Asymmetries in Vowel Harmony Harry van der Hulst, 2018-08-23 This book deals with the phenomenon of vowel harmony a phonological process whereby all the vowels in a word are required to share a specific phonological property such as front or back articulation Vowel harmony occurs in the majority of languages of the world though only in very few European languages and has been a central concern in phonological theory for many years In this volume Harry van der Hulst puts forward a new theory of vowel harmony which accounts for the patterns of and exceptions to this phenomenon in the widest range of languages ever considered The book begins with an overview of the general causes of asymmetries in vowel harmony systems The two following chapters provide a detailed account of a new theory of vowel harmony based on unary elements and licensing which is embedded in a general dependency based theory of phonological structure In the remaining chapters this theory is applied to a variety of vowel harmony phenomena from typologically diverse languages including palatal harmony in languages such as Finnish and Hungarian labial harmony in Turkic languages and tongue root systems in Niger Congo Nilo Saharan and Tungusic languages The volume provides a valuable overview of the diversity of vowel harmony in the languages of the world and is essential reading for phonologists of all theoretical persuasions The Oxford Handbook of Vowel Harmony Nancy A. Ritter, Harry van der Hulst, 2024-10-17 This handbook provides a detailed account of the phenomenon of vowel harmony a pattern according to which all vowels within a word must agree for some phonological property or properties Vowel harmony has been central in the development of phonological theories thanks to its cluster of remarkable properties notably its typically unbounded character and its non locality and because it forms part of the phonology of most world languages The five parts of this volume cover all aspects of vowel harmony from a range of theoretical and methodological perspectives Part I outlines the types of vowel harmony and some unusual cases before Part II explores structural issues such as vowel inventories the interaction of vowel harmony and morphological structure and locality The chapters in Part III provide an overview of the various theoretical accounts of the phenomenon as well as bringing in insights from language acquisition and psycholinguistics while Part IV focuses on the historical life cycle of vowel harmony looking at topics such as phonetic factors and the effect of language contact The final part contains 31 chapters that present data and analysis of vowel harmony across all major language families as well as several isolates constituting the broadest coverage of the phenomenon to date **The Blackwell Companion to Phonology, 5 Volume Set** Marc van Oostendorp, 2011-04-04 Available online or as a five volume print set The Blackwell Companion to Phonology is a major

The Interfaces Kerstin Schwabe, Susanne Winkler, 2003-03-20 The Interfaces Deriving and Interpreting Omitted Structures is a collection of never before published papers that explore the nature of the interfaces of syntax with semantics phonology and discourse The papers investigate the various ways in which elliptical structures are related to these interfaces As such they not only make a valuable contribution to generative linguistic research but more generally help to deepen our understanding of the relation between form and meaning in natural language In the book's introductory chapter the editors address general issues related to current work on ellipsis and the syntax semantics syntax phonology and syntax discourse interfaces The rest of the book is organized into three parts The first examines PF deletion accounts of elliptical structures the second investigates these structures from the perspective of the syntax semantic interface and the third explores these from a perspective that concentrates on the relation between semantics and focus and discourse structure Together the papers collected in this volume offer a convincing demonstration of the value of collaborative research on the interfaces

The Segment in Phonetics and Phonology Eric Raimy, Charles E. Cairns, 2015-06-15 The Segment in Phonetics and Phonology unravels exactly what the segment is and on what levels it exists approaching the study of the segment with theoretical empirical and methodological heterogeneity as its guiding principle A deliberately eclectic approach to the study of the segment that investigates exactly what the segment is and on what level it exists Includes new research data from a diverse range of fields such as experimental psycholinguistics language acquisition and mathematical theories of communication Represents the major theoretical models of phonology including Articulatory Phonology Optimality Theory Laboratory Phonology and Generative Phonology Examines both well studied languages like English Chinese and Japanese and under studied languages such as Southern Sierra Miwok P ri and American Sign Language

A Unified Approach to Nasality and Voicing Kuniya Nasukawa, 2012-03-12 This book makes an important contribution to the expanding body of work in generative phonology

which aims to reduce the number of traditionally recognized melodic categories in order to achieve a greater degree of restrictiveness. By analyzing data from a large number of different languages, Nasukawa establishes a clear affinity between nasality and voicing and demonstrates the advantages of treating these two properties as different phonetic manifestations of a single nasal voice category. The choice of whether to interpret this category as voicing or nasality is determined by the active or inactive status of a complement tier: when active, this complement tier enhances the acoustic image of its head category and is interpreted as voicing. This study deepens our understanding of the typological relation between nasality and voicing and sheds new light on a number of related agreement phenomena such as nasal harmony, postnasal voicing, assimilation, voiced obstruent voicing assimilation, and spontaneous prenasalisation.
