FPT 425/93

"This is not only a guide, an identification handbook, and a picture book. It is also the best kind of science-writing for the layman, combining science, history, and social history, and doing with all this the kind of writing that enables the reader to absorb scientific fact without realizing how much he is actually learning."

—*SAN FRANCISCO CHRONICLE*

"This could ask for no finer exposition of the priceless heritage of America's forests and the vital necessity of preserving them for all time."

—*NEW YORK HERALD TRIBUNE BOOK REVIEW*

"Both poetically evocative and deep with scholarly information."

—*THOMAS J. LYON*

Two genuine classics of natural history, *A Natural History of Western Trees* and its eastern counterpart, *A Natural History of Trees of Eastern and Central North America*, are the most eloquent, informative, and entertaining books ever written about the trees of North America. Each volume covers all of the native American trees of its region. More than 1,000 color, scientific botanical descriptions of each species—its leaves, flowers, fruits, bark, seeds, geographic range—Donald Culross Peattie's name, in an essay of one hundred to several thousand words, on the relations between man and people over the course of American history. These essays, unique in style and viewpoint, contain an incomparable volume of natural history.

Donald Culross Peattie, author of these classic books, was described by Joseph Wood Krutch as "perhaps the most widely read of all contemporary American nature writers."
