**Vicki K. Janik**

## **Naked Anthropologist Tales From Around The World:**

**The Naked Anthropologist** Philip R. DeVita, 1992      **Ways of Knowing** Jean-Guy A. Goulet, 1998 The creative world of a northern Native community is revealed in this innovative book. Once semi-nomadic hunters and gatherers, the Dene Tha of northern Canada today live in government-built homes in the settlement of Chateh. Their lives are a distinct blend of old and new in which more traditional forms of social control, healing, and praying intertwine with services supplied by the Royal Canadian Mounted Police, a nursing station, and a Roman Catholic church. Many older cultural beliefs and practices remain, ghosts still linger, reincarnating, and sometimes stealing children's souls. Dreams and visions are powerful shapers of actions and personal visions and experiences are considered the sources of true knowledge.      *An Ethic for the Age of Space*

Lawrence LeShan, 1996-04-01 Making use of an ethical system based on psychological need rather than on metaphysical or theological grounds, LeShan shows how an evolved ethical system can keep pace with science and technology and displace the damage being done to the planet and our own survival.      **Changing Fields of Anthropology** Michael

Kearney, 2004-06-10 This book explores major shifts and reorientations in the recent history of American Anthropology, reflecting the author's vision of what anthropology is and what it has the potential to become. The title phrase "changing fields" can be read in two ways. One meaning refers to how, since the mid-1960s, the larger national and global social, intellectual, and political fields within which American anthropology is situated have profoundly changed. The second meaning refers to how, in response to these changing fields, the author like many other anthropologists changed the locations of his fieldwork along with his research problems and theoretical perspectives. The book engages three fundamental intellectual, political, and methodological challenges that American anthropology is destined to confront or, at its peril, avoid: becoming more self-reflexive, achieving theoretical holism, and defense of universal human rights.      **Fools and Jesters in Literature, Art, and History**

Vicki K. Janik, 1998-05-21 Jesters and fools have existed as important and consistent figures in nearly all cultures. Sometimes referred to as clowns, they are typological characters who have conventional roles in the arts, often using nonsense to subvert existing order. But fools are also a part of social and religious history and they frequently play key roles in the rituals that support and shape a society's system of beliefs. This reference book includes alphabetically arranged entries for approximately 60 fools and jesters from a wide range of cultures. Included are entries for performers from American popular culture such as Woody Allen, Mae West, Charlie Chaplin, and the Marx Brothers; literary characters such as Shakespeare's Falstaff, Rabelais' Gargantua and Pantagruel, and Singer's Gimpel; and cultural and mythological figures such as India's Birbal, the American circus clown, the Native American Coyote, Taishu Engeki of Japan, Hephaestus, Loki, the Norse fool, schlimiels, and schlimazels, and the drag queen. The entries, written by expert contributors, are critical as well as informative. Each begins with a biographical, artistic, religious, or historical background section which places the subject within a larger cultural and historical context. A description and analysis follow. This section may include a discussion of the fool's appearance, gender, role,

ethical and moral roles social function and relationship to such themes as nature time and mortality The entry then discusses the critical reception of the subject and concludes with an extensive bibliography of general works *Doing Ethnographies* Mike Crang,Ian Cook,2007-03-12 *Doing Ethnographies* is an introductory and applied guide to ethnographic methods It focuses on those methods participant observation interviewing focus groups and video photographic work that allow us to understand the lived everyday world Informed by the authors fieldwork experience the book covers the relation between theory practice and writing and demonstrates how methods work in the field so preparing the first time ethnographer for the loss of control and direction often experienced Religion-State Encounters in Hindu Domains Vineeta Sinha,2011-04-07 The historical and empirical project presented here is grounded in a desire to theorize religion state relations in the multi ethnic multi religious secular city state of Singapore The core research problematic of this project has emerged out of the confluence of two domains religion law and bureaucracy and religion and colonial encounters This work has two core objectives one to articulate the actual points of engagement between institutions of religion and the state and two to identify the various processes mechanisms and strategies through which relations across these spheres are sustained The thematic foundations of this book rest on disentangling the complex interactions between religious communities individuals and the various manifestations of the Singapore state relationships that are framed within a culture of bureaucracy This is accomplished through a scrutiny of Hindu domains on the island nation state from her identity as part of the Straits Settlements to the present day The empirical and analytical emphases of this book rest on the author s engagement with the realm of Hinduism as it is conceived structured framed and practiced within the context of a strong state in Singapore today Ethnographically the book focusses on Hindu temple management and the observance of Hindu festivals and processions enacted within administrative and bureaucratic frames **Joseph Conrad and the Anthropological Dilemma** John Wylie Griffith,1995 By situating Conrad s work in relation to other writings on primitive peoples John Griffith shows how his fiction draws on prominent anthropological and biological theories regarding the degenerative potential of contacts between European and other cultures At the same time however Conrad s work reflected an anthropological dilemma he constantly posed the question of how to bridge conceptual and cultural gaps between various peoples **Participant Observation** Kathleen Musante DeWalt,Billie R. DeWalt,2011 Participant observation is the foundation of ethnographic research design and supports and complements other types of qualitative and quantitative data collection Qualitative research in such diverse areas as anthropology sociology education medicine draws on the insights gained through the use of participant observation The authors have written a guide to the collection of systematic data in naturalistic settings communities in many different cultures to achieve an understanding of the most fundamental processes and patterns of social life This book serves as a basic primer for the beginning researcher and as a useful reference and guide for experienced researchers in many fields who wish to reexamine their own skills and abilities in light of best practices of participant observation This new edition

includes discussions of participant observation in nontypical settings such as the Internet participant observation in applied research and ethics of participant observation It also explores in greater depth the use of computer assisted analysis of textual data in issues of sampling and in linking method with theory      **Strangers to Relatives** Sergei Kan, 2001-01-01

**Strangers to Relatives** is an intimate and illuminating look at a typical but misunderstood part of anthropological fieldwork in North America the adoption and naming of anthropologists by Native families and communities Adoption and naming have long been a common way for Native peoples in Canada and the United States to deal with strangers who are not enemies For over a century adoption and naming have also served as an important means for many Native American and First Nation communities to become connected to the anthropologists visiting and writing about them In this outstanding volume leading anthropologists in the United States and Canada discuss this issue by focusing on the cases of such prominent earlier scholars as Lewis Henry Morgan and Franz Boas They also share personal experiences of adoption and naming and offer a range of stimulating perspectives on the significance of these practices in the past and today The contributors explore the impact of adoption and naming upon the relationship between scholar and Native community considering in particular two key issues How does adoption affect the fieldwork and subsequent interpretations by anthropologists and in turn how are Native individuals and communities themselves affected by adopting an outside scholar whose aim is to learn and write about them **Strangers to Relatives** not only sheds valuable light on how anthropology fieldwork is conducted but also makes a seminal contribution to our understanding of the ongoing often troubled relationship between the academy and Native communities
