Narrative Dynamics Essays On Plot Time Closure And Frames:

Narrative Dynamics Brian Richardson, 2002 This anthology brings together essential essays on major facets of narrative dynamics that is the means by which narratives traverse their often unlikely routes from beginning to end It includes the most widely cited and discussed essays on narrative beginnings temporality plot and emplotment sequence and progression closure and frames The text is designed as a basic reader for graduate courses in narrative and critical theory across disciplines including literature drama and theatre and film *Narrative Dynamics* includes such classic exponents as E M Forster on story and plot Vladimir Propp on the structure of the folktale R S Crane on plot Boris Tomashevsky on story plot and motif M M Bakhtin on the chronotope and Gerard Genette on narrative time Richardson highlights essential feminist essays by Nancy K Miller on plot and plausibility Rachel Blau Duplessis on closure and Susan Winnett on narrative and desire These are complimented by newer pieces by Susan Stanford Friedman on spatialization and Robyn Warhol on serial fiction Other major contributions include Edward Said on beginnings Hayden White on historical narrative Peter Brooks on plot Paul Ricoeur on time D A Miller on closure James Phelan on progression and Jacques Derrida on the frame Recent essays from the perspective of cultural studies postmodernism and artificial intelligence bring this collection right up to the present [The Completion of Judges](#) David J. H. Beldman, 2017-05-08 The last five chapters of the book of Judges chs 17 21 contain some shocking and bizarre stories and precisely how these stories relate to the rest of the book is a major question in scholarship on the book Leveraging work from literary studies and hermeneutics Beldman reexamines Judges 17 21 with the aim of discerning the strategies of ending that are at work in these chapters The author identifies and describes a number of strategies of ending in Judges 17 21 including the strategy of completion the strategy of circularity and the strategy of entrapment The temporal configuration of Judges and especially the nonlinear chronology that chapters 17 21 expose also receive due attention All of this offers fresh insights into the place and function of Judges 17 21 in the context of the whole book **The Temporal Mechanics of the Fourth Gospel** Douglas Charles Estes, 2008-03-31 Spiritual but broken theological but flawed these are the words critics use to describe the Gospel of John Compared to the Synoptics John s version of the life of Jesus seems scrambled especially in the area of time and chronology But what if John s textual and temporal flaws have more to do with our implicit assumptions about time than a text that is truly flawed This book responds to that question by reinventing narrative temporality in light of modern physics and applying this alternative temporal lens to the Fourth Gospel From the singularity in the epic prologue to the narrative warping of event like objects this work explodes the elemental temporalities simmering below the surface of a spiritual yet superior Gospel text [Unnatural Narratives - Unnatural Narratology](#) Jan Alber, Rüdiger Heinze, 2011-09-29 In recent years the study of unnatural narratives has become an exciting new but still disparate research program in narrative theory For the first time this collection of essays presents and discusses the new analytical tools that have so far been developed on the basis of unnatural novels short stories and plays

and extends these findings through analyses of testimonies comics graphic novels films and oral narratives Many narratives do not only mimetically reproduce the world as we know it but confront us with strange narrative worlds which rely on principles that have very little to do with the actual world around us The essays in this collection develop new narratological tools and modeling systems which are designed to capture the strangeness and extravagance of such anti realist narratives Taken together the essays offer a systematic investigation of anti mimetic techniques and strategies that relate to different narrative parameters different media and different periods within literary history

Science and Affect in Contemporary Literature Shannon Lambert, 2024-12-12 Moving from the micro world of quantum physics to the macro scales of earth science and ecology this book considers how in contemporary literature affective experiences like desire suffering anxiety and joy shape scientific persons practices and products This book brings into dialogue close readings of scientific writing and contemporary literary works by authors like Jeanette Winterson Richard Powers Hanya Yanagihara Thalia Field and Jenny Offill Combining narrative and affect studies it uses formal strategies such as moving metaphor visceral or affective description plot level analogy contraction and rhythm to engage with western scientific epistemologies which still tends towards the impassive universal and objective While each chapter focuses on a different field or fields of science all foreground bodies human and nonhuman as a way of exploring knowledge production Through close readings the book argues that select scientific stories raise important questions about how knowledge is defined and who and what is invited into its processes of production

Point of View, Perspective, and Focalization Peter Hühn, Wolf Schmid, Jörg Schöner, 2009 Stories do not actually exist in the world but are created and structured modeled through the process of mediation i e through the means and techniques by which they are represented This is an important field not only for narratology but a

Memory, Metaphors, and Meaning Nicolae Babuts, 2017-07-05 Literature explores the human condition the mystery of the world life and death as well as our relations with others and our desires and dreams It differs from science in its aims and methods but Babuts shows in other respects that literature has much common ground with science Both aim for an authentic version of truth To this end literature employs metaphors and it does so in a manner similar to that of scientific inquiry The cognitive view does not imply that there is a one to one correlation between the world and text that meaning belongs to the author or that literature is equivalent to perception What it does maintain is that meaning is crucially dependent on mnemonic initiatives and that without memory the world remains meaningless Nicolae Babuts claims that at the interface with the printed page readers process texts in a manner similar to the way they explain the visible world in segments or units of meaning or dynamic patterns Babuts argues that humans achieve recognition by integrating stimulus sequences with corresponding patterns that recognize and interpret each segment of a text Memory produces meaning from these patterns In harmony with its goals memory may adopt specific strategies to deal with different stimuli Dynamic patterns link the unit of processing with the unit of meaning In sum Babuts proposes that meaning is achieved through metaphors and narrative

and that both are ways to reach cognitive goals This original study offers perspectives that will interest cognitive psychologists as well as those simply interested in the process through which literature stirs the human imagination
