Naming Necessity

Harry J. Gensler

Naming Necessity:

Naming and Necessity Saul A. Kripke, 1980 Naming and Necessity has had a great and increasing influence It redirected philosophical attention to neglected questions of natural and metaphysical necessity and to the connections between these and theories of naming and of identity This seminal work to which today's thriving essentialist metaphysics largely owes its impetus is here reissued in a newly corrected form with a new preface by the author If there is such a thing as essential reading in metaphysics or in philosophy of language this is it *Naming, Necessity, and Natural Kinds* Stephen P.

Schwartz, 1977 **Naming, Necessity and More** Jonathan Berg, 2014-12-03 Saul Kripke's Naming and Necessity was one of the most influential philosophical works of the twentieth century In this collection of essays leading specialists explore issues arising from this and other works of Kripke's **The Collected Writings of Jaysankar Lal Shaw: Indian Analytic and Anglophone Philosophy** Jaysankar Lal Shaw, 2016-09-22 One of the first philosophers to relate Indian philosophical thought to Western analytic philosophy Jaysankar Lal Shaw has been reflecting on analytic themes from Indian philosophy for over 40 years This collection of his most important writings introduces his work and presents new ways of using Indian classical thought to approach and understand Western philosophy By expanding reinterpreting and reclassifying concepts and views of Indian philosophers Shaw applies them to the main issues and theories discussed in contemporary philosophy of language and epistemology Carefully constructed this volume of his collected writings shows the parallels Shaw draws between core topics in both traditions such as proper names definite descriptions meaning of a sentence knowledge doubt inference and testimony It captures how Shaw uses the techniques and concepts of Indian philosophers especially the followers of the Navya Nyaya to address global problems like false belief higher order knowledge and extraordinary perception Exploring timeless ideas from Indian thought alongside major issues in contemporary philosophy Shaw reveals how the two traditions can interact and throw light on each other providing better solutions to philosophical problems He has also reflected on modern issues such as freedom morality and harmony from the classical Indian thought Featuring a glossary and updates to his writings *The Collected Writings of Jaysankar Lal Shaw Indian Analytic and Anglophone Philosophy* also includes new work by Shaw on the relationship between Indian and analytic philosophy today

Rationalized Epistemology Albert A. Johnstone, 1991-10-18 This book examines skeptical problems originally raised by Descartes and Hume and currently discussed in philosophy of mind philosophy of language metaphysics and epistemology It answers the basic skeptical questions concerning the existence of what is now unperceived the reality of what is perceived and the existence of an external world Johnstone shows how the recently proposed solutions to these skeptical problems pragmatic coherentist linguistic and new Kantian do not and cannot work and how only a return to foundational investigation on the terrain of the radical skeptic is adequate to the task His analyses make for a valuable summary of every significant argument brought against skepticism In the course of his investigation Johnstone probes a number of topical issues

knowledge rationality the nature of meaning nonverbal thinking the bodily nature of the thinking self parasitism the role of the tactile kinesthetic body in feeling and belief and the necessary role of free will in epistemology *Philosophical Logic* Sybil Wolfram, 1989 A basic introduction to the subject which addresses questions of truth and meaning providing a basis for much of what is discussed elsewhere in philosophy Up to date and comprehensive **The A to Z of Logic** Harry J. Gensler, 2010-02-12 The A to Z of Logic introduces the central concepts of the field in a series of brief non technical cross referenced dictionary entries The 352 alphabetically arranged entries give a clear basic introduction to a very broad range of logical topics Entries can be found on deductive systems such as propositional logic modal logic deontic logic temporal logic set theory many valued logic mereology and paraconsistent logic Similarly there are entries on topics relating to those previously mentioned such as negation conditionals truth tables and proofs Historical periods and figures are also covered including ancient logic medieval logic Buddhist logic Aristotle Ockham Boole Frege Russell G del and Quine There are even entries relating logic to other areas and topics like biology computers ethics gender God psychology metaphysics abstract entities algorithms the ad hominem fallacy inductive logic informal logic the liar paradox metalogic philosophy of logic and software for learning logic In addition to the dictionary there is a substantial chronology listing the main events in the history of logic an introduction that sketches the central ideas of logic and how it has evolved into what it is today and an extensive bibliography of related readings This book is not only useful for specialists but also understandable to students and other beginners in the field **The Oxford Handbook of Epistemology** Paul K. Moser, 2005-10-27 The Oxford Handbook of Epistemology contains 19 previously unpublished chapters by today s leading figures in the field These chapters function not only as a survey of key areas but as original scholarship on a range of vital topics Written accessibly for advanced undergraduates graduate students and professional philosophers the Handbook explains the main ideas and problems of contemporary epistemology while avoiding overly technical detail **Metaphysics** Peter van Inwagen, 2024-01-22 This book is an introduction to metaphysics It presupposes no previous acquaintance with philosophy and addresses the following questions What is metaphysics Is there a plurality of things or is there only one thing Is there an external world a world of things that exist independently of human thought and sensation What is time Is there such a thing as objective truth Why is there something rather than nothing Does our existence have a meaning Are we physical or non physical beings Do we have free will Are there things that do not exist Do universals exist This Fifth Edition differs from the Fourth in that the long previously difficult chapter on time has been extensively rewritten making it much more accessible and engaging for the student reader In addition the author has enhanced clarity throughout the text with improvements to word choice sentence structure and paragraph lucidity Finally the Notes and Suggestions for Further Reading at the end of each chapter and the General Bibliography have all been brought up to date Key Features Presupposes no prior acquaintance with philosophy making the book ideal for the undergraduate student or interested general reader Offers 13 chapters organized into three

parts and each with its own introduction The Way the World Is Why the World Is The Inhabitants of the World Incorporates extensive revisions to Chapter 4 on temporality Includes updates to the Chapter Notes and Suggestions for Further Reading as well as to the General Bibliography **Against the Current** Guillermo E. Rosado Haddock, 2013-05-02 The present collection of seventeen papers most of them already published in international philosophical journals deals both with issues in the philosophy of logic the philosophy of mathematics the philosophy of language and epistemology The first part contains critical assessments and somewhat deviant renderings of the work of two seminal philosophers Frege and Husserl as well as of the young Carnap and Kripke The second part contains analyses of central issues in the philosophy of logic the philosophy of mathematics and semantics including arguments on behalf of Platonism in the philosophy of mathematics a defense of second order logic a new definition of analyticity a sketch of a semantics for mathematical statements and a critique of Kripke's possible world semantics for modal logic
