the context of two emerging capitalisms Mexico and Turkey Thereby it enhances our understanding of how the financial crises function as driving forces of neoliberal transformation by initiating new forms of state specific to peripheral capitalism Galip Yalman Middle East Technical University Turkey As analysts fixated on the financial crisis convulsing the core capitalist countries the so called emerging markets also saw stunning transformations in the world of finance capitalism This remarkable study by Tom Marois carefully dissects the evolution of the banking industry in two of the most significant state led capitalisms Turkey and Mexico as they formed finance led neoliberal economic policies The consequences for their development strategies makes for sober reading This is a unique and crucial study for students of the comparative political economy of contemporary capitalism Greg Albo York University Canada

Financialization is as financialization does It is a mix of the universal characteristics of finance within capitalism its contemporary powerful hold over even defining feature of the neoliberal age and the myriad of specific global markets and countries into which it has penetrated In a stunning work of comparative political economy Marois brilliantly weaves together these aspects of finance drawing on both innovative theoretical insights and primary case study evidence from Turkey and Mexico to furnish what will become a classic and original contribution to the understanding of financialization in the developing world highlighting both the role of the state in the era of putatively free markets and the possibility indeed necessity of alternatives Ben Fine University of London UK Marois has provided us with a fascinating rigorous and important study of the rise and persistence of finance capitalism in Mexico and Turkey Drawing on an innovative historical materialist lens Marois analysis reveals the struggles contradictions and continued significance of the banking sector in defining and redefining neoliberal led development in these so called emerging markets This is a very welcome addition to critical understandings of the role of finance and states in the global South Susanne Soederberg Queen s University Canada Thomas Marois groundbreaking interpretation of banking and development in Mexico and Turkey builds on a Marxian inspired framework premised on understanding states and banks as social relationships alongside crisis and labor as vital to finance today The book s rich historical and empirical content reveals definite institutionalized relationships of power that mainstream political economists often miss While leading to a timely analysis of the impact of the Great Recession on Mexico and Turkey the major contribution of *States Banks and Crisis* in its account of emerging finance capitalism This is defined as the current phase of accumulation wherein the interests of financial capital are fused in the state apparatus as the institutionalized priorities and overarching social logic guiding the actions of state managers and government elites often to the detriment of labor This interdisciplinary and accessible study on banking and development will prove to be an important resource for upper level undergraduates graduates and scholars in economics development studies political science political economy development finance sociology international relations and international political economy
